CONNECTICUT HOSPITAL FOR INSANE.
AT MIDDLETOWN.

FIRST REPORT
OF THE
BOARD OF TRUSTEES
OF THE
GENERAL STATE HOSPITAL
FOR THE INSANE,
OF THE
STATE OF CONNECTICUT,

Presented to the General Assembly, at its Session in May, 1867.

BY ORDER OF THE GENERAL ASSEMBLY.

NEW HAVEN :
PRINTED BY THOMAS J. STAFFORD.
1867.

REPORT.

To the Honorable, the General Assembly of the State of Connecticut :

THE Board of Trustees of "The General Hospital for the Insane of the State of Connecticut," appointed by your Honorable Body, at their last session at New Haven, respectfully report,

That their first meeting was held in the city of Hartford in July last, His Excellency, the Governor, presiding, and that the important duties confided to them were entered upon with unanimity and zeal. They found a prevailing sentiment that the State of Connecticut was earnest in the determination to make "ample and suitable provision for its Insane"—of which it is computed there are between four hundred and five hundred now needing the protection of the Hospital—and that the Board would be justly held responsible for any needless delay in the accomplishment of this great object ;—indeed, the more that was learned of the Insane in visits to various Hospitals, and of the pressing necessity in this State for such a curative institution, and of the remedial benefits to be conferred by it, upon the helpless class afflicted with the terrible

malady of Insanity, the more interested and pledged were your Board to provide, at the earliest period, a Hospital, which, in its BUILDINGS, should combine all the improvements for economy, comfort and ventilation, which experience has successfully endorsed, and in the TREATMENT OF PATIENTS, all those excellent methods which modern science and Christian faithfulness in this peculiar work, have developed, in order that the WHOLE, in its working, shall conduce, in the words of the preamble of Act of appointment, to "the public welfare," the glory of "our Holy Religion;"—and, it may be added, to the honor of the State of Connecticut.

Under this sense of responsibility to the benevolent intent of the General Assembly, your Board felt the necessity of informing themselves individually, of the needs in detail, of Institutions for the relief of Insane, and visited personally several Hospitals, thus bringing together many facts, and the experience of well-known Superintendents in other States, of direct value to their object.

After several meetings and discussions, and hearing the claims and liberal propositions of other places, the Board formally and unanimously accepted a tract of land, of about one hundred and fifty acres, which the town of Middletown offered gratuitously to the State for the purposes of the Hospital.

The location is about two miles southeasterly of the city of Middletown;—is healthy, sufficiently elevated, easy of access by land and water; (the depth of water of the river, at end of dock, is twelve to sixteen feet;) commanding extended views of a beautiful region,—and what is of special mark, includes the absolute control of a small stream called "Butler's Creek,"—giving, by the estimates of Engineers, an abundant water-head of seventy feet above the foundation of the proposed

buildings, with a power adequate to all the uses of water within the walls, and sufficient for all mechanical and ornamental appliances, in shops and on the grounds, which it may be convenient or proper to establish.

In selecting the special site for the foundations of the buildings, it was found that the economical and best interests of the State and of the Institution, required a larger extent of level ground than existed on the land given by Middletown, and a purchase was subsequently made of about eighty acres, connecting directly across a narrow highway, with the westerly line of the former tract.

Upon a plateau of this last named land, excavations were begun for foundations, and a permanent road to the highway constructed, under the direction of Dr. Abraham Marvin Shew, the appointed Superintendent of the Hospital,—who, before entering upon his duties, gave the required bond and securities in accordance with the “act,” and furnished a “plan” for the buildings, which was approved by the Board. The particulars of the plan are given in the annexed report of the Superintendent.

The work on the grounds was interrupted by the cold in December, and resumed about the first of April.

The slackness of the demand for labor and stone, incident to winter, and the fact of a “natural bridge” of ice on the river, were availed of for cheaply hauling to the site several hundreds of tons of sand and stone to be ready for use in the spring; also for the construction of a wharf very near to the site. The town of Middletown has consented to pay nearly all of the cost of the wharf.

A decline in prices of materials during the winter, led to the purchase of two hundred thousand brick, and to the making of favorable contracts, mentioned in another part of

this report, for one million brick, five thousand perches of stone, five hundred thousand feet of Georgia pine and other lumber, deliverable early in the spring, to be stacked for seasoning, and for one thousand or more barrels of lime.

A contract also, was made for a dam and appurtenances, with minute specifications for details as to manner and form of construction, flowage of about three and one-half acres, thorough "grubbing," and for the providing and laying of necessary pipe to convey water to the buildings.

It is confidently expected by the Board, and by competent Engineers who have been consulted, that the new feature to be introduced at this institution, viz. the economical service of water descending by gravity for use in the buildings, and for the motive power of the necessary machinery for ventilation and other purposes, instead of the costly service of steam, as in every other Hospital in the country, will be of eminent success and of permanent economy, saving thereby not only the cost of erection and repairs of expensive machinery, but hundreds of tons of coal, annually, in fuel.

It will be evident that this use of water obviates the necessity of a steam-engine with skilled attendants, of reservoirs in the upper stories of the buildings, which are often liable to leaks, causing injury to walls and furniture, and also of troublesome forcing pumps. The Board do not believe that they overestimate the advantages of this provision of water. A deficient supply of water, and the difficulties frequently experienced with the machinery that raises it, are subjects of anxiety and complaint in many institutions. From these it may fairly be expected that your Hospital will be free.

The appropriation of the last General Assembly for the supposed necessary expenditure until the next session, was only \$35,000, of the much larger sum which it was well known

would be needed for the carrying out of their just and benevolent intentions for this Institution.

To accomplish all that was deemed by your Board indispensable to an early completion of a part of the Hospital, and the early reception of patients, as well as to consult true economy in choosing a favorable time to obtain the materials requisite for the progress of the structure, it was determined unanimously, to make contracts for brick, stone, lime and lumber, with parties of good standing, who, in every case, accepted them "on the condition of waiting the action of the next General Assembly for payment, without interest;" a copy of the vote of the Board to this effect was furnished to each. In thus having on hand materials, especially lumber, which requires time for seasoning, your Board are convinced that the building will be ready for inmates several months, before it could have been, had they waited for the present session, before making arrangements for supplies.

As the contractors have thus so willingly entered upon engagements, relying upon the Faith of the State, it may not be considered other than respectful on the part of the Board, to call the attention of your Honorable Body to the need of early legislation in behalf of the Institution.

In Dr. Shew, the Superintendent, the Board are satisfied that a selection has been made of a competent, energetic, Christian man, devoted to the duties of his position. He is of Connecticut origin, served over two years as Surgeon in the army of the United States, and in treatment of the Insane in Hospitals nearly three years, and had full testimonials for integrity, capacity and experience. His experience, too, derived from aiding in the erection of extensive additions to the New Jersey State Hospital for the Insane, (for which the Legislature lately appropriated \$100,000,) made during the past year

at Trenton, has been found of much value. Dr. Buttolph, Superintendent of the New Jersey Institution, who, from character and the experience of many years, is an acknowledged authority in such matters, recommended Dr. Shew in the highest terms for the direction of your Hospital. It is due to Dr. Buttolph, and it gives us pleasure to mention it, that he voluntarily came from Trenton to visit the site at Middletown, and gave the Board important suggestions as to plans and the positions of buildings.

The Board are greatly indebted to Miss Dix for her disinterested advice and labors, and for attendance, as requested, at several of the earlier meetings, and for the continued interest she has manifested in the progress of the Hospital, with which her efforts in this State will be identified, as they justly are with similar institutions in so many of the other States of the Union.

The report of the Superintendent and Treasurer is herewith enclosed.

In conclusion, the Board of Trustees respectfully request,

First,—An appropriation of \$100,000 for the needful expenditures of 1867–8.

By early action of the General Assembly, it is believed that the center building and two wings, over three hundred feet in length, to contain two hundred patients, may be opened during next year. The report of the Superintendent is referred to for the dimensions of the buildings, information as to plans, and reasons for work already in progress.

Second,—The passing of a bill to regulate admissions of patients.

A draft of a bill for admissions, under such regulations and formalities as have been found of practical value in other States, and which Section 4, of the act, makes it the duty of Trustees to provide, will be presented early in the session.

Third,—An amendment of that paragraph of Section 2, of the Hospital Bill, June 29th, 1866, which reads :

“And the places of the two senior members, as they stand in the order, shall be annually vacated,”

by the addition of the following words :

“But this clause shall not take effect in the case of the two senior members first appointed, until one year after the completion of the Hospital and its being opened for patients.”

It is a very strong conviction on the part of the Board, that it would be detrimental to the interests of the State, and of the Institution now begun, to dispense with the services of the “two senior members.” The Trustees have spent much time and effort to fit themselves for the work in hand, and any change of the existing harmonious combination, before the building is occupied and yielding practical benefits, cannot but cause delay, as it would require much time for new members to acquaint themselves with the necessary details.

Fourth,—A repeal of those paragraphs of Section 4, which unite the duties of Treasurer and Superintendent, beginning, “He shall be Treasurer,” * * * and ending, “property received by him as Superintendent.”

The Trustees are of opinion that the detailed labors of Treasurer, with care of funds, accounts and vouchers, can best be performed at small expense, by some person not connected

with the Hospital, and who shall reside in the city of Middletown. The separation of the two offices is recommended, and is the practice in other States. It is supposed that Section 3, defining "duties of Trustees," will, after repeal of above paragraphs, be adequate to the appointment of a Treasurer.

Fifth,—To amend Section 3, by the addition of the words, "And they shall have power to receive bequests of property, real or personal, and donations of any description, for the uses of the Hospital."

Your Trustees, in submitting this statement of their doings to your Honorable Body for its sanction, believe they may congratulate the citizens of the State of Connecticut on the promising inception and expected early completion of this benevolent institution.

All of which is respectfully submitted.

MIDDLETOWN, April, 1867.

REPORT OF THE SUPERINTENDENT
TO THE
Board of Trustees of the General Hospital for the Insane,
OF THE
STATE OF CONNECTICUT.

GENTLEMEN :

After receiving in October your appointment as Superintendent, and furnishing the necessary bond, I entered upon the duties of the office, and, as required in the act, "procured the plans of a suitable building" for your proposed Institution.

As Messrs. Sloan and Hutton of Philadelphia, are generally acknowledged to be the architects most experienced in providing plans for Hospitals, I applied to them for the drawings, and spent several days in their office in consultation and explanation of your wants, in which I had the very valuable assistance of one of the oldest Superintendents in the Speciality in the United States. The elevation and plans as worked up, met your unanimous approval.

The whole length of the buildings, when completed, is intended to be seven hundred and sixty-eight (768) feet, with accommodations for at least four hundred and fifty (450) patients.

The central building will be sixty (60) feet in width, by one hundred and twenty (120) feet in depth, four stories in height, and will contain the necessary offices, kitchen, dispensary, patients' reception rooms, apartments for officers and employés, chapel and amusement hall.

There will be, also, six retreating wings, three on each side, of three stories in height; and four return wings, two on each side, of two stories in height.

It is proposed this year to proceed only with the erection of the central building and one wing, with its connecting transept on each side of the center, of one hundred and twenty-four (124) feet each, making a frontage of three hundred and eight (308) feet, with accommodations for at least two hundred (200) patients.

The commencement of the Hospital buildings with the central building and adjoining wings, was determined by motives of economy, as will be evident when it is considered that in the central building are to be placed the rooms for the assistants and personnel of the institution; and of the kitchen and store-rooms, which thus will be permanent, supplying by tram-ways in the cellar, food and necessities to all the wings and stories of the Hospital as they shall be built. If this plan had not been adopted, temporary kitchens and offices would have been required, and, to some extent, double expense and removals made necessary. Time and expense will, by the plan adopted, be largely saved.

All the buildings are to be constructed of Portland Free Stone, laid in broken range work, with hammer dressed stone for corners, water-tables, window-sills and caps.

You are aware of the completion of the dock, and of the giving out of contracts under your direction, for lumber, lime, brick, stone, sand, etc. Of sand, about six hundred tons have

been hauled over the ice; also, about fifteen hundred tons of wall stone. With your sanction, I have employed a foreman, head mason and head carpenter, and we are fully prepared to resume work.

It should be remembered that the five months since my connection with your Board, have included the winter months, and, of course, the most unfavorable of the year for out-door work.

During the month of December we completed a macadamized road, at uniform grade, from the main highway to the building site, and were engaged in making the necessary excavations for cellars, when the cold weather interrupted the work; but the plans are matured and the means for progress in such preparation, that I have no doubt that within a short time very satisfactory advance may be shown.

The varied matters connected with the duties of a Superintendent, especially during the period of the erection of the Hospital, induce me to suggest that the keeping of accounts in detail, with accuracy, and with vouchers as required by the law creating the office of Treasurer of the institution, might advantageously be separated from the complicated duties of oversight of the building.

The important contract for the dam, and for the introduction of the water of Butler's Creek to the immediate premises of the Hospital grounds, has been made with Mr. George H. Norman, and includes almost every possible contingency for its perfect completion; grubbing, mauling, stone work, pipe and pipe connections, with necessary blow-offs, etc.

My report, as Treasurer, audited by your Committee, is herewith enclosed.

The proposed bill for admission of patients, will be prepared to be presented to the General Assembly for its sanction.

It requires time and consultation to have it meet the requirements of the laws of the State.

It is due to the people of Middletown, that I should allude to the deep interest they have constantly manifested in all matters relating to the progress of the Institution.

In closing this imperfect report of a short period, I would express my gratitude to the Board for their uniform confidence, and encouragement in the important trust committed to my charge.

Respectfully submitted,

ABM. MARVIN SHEW, *Superintendent.*

MIDDLETOWN, CONN., April 1st, 1867.

REPORT.

To the General Assembly of the State of Connecticut:

The Board of Trustees of the General Hospital for the Insane of this State, beg leave respectfully to report:—that since their first Report to your Honorable Body the highly important work committed to their charge, of erecting and preparing a suitable Hospital for the Insane of this State, has been steadily and zealously pursued.

On the 20th of June last, the corner stone of the Hospital was laid with impressive and appropriate ceremonies, by Governor English, in the presence of the State Officers, members of the Legislature, and a large concourse of deeply interested spectators. Addresses were made by Governor English, Ex-Governor Hawley, Dr. Pliny Earle, of Northampton, Mass., Rev. Dr. Cummings, of Wesleyan University, and Prof. Thacher, of Yale College; and it is believed that not one of that vast assemblage went away dissatisfied with the noble purpose and policy of the State, then and there set forth and proclaimed.

The work has since been vigorously pushed on. 'The carpenters' shop, laundry, bake-house, kitchen, and boiler-house are completed. The air shaft, so indispensable a portion of the edifice, is finished; and the ventilating flues duly arranged. The south wing and return wing are fully completed and ready for occupancy on the first of May. The main or center building is in an advanced state of forwardness, is roofed and pointed and will soon be finished. Water, of which the supply is ample, of excellent quality and believed to be unfailing, has been

brought more than a mile and introduced throughout the building. By an arrangement with the Middletown Gas Company, mains have been laid from the city, and the pipes carried through the building. An engine and boiler, steam heating apparatus and a patent washing-machine have been put in. The bedsteads, bedding and other furniture, sufficient for a hundred patients, have been provided, and we are now ready to receive that number of male patients. The foundation and basement story of the north wing and return wing were also laid last Fall and are waiting for the superstructure.

The buildings are of Portland stone, "laid in broken range work, with hammer-dressed stone for corners, water-tables, window-sills and eaps." They are roofed with slate and finished, without and within, in a style which, though severely plain and simple, is yet not devoid of taste and beauty; and the Board of Trustees believe that the Hospital will be regarded as a model of strength, durability, and perfect adaptation to its objects.

The work has been done thoroughly, and yet as economically as possible under the circumstances, and when finished, the edifice will be one of which the State of Connecticut may be justly proud. The early and unusual severity of the past season unavoidably interrupted the work and occasioned great delay, difficulty, and increased expense in its progress; but the Board are satisfied that all those employed upon it, whether as superintendents or operatives, have been faithful in the discharge of their duties, and have, moreover, been animated by a proper and zealous spirit. Dr. A. M. Shew, the Medical Superintendent, to whom, by the Act creating the Hospital, was committed the duty of procuring the plan of a suitable building or buildings, "and of personally superintending its erection and arrangement," has very faithfully and efficiently discharged his duties, has been untiring in his zeal and energy, and has personally supervised every part of the buildings and their appointments.

The General Assembly, at its last session, promptly voted a liberal sum for the completion of the buildings. The appropriation, from various causes, has proved to be insufficient, and the Board are therefore compelled to apply to the Assembly

for such additional appropriation as will enable them to go on and finish their work. No more noble, no more necessary charity can be brought before the State; and if Connecticut would not be immeasurably behind her sister states in provision for the insane, a prompt and unhesitating response will be made to this application.

It will not be improper, nor out of place, in a Report of this kind, to cite the opinions of persons who have devoted much time and attention to these matters, and are fully conversant with the requirements of such institutions.

Dr. Kirkbride, the accomplished Superintendent of the Pennsylvania Hospital for the Insane, and President of the Association of Superintendents, thus remarks:

“Every one concerned in providing accommodations for the insane, may rely upon the fact being established by all experience, that the best kind of Hospitals, not only best built, but with the most perfect arrangements and fixtures of every kind, and managed in the most liberal and enlightened manner, are sure to be the most economical in the end, (for true economy consists not only in avoiding all waste and extravagance, but also in doing thoroughly whatever is undertaken,) will fulfill most completely the objects for which they are erected, and ultimately give most satisfaction to every enlightened community.” Again, in another place, he remarks, “The difference in cost between a Hospital that is well-built, and one that is badly, between one that is complete in all its arrangements and one that is imperfect; between one liberally and one meanly managed, is really so small, that, if the good citizens of any State would make the simple calculation how much of this extra expense would fall upon each one of them, it can scarcely be credited that a single individual could be found anywhere, who would be willing to admit that he would not cheerfully bear his proportion of it, even if it had never occurred to him that, at some period or other, he might himself be compelled personally to test the character of the provision for the insane, made by his State.”

Again, we quote from the “First Biennial Report of the Trustees for the Iowa Hospital for the Insane,” made in 1861:

“The cost of hospital buildings for the insane cannot, with propriety, be estimated by the cubic foot, and placed in comparison with other public buildings, because the peculiar uses for which they are erected, require a peculiar and expensive construction and fixtures, which other State edifices do not require. Insane people must have ample room, and provisions for restoring health, and for the personal comfort and the security of each individual. Safety from the calamities of destruction by fire, and from the escape of inmates, is essential; but these safeguards cost many thousands of dollars in construction. The single extra item of window-guards has cost this Institution more than \$4,000.

“The best sanitary arrangements in any case do not admit of crowded apartments, but the space required by the insane is more than double that usually allotted to the sick with other than mental diseases. About *eighty* per cent. of the insane require each a distinct and well ventilated apartment to sleep in, separated from others by walls of masonry.

“From an examination of the cost of modernly constructed first-class hospitals for the insane in the United States, (and it must be noticed that this Report was made in 1861, before the war and its results had stimulated and enhanced the cost of everything,) we find them to be not less than \$1000 for each patient properly provided for, while the proportionate cost of some of them considerably exceeds this sum. Thus, the new Government Hospital for the Insane, near Washington, which is built of brick and will accommodate 300, or possibly 350 patients, has cost \$473,040. The new Hospital for the Insane, near Cincinnati, also built of brick, has cost more than \$1000 for each patient provided for; and the same may be said of the two new Hospitals in Northern and Southern Ohio, at Newburg and Dayton.”

But again, we make a quotation from a memorial of Miss Dix to the Legislature of New Jersey in 1845: “It is said that the establishment of Hospitals involves expense, that it is much cheaper to maintain the insane elsewhere. Is it also computed at what actual cost these are supported in the State Penitentiary, in county jails, in poor-houses, and in families? What sums are consumed by their uncontrolled habits of destructive-

ness ; what are lost by their crimes, when under frenzied impulses they fire buildings, take human life, and make wreck of all social and domestic peace and happiness? What sums are uselessly expended in conducting the trials of insane criminals? What cost of supporting the large class of incurables, who, if timely treated, would have been restored to society and usefulness—to health and enjoyment?”

Lastly, we quote from a Report presented to the Fourth Annual Meeting of the Rhode Island Hospital, which thus concludes :

“ It is objected by some, that Hospitals are expensive—of this we are fully aware ; but are not streets and bridges very expensive? Are not our private residences, our churches, and other edifices very expensive? The practical question is not whether a hospital costs a large sum of money, but *whether it is worth what it costs*, whether the money is judiciously expended ; no great institutions, dispensing their blessings from generation to generation, can be established without costing money. But what nobler use for money than to establish them? How trifling, and ignoble, and evanescent, are the objects of many of our expenditures, compared with the founding of a great institution for the relief of the suffering, for the healing of the sick, and for the exemplification of a true Christian benevolence for centuries to come?”

These remarks, so truly and appropriately made in reference to a “ General Hospital,” come with three-fold force when applied to a Hospital for the Insane.

The Board of Trustees has held regular monthly meetings during the year, and various members have besides, from time to time, visited the institution, inspected the work, and satisfied themselves that everything was going on well.

In accordance with the requirements of the Act creating the Hospital, the Board elected three additional Trustees from Middletown, viz., Hon. Benjamin Douglas, Hon. Julius Hotchkiss, and Rev. Dr. Joseph Cummings ; and these gentlemen have zealously and effectively coöperated with the old Board, and participated in its doings and deliberations, thereby evincing the wisdom of the Legislature in providing for such addition.

In accordance, also, with the Amendment to the Act, passed at the last session of the Assembly, which separated the office of Treasurer from that of Superintendent, the Board elected M. B. Copeland, Esq. (Cashier of Middletown National Bank) to the office of Treasurer, which office that gentleman has since filled to the acceptance of the Board.

At the February meeting of the Board, held at the residence of the Hon. H. Sidney Hayden, of Windsor, (at that time disabled by a painful accident,) Dr. Winthrop B. Hallock was appointed Assistant Physician, and his wife, Mrs. Mary Hallock, Matron; and Charles W. Galpin, of Middletown, who had, from the inception of the undertaking, efficiently and satisfactorily discharged the duties of clerk to the Superintendent, was appointed Steward.

The Board also appointed a committee to prepare a code of By-laws and Regulations, and to fix the terms and conditions upon which patients should be admitted. This committee has discharged the duties assigned to it, and has drawn up and caused to be printed a series of rules and regulations, which have been approved by the Board, and are ready for the examination of the Legislature.

At one of the more recent meetings of the Board, a committee was appointed to ascertain the number of insane persons in the State, and circulars were sent to the selectmen and physicians of every town in the State, with blank returns to be filled up, giving the number, sex, age, and condition of all insane persons in the State, how and by whom supported, &c.

By a report submitted to the Legislature in 1865, it appears that there are about seven hundred insane persons in the State, though it is believed that this is considerably below the actual number. Partial returns from the selectmen and other sources, give five hundred and eighty-four as the present number of insane persons in the State, but this is evidently an incorrect computation, and much below the fact.

To show how difficult it is to get accurate returns of this sort, we refer to a statement of Dr. Edward Jarvis, of Dorchester, Mass., who, when Commissioner of Lunacy for that State, finding that no reliance could be placed upon the returns

furnished by the national and State census, sent letters to every physician in the State, with blanks for them to fill and return. The result was, that while the national census of 1850 reported 1680 insane persons, and the State census of 1855 returned 1,909, the commissioner's record of 1854 actually gave the names of 2,632; and upon close and careful examination of these by himself, and afterward by the Legislature, only one name was found to be duplicated.

But to return to our State reports. By reference to these, and to communications received from reliable private sources of information, it is found that there are many cases of insanity in the State, the mere recital of which would melt a heart of stone. Some have been confined in out-houses for twenty or thirty years, or more; others kept in private families and chained by a leg to the floor; others still subjected to the most cruel and inhuman systems of restraint, receiving no medical attendance, and with no prospect of change or improvement. Now, the fact that such things are true in this nineteenth century, and in so advanced, enlightened, and wealthy a State as Connecticut, shows very clearly and forcibly the need of such an institution as that of which we have the honor and privilege to be in charge; and we can truly affirm that Connecticut has not been a day too soon in making the munificent provision which she has begun, and will doubtless continue to make for the care and protection and restoration of this preëminently unfortunate class of her children. Ordinary sickness of any kind, especially when combined with poverty, is grievous to be borne; but who can estimate or properly depict the horrors of a malady which abolishes reason and judgment, which destroys the mind as well as the body, and consigns an immortal soul to the untold miseries of insanity! The Almighty only knows the depth and amount of such a condition of suffering, and He will demand from those of us who are more favored, a strict account of the treatment which such unfortunates receive at our hands.

From what has now been said, it will be seen that the care of the insane, and more especially the insane poor, is not a mere question of dollars and cents, but of sound policy, true economy, a wise humanity, philanthropy, and religion. Such

is the view which the members of this Board take of their trust, and such, we believe, is the view that will be taken of it by your Honorable Body.

The cost of the buildings may to some appear large, but we can conscientiously affirm that not a single dollar has been wasted or misapplied. The State of Connecticut is wealthy and liberal, and this Board, as the almoners of her bounty, did not dare to erect a mean, niggardly, inappropriate structure, when such grave and important interests were involved. They were not limited by public enactment to any specific amount, and they were perfectly aware that the educated and enlightened public sentiment of the State would not sanction, nor allow of, any miserly and illiberal construction of the Act which created this much-needed Institution. They have therefore gone forward, and actuated by prudence and economy, as well as a desire to carry out what they believed to be the intent of the people of the State, have partially erected an edifice, which is designed not only for to-day, but for future years, and which they are satisfied will fully meet the wishes and expectations of the State.

The funds, so liberally appropriated by the last Legislature, are now exhausted, and to complete the center building and north wing, and meet outstanding obligations, a further appropriation of \$162,384 will be required. The Board do not entertain a doubt that this sum, and more still, if requisite, will unhesitatingly be voted by this Assembly. Indeed, the members of the Board have become individually and jointly liable for the sum of \$30,000, in the shape of a loan from the banks, because they saw last autumn that if funds were not at once provided, the work must come to a stop, to the very great detriment of the public interest, and to the occasioning of injurious delay as regarded the class of unfortunates for whom the institution was designed. There is, in addition, a debt of \$41,614 for materials, fixtures, furniture, labor, &c., to be provided for from the next appropriation. We said "injurious delay," for every day that defers the reception and treatment of these patients, increases the difficulty, and diminishes the probability of their restoration to health and sanity.

It is unnecessary at this day to go over the whole ground

of argument in favor of the early treatment of the insane, whom it is well known cannot be successfully treated at home; and we will mention here another fact—to which we may again recur—that from eighty to ninety per cent. of recent cases are curable. We shall, however, adduce the opinions of those who have had large experience in the care of this class of patients.

We make, in the first place, a brief extract from the report of the Superintendent of the Iowa State Hospital, bearing upon this point; and his statements are equally applicable to our own State:

“For several years prior to the opening of this Hospital,” he says, “the insane of this State had been necessarily confined in jails with criminals, and in county infirmaries (poor-houses) in gradually increasing numbers, until there existed the most painful necessity for other and more appropriate accommodations for them. During the last ten years, a few of the insane of the State had obtained places in the institutions of other States, at an inconvenient expense; private families have been burthened, and their safety put in peril by others; and upon some the grave has prematurely, though kindly, closed. But the majority have, for no crime, been compelled to occupy, more or less, the felon’s cell. Relief, though tardy, came at last, and so great was the desire of citizens to obtain admission for their afflicted friends, that, during the first twelve weeks, more than one hundred patients were admitted. It is painful to add, that, so long had these poor sufferers been confined under adverse sanitary circumstances, not one in ten of all this number will ever recover the right use of reason; whereas, eighty or ninety of them, under the best treatment, early applied, would certainly have been cured. These are facts which should arrest the attention of every citizen. They show most clearly the importance of the earliest possible application of restorative treatment. Insanity is only curable, as a rule, before the delicate textures of the brain have suffered injury from chronic disease. For the curative treatment of mental diseases, a month during their incipient stages is worth more than a whole year in their advanced stages. Indeed, no subsequent period, however protracted, can compensate for the loss of the

golden early period in which to treat successfully diseases of the mind."

In the memorial of Miss Dix, before referred to, we find tables showing the relative expense of supporting old and recent cases of insanity, and we quote a few of the figures:—

From Dr. Awl's Report of the Ohio State Institution, for the year 1840, it appears that the

Average cost of supporting old cases was	.	.	\$1,903.60
“ “ “ new “ “	.	.	56.00
Report of 1841, average cost of old cases was	.		1,969.00
“ “ “ new “ “	.		52.22
Report of 1842, “ old “ “	.		2,020.00
“ “ “ recent “ “	.		45.20
Report of 1843, average cost of old cases was	.		2,239.10
“ “ “ new “ “	.		65.41
In Massachusetts for 1843, old “ “	.		2,166.20
“ “ “ new “ “	.		58.45
In Maine for 1842, “ old “ “	.		2,108.33
“ “ “ new “ “	.		35.50
In Virginia (Staunton) “ old “ “	.		2,081.65
“ “ “ new “ “	.		63.25

Of course this very great difference in cost is owing to the fact that the recent cases are soon cured and discharged, while the old or chronic are kept on indefinitely, but it is no less a strong and irrefutable argument in favor of the early treatment of cases of insanity.

Every consideration, then, of humanity, of economy, of sound policy, goes to sustain and enforce the appeal we now make to the State, for prompt and liberal assistance in completing the work entrusted to us. It is superfluous to say that the members of this Board have no other or further interest in this matter than that shared, or which should be shared, by every citizen of the State; but the very important trust having been imposed upon us, without any seeking or solicitation on our part, we feel a greater responsibility on account of our official connection with the institution, and are therefore desirous that the work shall be pushed on as speedily and vigorously as possible.

We might, to be sure, have provided at less cost, a flimsy, unsubstantial, and inappropriate building, but we did not, and do not believe this to be the wish and intention of the people of Connecticut. We have therefore endeavored faithfully and conscientiously to discharge the trust imposed upon us ; to promote the best interests of the State, and of that very interesting and deeply afflicted class of her children for whom this Hospital is intended.

Many urgent calls for the accommodation of patients have already been received from different parts of the State. The officers of the Retreat at Hartford have notified the various towns having *male* patients under their care, that they must remove them by the first of May, as it has been determined to expend \$100,000 in altering and improving that excellent and well managed institution. Some, even, of private patients, a class for which that Hospital was, and is designed, must be removed, to allow of the contemplated improvements.

These and other facts have convinced the Board that great distress and perplexity will result, should the completion of the State Hospital be delayed, and that they will be fully justified in carrying forward the work intrusted to them.

It now rests with your Honorable Body to say whether the work shall go on and be completed in a manner befitting so wealthy, enlightened and benevolent a State, and we do not doubt that the wisdom and sound policy of this Assembly will be evinced by directing the Board of Trustees to go forward with their noble and important work, so that all those who are entitled to claim, may, as speedily as possible, receive its benefits.

We append, for the information of such members of the Legislature as may not be familiar with the facts, a brief summary of what other States have done and are doing in behalf of their insane, and trust that Connecticut will not long be behind the record.

We make an extract from the Fourth Annual Report of the Directors and Superintendent of the West Virginia Hospital for the Insane, for 1867.

“ *Massachusetts*, with five large Hospitals within her borders,

is providing a sixth ;” and has several municipal and private establishments.

New York, with five large public, and some excellent private Hospitals, has just resolved to erect two more that will cost nearly, if not quite, a million of dollars. *New Jersey*, small, but brave in duty, with one of the best Hospitals in the world, has just resolved to provide for all their insane, and is enlarging at an expected cost of two or three hundred thousand dollars. *Pennsylvania*, with five Hospitals of large size and some smaller ones, is enlarging its Western Hospital, and canvassing for another, in some unprovided section of the State. *Maryland*, with two excellent Hospitals, is now building two more, that when finished, will cost together over half a million of dollars,—one of them being from private munificence entirely ; (and the State has recently voted an appropriation for the enlargement of one of the older.)

Ohio, with five excellent Hospitals, (one devoted to the colored insane,) has just resolved to enlarge two of them to more than double their present capacity, and also to erect a sixth, equal to any of the others, the cost of all which is estimated at from one-half to three-fourths of a million of dollars.

Kentucky has two, and means “ to provide for every insane person within her limits.”

Iowa, Indiana, Maine, Vermont, New Hampshire, Alabama, Virginia, and almost all the other States, have at least one ; and even little Rhode Island, besides a large Hospital for the Insane, has recently built a General Hospital at Providence, which, up to September 30th, 1867, had already cost about \$338,000, and will, when completed, reach the sum of \$500,000. Very recently, moreover, this noble little State has taken preliminary steps for building another Hospital for the Insane. Will Connecticut be behind her sister States in making ample provision for all her insane poor? We will not believe it. The supposition is a reproach to her fair fame and honor.

We cannot better or more appropriately conclude this Report, than by making a few quotations from the addresses of Gov. English and Ex.-Gov. Hawley, on the occasion of laying the corner-stone of the Hospital.

“It is true,” remarked Governor English, “that we have a large State debt, and besides that, a large national debt to carry, but there are few citizens of Connecticut who would wish the State to refuse to do her duty to the suffering and unfortunate class for whom this Hospital is building.

“This is the founding of one of the noblest charities to which humanity can be devoted. It promises to reward all our care, all our expenditure, all our hopes, with a rich harvest of benefits. In the coming years, its blessings will flow as broadly and deeply, and at the same time as beneficially, as the waters of yonder river, in a never-ending stream.

“Large as some may consider the last appropriation, it is small when compared with the magnitude of the evil to be met, and the demands of this class of unfortunates upon our charity, and especially when compared with the population of the State. In Connecticut, there are upwards of half a million of people. This appropriation will only add an average of 30 cents to the list of each tax-payer, and what a work of good is by this small expenditure accomplished! No one who shall see this Institution in practical operation, and note the patients who shall be cured or benefitted here—patients suffering from the direst curse that can fall upon poor humanity—will ever regret the small proportionate share he pays to aid this noble work.

“I rely upon the willingness of the State to carry out the philanthropic enterprise she has begun. This enterprise, with others of a similar character, is due, in a great measure, to the intelligence of our people. Our system of common schools, so generously sustained from the earliest period of our history, has contributed largely to the beneficence of this great charity. A philanthropy, dictated by intelligence, can hardly fail of beneficial results.”

“The history of such efforts as this,” said Governor Hawley, “is frequently marked by hesitating grants of money through a long series of years, amounting to double or treble the sums that private enterprise would expend in producing similar results, and by favoritism in contracts and appointments, useless display, general extravagance, and even fraud.

“More cannot be asked than that this Institution shall be as free in the future, as it has been in the past, from such misfortunes, errors, and crimes.”

He then referred to the “wise, prompt, and large-minded action of the General Assembly,” and noting the fact that of the seven hundred or more insane patients in the State, of whom only a small portion could be accommodated in the Hartford Retreat, goes on to add, “And there are more than two hundred in the almshouses of the towns, where it is altogether impossible that they can be treated as common humanity and the honor of the State require.” “The moneys expended by the commonwealth and the municipal corporations in these various unsystematic and unsatisfactory ways are probably sufficient, when concentrated upon this institution, to take proper care of these unfortunate brothers and sisters. But the General Assembly made no attempt to avoid its responsibilities. It made no nice calculations of profit and loss in dollars and cents, though it would be easy to show that *that State makes most money, which best cares for the destitute and suffering.*”

No words of ours can augment the force, or heighten the effect of the stirring and impressive language of these quotations; and with this we are content to submit the whole matter to the wisdom and intelligence of your Honorable Body.

We append the Superintendent's Report for the past year, with his estimates for completing the center building and north wing; also a letter from Mr. Hutton, the architect of the Hospital, in regard to the estimates. The statement which this gentleman makes should have great weight, as the firm to which he belongs has had an extensive experience in buildings of this character, and has designed and superintended the erection of most of the more recent hospitals in the United States.

These estimates amount to \$75,770, which, added to the debt already due of \$41,614, and the sum borrowed by the Trustees, \$30,000, and the further sum needed for furniture, \$15,000, makes the total amount required \$162,384.

Besides this, there are barns and fences to be built, grounds to be graded and laid out, stores and stock to be purchased,

and many other things to be done, for which no precise or definite estimates can be made. For these we need, and most respectfully ask, an additional appropriation.

That the work may not stop, and the valuable time that must elapse before the meeting of the Legislature, may not be lost, the Board of Trustees, at their annual meeting, held April 8th, 1868, again voted unanimously to obligate themselves individually for the purpose of obtaining funds to meet the necessary payments and expenditures.

MR. HUTTON'S LETTER.

PHILADELPHIA, March 13, 1868.

To the Board of Trustees,

General Hospital for Insane, Conn.

GENTLEMEN:—At the request of Dr. Shew, I have examined his estimates for the completion of the North Wing and Center Building of the new structure at Middletown, and having carefully compared them with the expenditure involved in the work already done, am ready to vouch that they are sufficient to put the same in working order. His exhibit denotes specifically what is contemplated, and with the same energetic and careful management that has characterized last year's operation, the figures therein named are liberal enough to *do well* all that is proposed to be done.

I cannot let this opportunity pass without the statement, that, in all my observation, I have never seen a building more *thoroughly well built*, nor, in view of this fact, with greater economy. Hoping that your efforts to complete the whole will meet with entire success in every respect,

I am truly yours,

ADDISON HUTTON, *Architect.*

From the West Virginia Hospital report, before referred to, we copy a tabular statement of several Hospitals for the Insane, with cost of building, &c., remarking only, that all these were built before the late war, and consequent advent of high

planned, and have been constructed and provided with that ulterior view, so that as a matter of fact, the edifice, thus far, has been built very economically under all the circumstances, and at considerably less than the average arrived at by the above table.

All which is respectfully submitted.

MIDDLETOWN, April, 1868.

REPORT

OF THE

SUPERINTENDENT TO THE BOARD OF TRUSTEES

OF THE

GENERAL HOSPITAL FOR THE INSANE,

OF THE STATE OF CONNECTICUT.

GENTLEMEN :—In compliance with instructions received from the Board at its last meeting in March, 1867, “to resume work whenever the season should permit,” excavations were begun on the first day of April by such force of workmen as could be advantageously employed.

SEWERAGE.

Your attention was early directed to the importance of having ample provision made to carry off the surface water during the construction of the building. By your direction, therefore, an eighteen-inch cement pipe was successfully laid, during the month of April, from the center building directly east, a distance of one thousand feet, with a descent three-sixteenths of an inch to the foot. This drain pipe is abundantly adequate to carry off the waste water from the laundry and kitchen, and the bath and wash rooms of the whole building.

CARPENTER SHOP.

At the same time masons were engaged in carrying up the walls of a permanent two-story stone building, twenty-seven feet in width by fifty-two feet in length, to be used as a car-

penter and work shop. The first story of this building has a work bench extending the entire length of one side, one circular saw and one scroll saw, and a large grindstone. In the second story are placed three benches with sufficient room for twelve carpenters. The attic, with mansard roof, makes a most convenient paint and glazing shop.

The motive power driving the machinery alluded to is, water from our dam (described below) in the use of a six inch turbine wheel, manufactured by and presented to the Institution by Mr. Dwight Cushman of Hartford; and it gives me pleasure to mention it, that this wheel, with a power adequate to all the mechanical appliances of the shop, has been eminently successful in its workings, and entirely without repair to this date.

The importance of the early erection of the above shop-building was manifest, as in it would be prepared all the wood-work throughout the entire Hospital edifice. It is a permanent, good structure, and will supply to convalescent patients the means of light employment to their great advantage, and therefore to the profit of the Institution.

DAM AND RESERVOIR.

Early in April, 1867, Mr. George H. Norman, with whom a contract had been made for a dam and appurtenances, and for the providing and laying of necessary pipe to convey water to the building, commenced and prosecuted the work with vigor. Six thousand five hundred feet of six inch cast iron pipe were laid in accordance with the minute specifications of the contract before the fifth day of May, thus providing a supply of water for mechanical and other purposes during the entire season. . . .

The turbine wheel has been in constant use, and at all times more water has passed around the waste canal from the reservoir, than was used on the grounds.

EXCAVATIONS.

Simultaneously with the prosecution of the work heretofore mentioned, laborers were employed in excavating for the foundations of the main buildings.

In order to render this portion of the report intelligible to those not acquainted with the practical details of a work of the magnitude of your Hospital, I would state that in excavating for foundations and cellars, about twelve thousand cubic yards of earth were removed a distance of several hundred feet. The soil, consisting principally of "hard pan" and gravel, formed at all points an unyielding foundation for the heavy walls of the superstructure.

By employing an adequate force of masons, and by working over hours for a few days, the cellar walls, two feet eight inches in thickness, and seven feet six inches in height, were completed previous to the ceremony of laying the corner-stone on the twentieth of June.

UNAVOIDABLE DELAYS.

During the months of July, August and September, much embarrassment and delay occurred in consequence of the unusual number of wet days.

To those having the grave responsibility of the building operations, the constantly recurring rains and showers were a source of care and great anxieties. Incessant forethought was required to prevent damage to the walls and loss of material from the washing of mortar-beds during the continuance of sudden storms.

It also became necessary to erect temporary sheds under which the masons and stone-cutters could work without interruption.

To those who are not practical builders these hindrances of weather may not seem as important as they really are; but when it is considered that nearly two hundred men were employed, and that each man would lose from five to ten minutes in changing from scaffold to sheds, it must be evident that the aggregate of time lost amounted to a large total.

BUILDINGS ENCLOSED.

Notwithstanding the above embarrassments and delays, we succeeded in enclosing the center building, intermediate and south return wing, the laundry and the boiler-house, during the season.

DESCRIPTION OF THE CENTER BUILDING.

The dimensions of the center building are sixty feet in width, one hundred and twenty feet in depth, and four stories in height. The walls are constructed of Portland freestone, laid in broken range work, two feet four inches in thickness, with tool dressed quoins, windowsills and caps, water-table, belting course and cornice, surmounted by a "French roof" of slate and tin.

Inside the stone wall there is a four inch brick lining, leaving an air space of two inches between it and the stone, thereby insuring dryness.

DESCRIPTION OF SOUTHERN WING.

The southern wing is forty feet in width, one hundred and twenty-four feet in length, and three stories in height, with an "L" or return wing, which also is forty feet in width, one hundred and eight feet in depth, and four stories in height. The walls are one foot eight inches in thickness, and have a brick lining similar to that described in the center building. The corridor and partition walls, thirteen inches in thickness, are made of brick with an air space of five inches in the center, in which are carried up all the hot air and ventilating flues, than which mode none can be more safe from the danger of fire. These ventilating flues are supplied by air forced through a passage (seven feet in height by twelve feet in width) running under ground from rear of boiler-house into the cellar of center building.

The interior part of the building is plain but substantial; the wood work being of Georgia yellow pine, oiled and varnished.

The floors are laid with three and four inch matched stuff, with coarse counter floors beneath.

The first story will be used as a ward for excited patients. The rooms on each side of the corridor are filled with inside window shutters hinged and locked. Four of these strong rooms are supplied with iron closet-bowls, and a separate hot air flue for each.

The large triple windows are protected in this story by screen partitions of wood and iron pipe, as suggested and adopted by Dr. Nichols, Superintendent of the Government Hospital for the Insane at Washington, D. C., and in the second story by painted iron wire screens.

The southern wing is adapted to one hundred patients divided into four classes. The wards consist of a corridor twelve feet in width and height, and are one hundred and twenty-four feet in length, with a space on each side adjoining the center building for light and air, and a large triple-window at the south end.

The "L" hall in the south return wing is ten feet in width, and at right angles with the corridor, and will form the connecting hall with the extension south when it shall be erected.

Each ward contains one dining-room, one day or reading-room, two "associate dormitories," for four and six patients, two dumb-waiters, one dust-flue, one front and one rear hall and stair-ways, two rooms for sick patients shut off by a passage-way from the main corridor, eleven single rooms, one clothes-room, and one large room for attendants.

In each hall there is a water-closet and wash-room adjoining the bath-room. The water-closet bowls are enameled cast iron, funnel shape, and flushed with water whenever the door is opened, by a spring attachment. The waste-pipe from the closet and "slop-hopper," leads to the main soil-pipe, and this having a connection with the tall chimney of the boiler-house, as hereafter described, completes the system of "downward ventilation."

In the wards already completed there are four cast iron bathtubs, of the approved pattern of Messrs. Morris, Tasker & Co.,

of Philadelphia. The supply of hot and cold water and the waste, pass through one opening in the bottom.

In a vertical flue from basement to upper stories, opening by a door in each bath-room, is a "pipe-closet" connecting the supply of hot and cold water with each bath-tub, and accessible only to the attendant. In each pipe-closet is a fire plug with a length of hose permanently attached; and adjoining this, a steam drying-room, containing coils of iron pipe placed under a rack upon which damp clothing, bedding or wash-rags can be dried.

LAUNDRY.

Referring to the plan accompanying your Report, it will be observed that the laundry-building, located sixty feet in the rear, is connected by an underground passage with the center building, in which passage a tram-way will be placed for conveniently conveying clothing and bedding to and from the wards.

The first story of the laundry-building is divided into three large rooms; one, forty feet in length by twenty feet in width, will be used as the bakery; a room opposite, of same size, as an ironing and folding room. The washing will be done in the rear room, fifty feet in length by twenty feet in width, and will contain Hydraulic Washers, of Smith's patent, made by the New York Laundry Manufacturing Company, 18 Dey street, New York, with stationary tubs and steam heated drying-closet. The second story is divided into a large sewing-room, (connected with the ironing-room below by a "dumb waiter,") one linen or store-room, and six sleeping-rooms for female employees.

BOILER-HOUSE, HEATING APPARATUS AND CHIMNEY.

For the complete protection and preservation of the Hospital building from danger arising from the fires used in generating steam for heating purposes, a two-story stone building, sixty feet in length by twenty feet in width, has been erected one hundred and fifty feet in the rear of the Hospital, for the boilers and various fixtures necessary to a steam-heating apparatus. The first story contains the boiler-room on the north end, and a fitting shop on the south end. The second story

contains four rooms for male employes, and one large store-room over the boilers. From the center of this building arises a brick chimney eighty-four feet in height, built in the most substantial manner, six feet internal diameter, surmounted by a cast iron cap. Two large flues from the main sewer open into the smoke stack, perfecting the system of "downward ventilation."

STEAM HEATING.

The steam used during the winter for warming the Hospital has been generated in a tubular boiler, sixteen feet in length by four feet in diameter, and conducted through a five-inch wrought iron pipe covered with felting, to the cast iron radiators, (Gold's patent,) placed in the cellar corridor or air-duct of the Hospital building.

By the use of this (Gold's patent) apparatus, put up in stacks of from eight to twelve radiators in each box, about sixteen feet apart, the apartments are severally heated in stories, one above another.

It will be necessary to have two additional boilers of similar dimensions to supply heat during the next winter. It is supposed that three boilers will be adequate for the purpose when the north wing is occupied.

The heating and ventilation are to be effected by the forcing of a constant current of pure air over the radiators, through which the steam circulates, and which, after condensation, is carried back in a warm state, to resupply the boiler.

The forcing power is the fan, twelve feet in diameter, placed in the rear of boiler-house, as before mentioned, and kept revolving by water; and a most necessary and important auxiliary to our ventilating system in summer and winter, so needful in the rooms of insane patients.

GAS.

During the month of November your committee made arrangements with the Middletown Gas Light Company for the laying of a main pipe, from their works to the Hospital, at the very moderate cost of one thousand dollars. In a large Institution of this character a very important advantage of illumi-

nating by gas over other modes is the security against fire, and also economy and cleauliness would equally recommend it.

RECAPITULATION.

From the preceding statement of work done it will be seen that the past year has been one of constant and unremitting toil to those having charge of the building operations.

Only twelve months have been consumed in erecting and finishing a series of buildings, which have required in their construction—

Of stone, Four thousand perch (twenty-five cubic feet to the perch.)

Of brick, One million five hundred thousand.

Of lime, One thousand seven hundred casks, or two hundred and seventy-five tons.

Of S. Y. Pine, Five hundred thousand feet.

Of White Pine, Seventy thousand feet.

Of Spruce, Eighty thousand feet.

Of Hemlock, Fifteen thousand feet.

Of Nails, Ninety kegs, or four and one-half tons.

Of Roofing Slate, Twenty-five thousand square feet.

Of Iron Pipe, Fifteen thousand feet, or about three miles.

Of labor of men, Thirty-two thousand one hundred and sixty seven days.

Of labor of horses, Two thousand five hundred and twenty-three days.

To arrange for the need, to contract for, prepare and judiciously use in one year the amouut of material here tabulated, has required the undivided time and attention of those holding positions of trust under the direction of your Board. In this connection I cannot refrain from alludiug to the fidelity of those whom you have associated with me in this great work.

To Messrs. Hosc, Hubbard and Galpin is due an acknowledgment of the valuable services which they have respectively rendered.

By your consent and authority, contracts were at various times made with the following named parties:—

Reservoir, dam and connection pipes with building, one and a quarter miles: Geo. H. Norman, Newport, R. I.

- Georgia Yellow Pine: New Haven Steam Saw Mill Co.,
New Haven, Ct.
- Stone, wall and dimensions: Middlesex Quarry Co., Brainard
and Co., and Shaler and Hall, Portland, Ct.
- Lime, cement, nails, and glass: Hubbard Brothers, Middle-
town, Ct.
- Brick: Eugene Strickland, Middletown, Ct.
- Iron Sash: H. A. Converse & Co., Hartford, Ct.
- Wood Sash: R. Joslyn, South Manchester, Ct.
- Roof Bolts: Plants' Manufacturing Co., Plantsville, Ct.
- Roofing Slate: Cook, Overfield & Snedeker, New York.
- Tin Roof: B. C. Bacon, Middletown, Ct.
- Turbine Wheel: Dwight Cushman, Hartford, Ct.
- Steam Boiler and Pump: Pitkin, Brother & Co., Hartford, Ct.
- Steam Radiators: H. B. Smith & Co., Westfield, Mass.
- Steam and Gas Pipe: H. P. Blair, Hartford, Ct.
- Bath Tubs and Closet Bowls: Morris, Tasker & Co., Phila-
delphia.
- Wrought Iron Window Guards: Bancroft & Co., Philadelphia.
- Coal: White and Loveland, Middletown, Ct.
- Doors and Bedsteads: Hubbard and Burrows, Middletown,
Ct.
- Registers: Tuttle and Bailey Manufacturing Co., Boston,
Mass.
- Locks and Knobs: Mallory, Wheeler & Co., New Haven, Ct.
- Gas Fixtures: Tucker Manufacturing Co., Boston, Mass.

There is now on hand, with which to operate this season, of cut stone about one-third of the amount required, and of yellow pine for joists, &c., nearly enough to complete the northern wing.

The estimates of last year, which, being unexpectedly called for, were prepared in one night without the assistance of the architect, have failed to meet the requirements of your building, owing mainly to the large item of labor. While the Act creating the office of Superintendent makes it the duty of that officer to procure the plan and personally superintend the erection of the Hospital building, (which you are aware I have done to the extent of my ability,) it could not have intended

that I should be wholly responsible for the correctness of all the estimates of the details of the building, a matter out of the range of the usual duties of a Physician. The estimates offered with so short a time for mature preparation in June last, were known by all those who had the matter more immediately under their notice, to have been prepared under pressure; yet they were believed fully by me to be adequate for the purposes proposed, except so far as a few items, not very materially affecting the total, were reduced by those of the Trustees who saw the draft. I had no expectation of the estimates being printed and relied upon as absolutely adequate, and as if they were the conclusions of experienced builders. I now see that it was a grave mistake not to have taken several days and submitted our whole calculations, and value of materials on hand, to your architect for an authorized opinion.

By your direction payments have been made as far as the funds would permit. All the outstanding liabilities on account of building operations, amount to forty-one thousand six hundred dollars (\$41,600,) as per tabulated statement rendered.

To complete the center building and northern wing, and other necessary work remaining to be done, and to meet the debts already contracted, the further sum of one hundred and sixty-two thousand three hundred and eighty-four (\$162,384) dollars will be required.

The Hospital farm has, during the year, been a source of profit. About seven hundred dollars were received for pasture land, and about fifty tons of hay cut for our own use. As yet nothing has been attempted in the way of laying off and ornamenting the grounds for the patients, a thing highly important with all Institutions for the insane. Nor have enclosures been made in connection with the building, for the safety and increased comfort of patients. The hope is entertained that during the coming season much may be done in this direction.

Of the urgent necessity for a Hospital in Connecticut many who will read these pages are fully aware; there is, however, a large number to whose minds this claim presents itself as of no serious and positive obligation. I would respectfully and ear-

nestly urge all such to spend one single day in visiting the scenes of misery found wherever the insane are confined in jails or almshouses.

With the completion of your Hospital on its original plan, in which various forms of innocent recreation are to be provided, much of this suffering and misery can be alleviated.

Already numerous applications for admission have been received from all parts of the State, showing conclusively that this great work was not commenced prematurely. As the number of patients increases, the cost of keeping them will be proportionally diminished,—the expense of heating, lighting, cooking, &c., not being much greater for two hundred than for one hundred. It is estimated that the average expense of keeping one hundred patients, at the present high rate of prices for the necessities of life, will be four and one-half (\$4.50) dollars per week. This includes board, washing, mending, lodging, medicine and attendance, and various other expenses incident to the curative means adopted in our practice.

In conclusion, gentlemen, I desire to express my grateful sense of obligation for the encouragement you have afforded me amid the labors and anxieties of the past year. With an earnest desire to promote the interests of the Institution, and with firm resolution to ensure its success and usefulness in the future by executing, to the extent of my ability, your philanthropic designs, this report is respectfully submitted.

A. M. SHEW, *Superintendent.*

MIDDLETOWN, Ct., April 1st, 1868.

BENJAMIN DOUGLAS, *Auditor.*

MIDDLETOWN, April 22d, 1868.

ADMISSION OF PATIENTS.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof by which such a person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons; two pairs new socks; one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under clothing, shoes and stockings corresponding to that required for the male patient, have one flannel petticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for chapel worship, and out of doors exercise and riding

4. In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individuals should accompany him to the hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending and attendance for all who are supported at the public charge, is four dollars and one-half per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections four and six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section five of amendment to Act approved July 23d, 1867, and By-Laws.

10. Visitors are admitted to the Institution on any day (except Sunday) between the hours of ten A. M. and twelve M., and between two and four P. M., but no visitors shall be admitted to the wards occupied by patients, without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

FORM OF APPLICATION.

The friends of patients or others making application for admission into the "General Hospital for the Insane," at Middletown, Ct., are requested, with the assistance of the family physician, to annex full and complete answers to the following questions :—

1. What is the patient's name?
What is the age?
Is single or married?
2. Where was born?
Where is present residence?
3. What is occupation?
If a female, that of the husband or father?
4. When did the first symptom of insanity occur, and in what manner?
5. Is this the first attack? If others, when and what was their duration?
6. Has the patient any permanent hallucination, and what is its nature?
7. Has the patient any disposition to injure others? If so, is it from premeditation or sudden passion?
8. Does the propensity to suicide exist? Has the patient ever made an attempt? If so, in what manner?
9. Has the patient a disposition to destroy clothing, furniture, &c.?
10. What was the patient's natural disposition? Was there any peculiarity or eccentricity?
11. Have any members of the family ever been insane? On the father's or mother's side? Were the parents blood relations?
12. Has the patient ever been addicted to the intemperate use of intoxicating drinks, opium, or tobacco? Does the patient indulge in any improper habits?

13. Has the patient ever had an injury of the head, epilepsy, or any hereditary disease, sudden suppression of any eruption or accustomed discharge?

14. What is the apparent cause of this attack?

15. Has any restraint or confinement been resorted to? If so, what kind, and for how long?

16. Has the patient received any medical treatment?

17. State any other particulars of the patient's history, which may have a bearing on the present attack.

FORM FOR PROBATE COURT,

And proceedings in the matter of admission of patients, under Sec. 4 of Amended Act, Chap. CII., May Session, 1867.

To the Hon. Court of Probate of the District of _____ :

The undersigned, First Selectman of the town of _____ respectfully represents that _____ of _____ is an insane person, and is now, and for _____ has been _____ (describe whether pauper or indigent, whether in almshouse, or how kept, &c.) He therefore prays that your Honorable Court will take said matter into consideration, and appoint a physician to visit said insane person, and inquire into and investigate _____ case, according to the Statute Laws of the State of Connecticut in such case made and provided, and upon finding the allegations of this petition to be true, to order said _____ to be taken without delay to the Hospital for the Insane, in the town of Middletown, and State of Connecticut.

REPORT.

To the General Assembly of the State of Connecticut:—

THE Board of Trustees of the General Hospital for the Insane of this State, in presenting their Third Annual Report, beg leave respectfully to state, that since their last report, the north wing of the hospital, designed for female patients; and the centre or main building, containing the offices, apartments for Superintendent, Assistant Physieian, Steward, apothecary's shop, &c., and last, but not least, the chapel, have been nearly completed, with the exception of the latter. A good portion of out-door work, such as grading, stonework, etc., has been done; but for the details of all this we would respectfully refer your Honorable body to the report of the Superintendent, which is full and preeise in its details.

The funds so liberally appropriated to the institution have been expended for the purposes and objects set forth in our last annual report.

The disbursements for current expenses, and building operations for the year past amounts to \$192,696.93. The bills and vouchers for all work done, articles purchased, salaries paid, and all other expenses are on file in the Comptroller's office, and may be examined by any one interested in so doing.

There have been already received into the hospital, of all classes and both sexes, two hundred and sixty-eight (268) patients, of whom two hundred and nine (209) remain. Of these, one hundred and seven (107) are males, and one hundred and two (102) are females. We copy these statistics from the Superintendent's report, simply to show, in how brief a period all the available apartments of the institution have been occupied ; and how important it will be for the State, at no distant time, to extend the accommodations of the hospital for the large number of this class of patients who still remain unprovided for. All the central arrangements of the hospital were designed for more than double the number of those now enjoying its benefits and the cost of carrying out the original plan, will be very much less in proportion than for the parts already completed.

Should the Legislature see the need of further accommodations, as is painfully evident to the Trustees, and be willing during this session to make an appropriation for this object, we ought to say that it will be impracticable to make use of much of the sum appropriated until the Spring of 1870 ; although it would be a great advantage to the State for the Trustees to know that they had control of a sufficient basis upon which to make contracts for work to be begun at the earliest practicable time, as with the models already erected, contracts can safely be made with responsible parties.

The liberality of a few gentlemen has provided a reading-room, library, and other means of occupation and recreation ; and so with regard to the chapel, private benevolence has gone far to complete this highly important adjunct to a hospital for insane persons. To the same sources is due the possession of a fine organ, which was purchased by private donations.

There has been very little active disease among the patients during the past year ; on the contrary, owing to the salubrity of the location, the abundant supply of pure water, the absence of any local or neighboring causes of malarious disease, in addition to the good care and strict attention paid by the Superintendent and his Assistant, the general health of the inmates has been unusually good. A few deaths have occurred, for the causes of which we would refer to the Superintendent's report.

Since the last annual meeting of the Board of Trustees, April 15th, 1869, the number in the hospital is 226, and there are on file and waiting for admission, sixteen applications.

In regard to financial matters, as already stated, the entire amount of the large appropriation made by the General Assembly at its last session, has been expended, and there are unpaid bills to the amount of \$18,543.28. We regret that this should be so, but we are unable to see how the result could have been otherwise, inasmuch as the estimates for the amount needed to complete the north wing and centre building were based upon the

experience of 1867, at which time, as is well known, mechanical labor of all kinds was sixteen per cent. lower than last year. This unexpected advance, which could not have been foreseen, caused a difference of several thousands of dollars in our building expenses. We can cordially say, that the Superintendent has been most anxious and remarkably successful in his endeavors to reduce the expenditures, and conduct the business of the hospital in such way as would most promote its welfare, and the best interests of the State, and we most cheerfully bear our testimony to his untiring zeal, watchfulness and exertion in behalf of the great public charity which is placed in his charge. We are pleased also to express our satisfaction with the efficient and faithful manner in which the Assistant Physician and other officers have discharged the various and often exhausting duties with which they have been entrusted.

The Board would respectfully recommend to the Legislature, that the law of the State in relation to payments by the towns, be so amended, that the bills of the hospital for the support of the insane poor be paid quarterly, in advance, as is the case in regard to "indigent" and private patients.

Referring to the action of the last General Assembly in regard to providing accommodations "as soon as practicable" for insane convicts, the Board would state, that owing to want of funds and time, no special or distinct provision has been made for this class of pa-

tients. Our centre and north buildings were not finished until the first of March ; and the carpenter's shop, which the Trustees had thought of remodeling and adapting for this purpose, was in constant use up to that date, at which time our funds were exhausted. Three men previously discharged from State Prison have been sent here from the towns, two of whom have been discharged from the hospital, cured.

The increasing wants of the hospital occasioned by the large additions to its family, require additional facilities for the cultivation and preservation of the products of the farm thereto attached. It is proposed, therefore, to develop all its capabilities for the use of the patients. To do this most economically, a barn sufficiently large to provide shelter for stock, tools and implements, storage for hay, grain, fruits and roots, should be built. Such a building, constructed of wood in the most suitable and economical manner, is estimated to cost about \$8,000. We think it ought to be generally understood, that the hospital, aside from the cost of its construction, is already, with less than two hundred and fifty patients, self-supporting ; and that an increased number, provided there were any room or accommodations for them, would assure this condition against all ordinary contingencies.

The thanks of the Board are due, and are hereby tendered, to many friends—some of them connected with the press—for liberal donations of books, pictures and papers. All these furnish entertainment and oc-

cupation to the patients; and it is not too much to say, that they sometimes contribute in no inconsiderable degree, to the grand object of the hospital, viz., the recovery of those who are committed to its care. The names of these benefactors of our charge will be found at length in the Superintendent's report.

In conclusion, the Board of Trustees would congratulate the Legislature, and the people of the State generally, upon the successful results of this noble charity, which have thus far been obtained. Time, in its onward course, will confirm and extend these, and will show more and more conclusively the necessity of such an institution. It will also justify, and more than justify, the liberal and enlightened policy which has characterized the Legislature and the public sentiment of Connecticut for four years past. We would moreover express the fervent hope that "a work begun in a spirit of so much, and such commendable liberality," may ever continue to enjoy the fostering care, and the unwavering favor and protection, of the State Government. Much, very much, has been done, but more remains to do, and we would therefore respectfully and earnestly invite your early attention to the subject of completing the hospital in accordance with the original design.

When this is done, and the whole number for whom this institution was intended shall be accommodated, there will still be large numbers of this unfortunate

class of sufferers, for whom no provision will have been made.

We have the honor herewith to submit our Report, and with it that of the Superintendent and Treasurer.

Respectfully,

MIDDLETOWN, *April*, 1868.

REPORT OF THE SUPERINTENDENT

TO THE

BOARD OF TRUSTEES.

GENTLEMEN :

IN presenting my report as Superintendent of the State Institution under your care for the year now past, and ending March 31st, 1869, it may be well to consider, first, the medical and statistical history of the hospital; and secondly, the building operations of the past twelve months.

Agreeably to the promise in your last annual report, and to the announcements published in all Connecticut daily and weekly papers during the month of April, the hospital was regularly opened for the admission of male patients on Thursday, April 30th, 1868, just thirteen months after the first work was begun in excavation of the site.

It must be a source of gratification to those philanthropic gentlemen, who, by votes in the General Assembly, and by other valuable services, have been in-

strumental in establishing, on a liberal scale, a State Hospital for insane of all classes, to know that their action has been promptly appreciated by the people of Connecticut, as shown by the following record.

There have been admitted during the eleven months to this date, two hundred and sixty-eight (268) patients; one hundred and sixty-five (165) males, and one hundred and three (103) females.

In the Act of incorporation, provision is made for three classes of patients: pauper, indigent, and private; one hundred and sixty-eight (168) pauper patients, seventy six (76) indigent patients, and twenty-four (24) private patients have been under treatment. Of this whole number, twenty-five (25) were discharged recovered, eleven (11) were discharged much improved, six (6) were discharged not improved, two (2) were found to be not insane, and of course immediately sent from the hospital, and fifteen (15) died, leaving the number in hospital to-day two hundred and nine (209), of whom one hundred and seven (107) are males, and one hundred and two (102) are females. It has been the experience of all new State institutions of the kind, that its first occupants in undue proportion are aged persons, and old chronic cases, and deaths are unusually frequent. In this respect we have been no exception to the rule.

TABLE SHOWING THE AGES OF ALL CASES ADMITTED.

	Males.	Fem.	Total.
Under 20 years,	7	1	8
Between 20 and 30 years,	38	17	55
“ 30 and 40 “	40	25	65
“ 40 and 50 “	31	27	58
“ 50 and 60 “	23	7	30
“ 60 and 70 “	18	21	39
“ 70 and 80 “	6	5	11
“ 80 and 90 “	2	0	2
Total,	165	103	268

TABLE SHOWING DURATION OF INSANITY PREVIOUS TO
ADMISSION.

	Males.	Fem.	Total.
Less than 3 months,	36	5	41
Between 3 and 6 months,	11	6	17
“ 6 and 12 “	12	2	14
“ 1 and 2 years,	13	8	21
“ 2 and 5 “	26	12	38
“ 5 and 10 “	19	11	30
“ 10 and 20 “	22	17	39
“ 20 and 30 “	8	3	11
Over 30 years,	1	7	8
Unknown,	17	32	49
Total,	165	103	268

From these tables it will be seen that little hope of recovery can be entertained respecting a large proportion of those already admitted. General debility, advanced age, and long duration of disease have been the most common characteristics; twenty-two aged, paralyzed patients were brought to us enfeebled and helpless; two were blind, and one each had lost a leg and an arm. As the hospital wards are already filled to their utmost capacity, and several applications for

admission are now on file, I deem it but just to inquire what additional provision should be made? In order to secure to the people of this State the benefits of the hospital to all who need its care, a large extension to the buildings should be made at the earliest practicable day. Recent cases of insanity always elaim the first attention, and should be treated as promptly as those suffering from any other acute disease. Economical considerations, if no other, dictate the reasonableness of this course. The experience of the past fifty years proves that of all recent cases of insanity brought under treatment during the first three months, eight-tenths are restored to health and reason before the expiration of the year, while not more than two-tenths recover when several months are allowed to pass before the patient is placed under systematic hospital treatment. Another fact that should have its due weight in estimating the value of hospital treatment is, that patients who recover after a long period of insanity, are more liable to a return of the disease.

I report the admission of two patients who were not insane: one, an idiot boy twelve years of age, was sent by the Judge of Probate of the Waterbury dis-

trict, under a mistaken impression that idiocy forms a phase of insanity. As other provision has been made by the State for the reception of this class of unfortunates, and as injury to the insane would result from contact with a class so entirely depressing in its influence, the boy was by your direction discharged unconditionally, although he remained a few weeks in the hospital, waiting for his friends to make other arrangements for him.

The other case was of a nervous, irritable, quick, good-tempered man, who from eccentric habits, and peculiar physique might easily be mistaken for an insane person. After carefully considering the facts of this case, and reporting them to you, he was by your direction discharged, and I learn has since conducted himself in a manner to fully justify your action.

The general health of the patients during the past year has been remarkably good. No deaths have occurred as results of acute or endemic disease, and while epidemics have prevailed in the surrounding districts, we may report immunity from all contagious or pestilential affections. This happy result is largely due to a new building, improved methods of ventilation, and an abundant supply of pure spring water.

Of the fifteen deaths reported during the year, two were from paralysis. One of these received spinal injury several years ago, while working on the dike at Hartford, since which time he had been steadily declining until death relieved him of pain and suffering.

The second was a well marked case of reflex-paralysis, a class of diseases so ably described by Dr. S. Weir Mitchell of Philadelphia. The loss of motion followed direct inguinal hernia in an excitable German, aged sixty-five.

Death occurred as the result of general paresis, in three male patients, all of whom had the characteristic symptoms peculiar to this insidious disease. One was the proprietor of a popular inland hotel: his delusions were of an exalted character respecting wealth and position. During the last few weeks preceding death, his imaginary income increased from eight hundred to eight millions of dollars per day, and he would make the most lavish promises to all around him. Another strong hallucination that all of the patients were his sons and daughters, continued to the last. Of two deaths from senile debility, one, aged eighty, was brought to the hospital in a helpless condition, and only survived forty days; the second, aged seventy-one, came covered with foul ulcers; his delusions were of an exhilarating nature, and up to the time of death, which occurred forty-three days after admission, he was always found by attendants and physicians either singing or whistling. We have to report two deaths from tuberculosis, an unusually small proportion of the number of insane under treatment.

Epilepsy was the cause of the death of a young man, aged twenty-two. While under treatment the convulsions were controlled by the steady and persistent use of Bromide of Potassium.

Death from exhaustion caused by inanition, occurred in a male patient aged fifty-five years. Before coming to the hospital he persistently refused food, and was supported by forced alimentation. I would remark that we have two patients at the present time who have been artificially nourished for three months.

One patient, aged forty-five, was brought to the hospital in an unconscious condition, convulsed tetanically, who survived five days. One death resulted from apoplexy. A post-mortem examination disclosed blood and blood-clots in all the ventricles. I report one death by suicide; also one death by violence. The facts of this sad case are, that on opening, at the early hour of six o'clock, an associate dormitory in the female department, where five "quiet demented" had been sleeping, the attendants found one patient in a dying condition from injuries received at the hands of a room-mate. She died in about five hours afterwards. The regular night-watchman had been his rounds only a half-hour before, and found all quiet which with other circumstances, goes to show that the violence could have occurred but a short time previously. A coroner's inquest was held, and a verdict rendered in accordance with the facts.

In all hospitals for the insane it is the practice to group patients of certain morbid propensities. It is the result of experience that they exert a salutary check on each other. Since the time that the northern wing was opened on the first of March, the female

patients have arrived in large numbers daily, and it was impracticable to have immediate knowledge of each particular case. The patient who inflicted the injury has the appearance of being entirely inoffensive, and is unconscious of having committed the dreadful and fatal deed.

Up to the present time the means of affording amusements to convalescent patients have been limited, owing to the unfinished and exposed condition of the grounds. We were able during the summer months to have walking-parties of from five to thirty persons, under the care of attendants, on every pleasant day. Others have engaged in field and garden labors, while some have chosen more exhilarating sports, as base ball, etc. A much needed want for the recreation of patients during inclement weather was supplied by the liberal contributions of a few gentlemen. There is also a library and reading-room always open to patients, with about three hundred volumes, gifts of benevolent ladies of Middletown, to whom acknowledgments are made on another page.

Religious services have been held every Sabbath afternoon at three o'clock, much to the advantage, comfort and benefit of the patients, an unusually large proportion of whom have been present at the services. Acknowledgments are due to the reverend gentlemen of Middletown and surrounding places, who have cheerfully devoted their time to this benevolent purpose.

With the completion of the plastering and flooring of our beautiful chapel, which has just been done through the liberality of two of your number, will be inaugurated a series of religious and intellectual entertainments, from which we anticipate much benefit.

Early in the year I availed myself of a rare opportunity to purchase a fine church organ at a greatly reduced price, and have in response to applications made to personal friends, and others who feel a deep interest in this institution, received about \$1,000 of the \$1,200 required to pay for the same. Our thanks are due to the following named gentlemen who have contributed to this praiseworthy object :

George H. Norman,	Newport, R. I.
Isaac Anderson,	New Haven, Ct.
Dr. James K. Bates,	Watertown, N. Y.
Addison Hutton,	Philadelphia, Pa.
Hon. Benjamin Douglas,	Middletown, Ct.
George Gillum,	Portland, Ct.

O. Vineent Coffin,	" "
Robert G. Pike,	" "
W. S. Camp,	" "
E. F. Sheldon,	" "
D. W. Camp,	" "

In addition to this useful gift, the following donations have been received during the year:

A fine seven-octave piano, forty valuable books and pamphlets, and one hundred dollars to purchase books for the library, from Mrs. S. D. Hubbard; a complete set of Dickens' works, Globe edition, and a number of green-house plants, from Miss Clarke; two large engravings from Mrs. Benjamin Douglas; an exquisitely tinted illumination, together with a number of books, from M. B. Copeland; a complete set (16 vols.) of the New American Cyclopedia, published by D. Appleton & Co., New York, from H. L. Brainerd, Haddam, general agent for Connecticut; books and plants from Miss Tompkins; two engravings from E. Rockwell; the New York Daily Sun, illustrated magazines, papers and periodicals, from C. E. Putnam; fifty Bibles from the Middletown and Vicinity Bible Society; plants in pots from Miss Woodward; valuable specimens for the museum from Geo. Stearns. In addition to the above, a large number of interesting books have been received from Miss Fanny Russell, Miss Mary Roberts, Miss Mary J. Edwards, Hon. J. Hotchkiss, R. S. Fellowes, Dr. Woodward, Dr. Casey, Dr. Blake, Wm. S. Camp, and from three other persons, whose names were not obtained. From New Haven, we have two beautiful hanging baskets for the wards, the gift of Mrs. E. C. Reed; also several valuable framed pictures from R. S. Fellowes, who also, it gives me pleasure to mention,

bore the entire expense of plastering the chapel, at a cost of about seven hundred dollars.

Two valuable Spanish fowls were presented by Samuel Jackson of Portland; two fine pigs by Dr. Pliny Earl, Superintendent Northampton Lunatic Hospital, and J. H. Tieman of New York has supplied us gratuitously with Laundry blue.

We are under obligations to the newspaper press for the subjoined list of papers received during the year:

BUILDING OPERATIONS.

Standing at this point, which is removed from the commencement by a period of only two years, we can now report the completion of the hospital, with the exceptions hereafter named, so far as authorized by legislative appropriations.

Referring to the accompanying plan, it will be seen that a centre building, two intermediate and two return wings constitute the main buildings; in the rear are placed the laundry, boiler-house and shops. In your last report to the General Assembly, was given a detailed description of the southern wings. As the northern wings have been finished after the same general plan, with but minor changes in the arrangement of rooms and appurtenances, a repetition of the description would be superfluous at the present time; it only remains for me now to direct your attention to the centre building. The dimensions of the centre building are sixty feet in width, one hundred and twenty feet in depth, and four stories in height. The first or basement floor, traversed the entire length by a hall twelve feet in width, is separated into one large and one small kitchen, one scullery, two dining-rooms, two rooms for house-keeper and assistants, one store-room, and two rooms with closets adjoining for steward's family. The large kitchen is furnished with a French range thirteen feet in length, a steak-broiler, two eighty and four forty-gallon iron kettles, and two twenty-gallon copper-jacketed coffee kettles, all of which were manufactured by Messrs. Bramhall & Dean of New York.

The second or principal story, which is only entered from the front, contains on the north a room for the meetings of the Board of Trustees, a reception room for female patients, an apothecary shop, and apart-

ment for the Assistant Physician ; on the south the Superintendent's office, clerk's office, reception room for male patients, and matron's room. One-half of the third floor is finished as a chapel, which is forty-two feet in width, fifty-eight feet in length, and twenty-two feet in height, with ceilings arched on the four sides. The Superintendent's rooms are also on this floor.

The fourth or Mansard roof story contains rooms for the domestics, a bath, and four spare rooms. Between this and the roof there is a large attic, which may at some future time be finished for an amusement hall.

Agreeably to your original plan, four hydraulic washing machines of Hamilton E. Smith's patent, were placed in the laundry, and have been in successful operation, to the entire satisfaction of all concerned. During the month of August your committee contracted for a small trunk engine, and two wrought iron sectional boilers, manufactured by Messrs. John B. Root & Co., of New York. The distinctive advantages claimed for these boilers are safety from destructive explosion, highest economy of fuel, and durability. An experience of five months has fully justified the expectations of your committee respecting these boilers.

In the month of July a contract was entered into with parties at Albany, N. Y., to furnish planed and matched white pine boards, with which to form our permanent inclosures. During the time since intervening, this material has been seasoning and is now in fine condition to be used. For this purpose the sum of

\$2,000 will be needed. Two thousand dollars (\$2,000) will be required to finish and furnish the chapel heretofore described. The sum of two thousand eight hundred dollars (\$2,800) will be needed to complete the small porch of the northern wing, and the main porch of the centre building.

In response to your last report, the General Assembly promptly voted the sum of \$200,000, as follows: \$41,000 to pay outstanding bills; \$50,000 to cover amount previously secured on Trustees' notes; \$15,000 to purchase furniture, and \$94,000 to finish the center building, northern wings, laundry and boiler house. This large sum has been wholly expended, and we still have outstanding liabilities to the amount of \$18,543.28.

To you, gentlemen, who are familiar with all the details of our last year's work, I need hardly explain why there should exist any discrepancy between the estimates and the actual results. The estimates were based on the experience of 1867, at which time mechanical labor of all kinds was sixteen per cent. lower than during the past year, as shown by vouchers at this office. This advance which could not have been foretold, caused a difference of many thousands of dollars in our building expenses. In the management of the affairs of the institution under your direction, involving the expenditure of so large a sum of money, the Superintendent has endeavored to conduct his business so that in all things the interest of the State should be carefully guarded. Believing that the hospital was not started to build up any particular town or district, but rather that the interest of the tax-payers required that purchases should be made on the most advantageous terms possible, he has, in nearly all cases, purchased at wholesale, in open market, and in no instance, has a dollar of the public money been expended, when the expenditure was not needed, or for which a full equivalent was not received.

The disbursements for current expenses and building operations for the fiscal year ending March 31st, 1869, amount to one hundred and ninety-two thousand six hundred and ninety-six dollars and ninety-three cents (\$192,696.93).

Salaries of officers,	\$4,081.87
Pay of mechanics and laborers,	62,191.76
Pay of house employees,	5,284.78
Stationery, postage, revenue stamps, and blank books,	449.14
Furniture and fixtures,	16,426.62
Fuel and lights,	6,953.92
Lumber, lime, cement, hair, paints, oil, putty, wood, sash and doors,	27,444.70
Stoue, brick and sand,	22,333.33
Slate, lead, sheathing, and putting on roof, tinner's bill, roofing conductors, and putting on,	4,478.88
Trustees' expenses (travelling),	156.02
Superintendent's board,	324.93
Iron sash, arch plates, work on sash patterns, shafting, black-smithing, iron beams, lightning rods, roof and stage bolts, piping, etc.,	3,451.73
Shovels, hoes, picks, saws and saw-tables, boring machines, locks, screws, registers, soil pans, etc.,	2,522.37
Boiler, steam pump, pipe and fittings, radiator and hair felt,	10,712.49
Horses, wagons, sleighs, harness, hay and feed, mowing machines and rake, manure, etc.,	1,921.64
Water works,	4,632.11
Architects' accounts, plans, etc., printing, advertising, insurance, etc.,	1,969.71
Bread-stuffs,	2,887.67
Meat, fish and eggs,	2,761.55

Live stock,	1,464.00
Freight and transportation,	3,465.54
Drugs and medicines,	369.05
Undertaker's bill,	161.75
Miscellaneous expenses, travelling, telegrams, etc.,	661.80
	<hr/>
	\$192,696.93

I would respectfully suggest that the best interests of the State would be promoted by a change of the law, so that the bills of the hospital for town poor be paid in advance, as is the case of indigent and private patients.

During the past year a small part of the hospital land has been under garden cultivation, producing a considerable quantity of vegetables. The greater portion of the farm was leased to the former owners for the sum of \$600, while we had not the adequate force or arrangements to till it. With the present large additions to the hospital family, and the necessarily increased demand for milk and vegetables of all kinds, it will now be advisable to cultivate all the land belonging to the institution. I earnestly recommend the erection of a barn large enough to provide shelter for stock, storage for hay, grain, and roots of all the kinds used for the diet of our patients. Economy, as well as necessity, require an additional \$8,000 for this purpose.

Acknowledgments are due to the officers associated with me in this great public charity for the efficient and faithful manner in which they have performed the duties of their several positions.

I should also be derelict to duty did I not in closing, express my commendation of the valuable services of those who are employed in the immediate care of the insane. As they have to bear with the irritability and often abusive language of patients, their duties are not only laborious, but peculiarly trying, and for this reason they are deserving of far more praise than they generally receive from the public.

Permit me in conclusion to express my grateful sense of obligation to the members of the Board for

their oft experienced counsels and confidences in these laborious and responsible duties. Relying upon their ready assistance in the future, and with unfaltering trust in a Divine Providence, I look forward with hope to the duties of another year.

Respectfully submitted,

A. M. SHEW, *Superintendent.*

MIDDLETOWN, CONN., March 31, 1869.

TREASURER'S REPORT.

The following statement of the fiscal concerns of the General Hospital for the Insane of the State of Connecticut, for the year commencing April 1st, 1868, and ending March 31st, 1869, is respectfully submitted to the Board of Trustees :

RECEIPTS.

Balance in the Treasurer's hands April 1st, 1868,	-	\$282.79
Amount borrowed on individual notes given by the Trustees,	20,000.00	
Appropriation of the State of Connecticut,	200,000.00	
Interest allowed on the anticipated payment of the \$50,000 notes given by the Trustees,	-	207.41
Revenue account from the Hospital,	-	16,777.71
		<hr/>
		\$237,267.91

PAYMENTS.

Amount of individual notes given by the Trustees,	-	\$50,000.00
Interest paid on notes given by Trustees,	-	323.61
Amount of Superintendent's orders,	-	185,914.99
Balance in the Treasurer's hands March 31st, 1869,	-	1,029.31
		<hr/>
		\$237,267.91

All of which is respectfully submitted.

M. B. COPELAND, *Treasurer.*

MIDDLETOWN, CONN., March 31st, 1869.

I hereby certify that I have examined the vouchers and accounts of the Treasurer, of which the above is an abstract, and found them correct.

JULIUS HOTCHKISS, *Auditor.*

MIDDLETOWN, April 28, 1869.

APPENDIX.

ADMISSION OF PATIENTS.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which such a person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons; two pairs new socks; one pair new shoes or boots, and one comfortable outside garment.

Each female patient, shall, in addition to a quantity of under clothing, shoes and stockings corresponding to that required for the male patient, have one flannel petticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for chapel worship and out of doors exercise and riding.

4. In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections four and six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section five of amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten A. M. and twelve M., and between two and four P. M., on Mondays, Wednesdays and Fridays only, but no visitors shall be admitted to the wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

FORM OF APPLICATION.

The friends of patients, or others, making application for admission into the "General Hospital for the Insane," at Middletown, Conn., are requested, with the assistance of the family physician, to annex full and complete answers to the following questions :

1. What is the patient's name ?
What is the age ?
Is single or married ?
2. Where was born ?
Where is present residence ?
3. What is occupation ?
If a female, that of the husband or father.
4. When did the first symptoms of insanity occur, and in what manner?
5. Is this the first attack ? If others, when, and what was their duration ?
6. Has the patient any permanent hallucination, and what is its nature ?
7. Has the patient any disposition to injure others ? If so, is it from premeditation or sudden passion ?
8. Does the propensity to suicide exist ? Has the patient ever made an attempt ? If so, in what manner ?
9. Has the patient a disposition to destroy clothing, furniture, etc. ?
10. What was the patient's natural disposition ? Was there any peculiarity or eccentricity ?
11. Have any members of the family ever been insane ? On the father's or mother's side ? Were the parents blood relations ?
12. Has the patient ever been addicted to the intemperate use of intoxicating drinks, opium, or tobacco ? Does the patient indulge in any improper habits ?
13. Has the patient ever had an injury of the head, epilepsy, or any hereditary disease, sudden suppression of any eruption or accustomed discharge ?
14. What is the apparent cause of this attack ?

15. Has any restraint or confinement been resorted to? If so, what kind, and for how long?

16. Has the patient received any medical treatment?

17. State any other particulars of the patient's history which may have a bearing on the present attack.

FORM FOR PROBATE COURT,

And proceedings in the matter of admission of patients, under Sec. 4, of Amended Act, Chap. CII., May Session, 1867.

To the Hon. Court of Probate of the District of

The undersigned, First Selectman of the Town of
respectfully represents that

is an insane person, and is now, and for has been
(describe whether pauper or indigent, whether
in almshouse, or how kept, etc.) He therefore prays that your Honorable
Court will take said matter into consideration, and appoint a physician to
visit said insane person, and inquire into and investigate case, ac-
cording to the Statute Laws of the State of Connecticut in such case
made and provided, and upon finding the allegations of this petition to be
true, to order said to be taken without delay
to the Hospital for the Insane, in the town of Middletown, and State of
Connecticut.

Dated 186 at Conn.

(Signed)

First Selectman.

At a Court of Probate holden at on the
day of 186 .

PRESENT :

Judge.

Upon the foregoing petition and application of
First Selectman of the town of

of it is ordered that
hereby appointed to visit said physician, be, and he is
to investigate and inquire into ease, and represented to be insane,
of the facts concerning alleged insanity. make return to this Court

Attest,

Clerk.

To the Hon. Court of Probate in and for the District of _____ :

The undersigned, _____ physician, hereby makes return that in pursuance of an order of this Court, passed on the day of _____ 186 , he visited the said _____ at _____ in said _____ represented to be insane, that he made a full and complete investigation of _____ in said case, and is of the opinion that the said _____ is insane, and that the prayer of said petition should be granted.

Dated at _____ this _____ day of _____ 186 .

(Signed)

Physician.

At a Court of Probate holden at _____ in and for the District of _____ on the _____ day of _____

PRESENT ;

Judge.

Upon the hearing of the petition of _____ First Selectman of the town of _____ setting forth and showing that one _____ an insane person, is now _____ of said _____ and praying, for reasons therein set forth, that _____ may be removed to the Hospital for the Insane at Middletown, as per petition on file, this Court having investigated the case, and heard the report of the physician duly appointed to examine said case, doth find the allegations of said petition to be true, and it is ordered that the said _____ be removed without delay to the Hospital for the Insane of the State of Connecticut, at Middletown.

Attest,

Clerk.

FORM OF REQUEST FOR PRIVATE PATIENTS.

*To the Superintendent of the General Hospital for Insane, at Middletown,
Conn.*

The undersigned, of _____ county of _____ State of _____
requests the admission in the Hospital, under your
charge, of _____ resident of _____ county of _____
aged _____ who has been (*here state occupation, condition, &c.*) He (or
she) is a native of _____ and is (*here state connection or rela-
tionship*) of the undersigned.

(*Give here, in writing, a history of the case, when insanity commenced, and
by what caused*).

Dated _____ 186 .

FORM OF PHYSICIAN'S CERTIFICATE.

I, _____ physician of _____ county of _____
State of _____ hereby certify that I have examined into (or
am acquainted with) the state of health and mental condition of
_____ of _____ county of _____ State of _____
and that he (or she) is, in my opinion, insane, and a fit subject for the
Hospital for the Insane.

Dated _____ 186 .

(Signed)

Physician.

FORM OF BOND.

Know all men by these presents, That we, _____ of
town of _____ county of _____ State of _____ are held
and firmly bound unto _____ Treasurer of the General
Hospital for the Insane of the State of Connecticut, located at Middle
town, and to his successors in office, in the sum of five hundred dollars,
for the payment of which we jointly and severally bind ourselves firmly
by these presents.

Whereas, _____ of the town of _____ county of _____ State of _____ an insane person, has been admitted as a boarder in the Hospital for Insane aforesaid; now, therefore, the condition of this obligation is, that if we shall truly pay, during h _____ continuance as such boarder, h _____ board quarterly in advance and such extra charges as may be occasioned by h _____ requiring more than ordinary care, and for such needful articles of clothing as _____ shall require, which shall be procured by the steward of said Hospital, and shall remove the said _____ when the Superintendent shall give notice of the need or propriety of such removal, from whatever cause, and shall also pay not exceeding fifty dollars for all damages _____ may do to the furniture or property of the Hospital, and also for reasonable charges in the event of death, with interest on each bill from and after the time it becomes due, then this obligation is void, otherwise remains in force.

Dated _____ 186 .

[L. S.]

[L. S.]

Signed and sealed in presence of _____

PART OF ACT RELATING TO ADMISSIONS.

"SEC. 4. That whenever any pauper in any town may be insane, it shall be the duty of the first selectman of that town, to make application in his behalf to the judge of probate of the district wherein said pauper resides, for his admission to the hospital, and said judge shall appoint one regular and respectable physician, who shall fully investigate the facts of the case, and if satisfied after such investigation that said pauper is insane, the judge shall issue an order to such first selectman, requiring him without delay, to take such insane pauper to the hospital, where he shall be kept and supported so long as may be requisite or expedient; and one-half of the expense of his support shall be defrayed by the town wherein said pauper resides, and the other half by the State; and that when a person in indigent circumstances, not a pauper, becomes insane, application may be made in his behalf to the judge of probate for the district wherein he resides, and said judge shall appoint a respectable physician, who shall fully investigate the facts of the case, and if satisfied after such investigation that such indigent person is in indigent circumstances and

insane, the judge shall issue an order to the person or persons making such application, directing him or them to take such indigent person to the hospital, where he shall be kept and supported so long as may be requisite or expedient; and one-half of the expenses of his support shall be paid by the State, and the other half by the parties making the application.

“SEC. 5. That the trustees may authorize the superintendent to admit, under special agreements, whenever there are vacancies in the hospital such cases as may seek admission.”

FOURTH ANNUAL REPORT
OF THE
BOARD OF TRUSTEES
OF THE
General Hospital for the Insane,
OF THE
STATE OF CONNECTICUT,
WITH
SUPERINTENDENT'S AND TREASURER'S REPORTS,

Presented to the General Assembly, at its Session in May, 1870.

By Order of the General Assembly.

REPORT.

To the General Assembly of the State of Connecticut :—

THE Trustees of the General Hospital for the Insane, make to your honorable body the Fourth Annual Report of the Institution under their charge.

The annexed Report of the Superintendent, with tables of statistical details, presents clearly the history of the Hospital for the year ending 31st of March, and the accompanying Report of the Treasurer shows the financial condition of the institution at that date.

From the Report of the Superintendent will be seen the pressing need of more rooms to accommodate the Insane of this State.

The extension of the building in two wings, according to original approved plans, which have been presented to the Legislature in lithographs in previous Reports, and are again copied in this, would furnish the needed room.

An additional report, with full particulars of cost of such extension, may be brought to your notice during the session.

The administration of the affairs of the institution, both medical and economical, has been satisfactory. We are gratified to commend the faithfulness and efficiency of those in official positions.

We are called to record the first breach in our number by death. WM. B. CASEY, M. D., late member of this Board for Middlesex county, died in the latter part of March. Dr. Casey was intimately connected with all of the measures of locating, building and organizing the Hospital. His warm interest in the work, and useful counsels, will long be remembered.

We regret to mention that our associate, Rev. CURTISS T. WOODRUFF, member for Fairfield county, has removed from the State. Mr. WOODRUFF has been indefatigable in his duties as Trustee, and has faithfully acted from the beginning of the work, as Secretary of the Board. He has been present at nearly every meeting, inspiring all with his own cheerful energy.

In order to profit by the lowest prices of the markets in the very considerable purchases required for so large an institution, it is needful to buy with ready cash. To do this, and thus to keep the commercial credit of the State Hospital at the highest point, several of the Trustees united to provide a cash capital of \$25,000, which sum was borrowed on the notes of individuals, members of the Board, for the uses of the hospital, from two Savings Banks in Middletown. The advantage of such a money-provision will be evident to all.

A Finance Committee, composed of the members from Middletown, meet monthly or oftener to order supplies and direct payments of all monies.

Your Trustees respectfully recommend that a law be passed ordering payments *in advance*, by the State, for

the State's proportion of the amounts paid for board, etc., of Pauper and Indigent patients, and also by the Towns for their proportions for Town paupers. Payment in advance is already required by law, from friends of Indigent patients for their proportions, and also from Private patients. It sometimes happens that bills for board at the end of the quarters, are not promptly met. When several small sums are thus withheld, the aggregate forms an amount which it is inconvenient for a new institution like ours to be kept out of.

The places on the Board made vacant by the decease of the member for Middlesex county, and by the resignation of the member for Fairfield county, need to be filled by the Legislature.

The terms of service of the member for New London county, and of the member for Windham county, expire with this year. We respectfully ask that they be re-chosen.

April, 1870.

REPORT OF THE SUPERINTENDENT

TO THE

BOARD OF TRUSTEES.

GENTLEMEN :

I HAVE the honor herewith to make to you the Annual Report of patients admitted and discharged at this hospital, and to present statistical tables, beginning March 31st, 1869, and ending April 1st, 1870.

This period embraces the first entire year of systematic classification and treatment of both sexes in the two wings of the institution, and has terminated in a manner to awaken renewed thankfulness and gratitude to Almighty God. The general health of the officers, employes and patients has been remarkably good ; neither epidemic or endemic disease has affected us, and we can report immunity from any case of suicide or homicide. The number of persons benefited by treatment in the institution has steadily increased ; its usefulness in the community has perceptibly extended, and by a careful system of economy, the hospital has met its ordinary expenses, leading its officers to believe that the low price of board established by you is one which will not need to be changed for a long time. All the bills of the

institution to 1st of April have been paid. Its only obligation is to a number of the Board of Trustees, who joined in providing a certain sum or capital to furnish means for cash purchases.

At the date of the last report there were remaining two hundred and nine (209) patients, of whom one hundred and seven (107) were males and one hundred and two (102) were females.

There have been admitted during the twelve months to this date, one hundred and thirty-four (134) patients; seventy-eight (78) males and fifty-six (56) females.

Of this whole number, three hundred and forty-three (343), forty-three (43) were discharged recovered, eighteen (18) were discharged much improved, twenty-seven (27) were discharged not improved, twenty-one (21) died and two were found not to be insane, leaving the number in hospital to-day two hundred and thirty-two (232), of whom one hundred and fourteen (114) are males and one hundred and eighteen (118) are females. The daily average during the year is 225.27. Of the three classes for whom provision is made in the act of incorporation there are at present one hundred and sixty-five (165) pauper patients, fifty-seven (57) indigent patients, and ten (10) private patients. In accordance with the spirit of the law regulating admissions, the Superintendent is bound to act impartially in receiving all classes irrespective of condition, giving always preference to persons in the order of application. This just rule has, in a few instances, been a source of

trial to the officers, and of disappointment as well as extra expense to town authorities.

No one can regret more than the officers of the hospital its inability to receive all from the State who apply to this State Institution. The demand for increase of accommodation is daily felt to be a pressing one. On the 31st of March there were sixty-two (62) applications on our files for admission which *could not* be received from mere want of sleeping-room, and we know of many who would apply if there were a chance of their getting in. We are in the condition of a rail road company in possession of a good track, sufficient locomotives, well-built stations and some cars, but not enough to carry all the passengers who apply. As in the case supposed, only car-room is needed; so in our case, only chamber-room is needed.

We have, as you know, kitchen accommodations and heating and water power enough, and all the organization and auxiliaries for five hundred patients, but room only for a few over two hundred. That I do not overstate the probable number requiring places in your hospital, let me say that by the New York State Commissioner's report there ought to be in this State one insane person to every four hundred and fifty of the inhabitants. With a population of six hundred and fifty thousand inhabitants, this estimate would occasion the need of accommodations in the State of Connecticut for over fourteen hundred insane. By the calculations of other States, the number would be thirteen hundred patients.

But taking only one thousand as our calculation for the number in this State, we now have room for two hundred and thirty. In the excellent Hartford Retreat, under the superintendency of that able veteran in this specialty, Dr. BUTLER, there are rooms for one hundred and fifty, leaving more than six hundred unprovided for. How long the prosperous State of Connecticut will be willing to allow this disproportion between the numbers demanding aid of the hospitals, and the room-accommodations provided, the General Assembly will wisely judge.

Experience shows that treatment in early stages of the disease is attended with success in a majority of cases, while only a small proportion are restored to health and reason when several months are allowed to elapse before the patient receives systematic hospital treatment. Your Superintendent has repeatedly been obliged to delay the admission of persons in this early stage of insanity, from one to three months, because the hospital wards were already crowded to their utmost capacity. As is the case with all newly opened State Institutions, this hospital forms no exception in having a large proportion of aged persons,—old chronic cases, who will probably require the care of this or a similar institution during their remaining lifetime. Chronic cases often require the most attention, and when at large, are the most annoying to the public. This is especially true of cases of periodical insanity and epileptic mania.

During the year past a few cases of temporary insanity, resulting from improper use of alcoholic stimulants

have been sent to the hospital by legal authority. These persons are not, in the general acceptation of the term, insane, but, as they require some form of restraint for their own good as well as that of their friends and the public, and as the State has not made separate provision for them, the officers of this hospital have felt obliged to admit all such in the regular order of application.

Twenty-one deaths occurred during the year. There were in April three (3), in May one (1), in June one (1), in July (3), in August three (3), in October two (2), in November four (4), in February three (3), and in March one (1). Thus the number of deaths during the year equals 6 1-8 per cent. of the whole number under treatment. The disproportion of deaths between the sexes is noticeable, as only three have occurred among the women, the average number of whom in the hospital exceeds that of the men.

In the cases that have terminated fatally, we observe an undue proportion of deaths soon after admission. The excitement of removals, and the fatigue of journeyings, &c., &c., are often prejudicial to insane patients. It is a matter of deepest importance that discrimination on the part of those who remove patients to the hospital be conscientiously, calmly and wisely exercised. In deciding when to send, the judgment of a physician should always be obtained by friends and officials. This precaution would often prolong the lives of those whom they seek to benefit.

During the year one man, aged seventy, was brought

to the hospital soon after an apoplectic attack, and survived but two days. Another, with the same serious disease, lived only six days. A third, aged thirty-six, exhausted by acute mania, died on the sixth day after admission. Had this case been brought earlier, the probability is that the disease would by treatment have been arrested, but he should not have been removed at the time he was. Another, aged sixty-nine, having wearied out the attentions of friends, was brought to live with us only seven days. And another, aged forty-five, sent under legal authority when nearly worn away by acute pain, the result of schirrhus of the pylorus, survived twelve days. The last of this class, aged sixty-seven, exhausted by chronic mania, and confined to his bed from the day of admission, died in two weeks.

I firmly believe, that in all of these cases the excitement and fatigue resulting from the journey to the hospital, not only hastened the time of death but also destroyed whatever hope of recovery there may have been. It seems as though the anxiety of friends, and common sense, would suggest to thoughtful persons the importance of rest and quietness in such a condition of the disease, and prevent any removals in such crises.

Of the other fifteen deaths, two were the result of phthisis, two of general paresis, two of exhaustion of chronic mania, and one each of pneumonia, carbuncle, debility, inanition, cerebral effusion, senile decay, and strangulation in an epileptic paroxysm.

In this connection I ought, perhaps, to state a fact not

sufficiently understood, that in the treatment of mental disorders little reliance is placed on the action of drugs. The prevailing favorable influence in the treatment of insane persons consists in removal from the influences previously surrounding them at home which may have been active in causing the disease. Attempts of friends at control, tend only to increase the inherent sense of arbitrariness while in the accustomed rooms and home. A powerful maniac who has been the terror of family and community, will ordinarily quietly submit to the rules of an institution, and be guided and influenced by a kind word from an intelligent attendant who is an entire stranger. The earlier in the disease that this change is made, the greater are the chances of speedy and permanent recovery. The very fact of being a stranger among others having each peculiar delusions and habits, awakens new trains of thought and feelings, which end in a kind of self-examination and self-control with subsequent improvement. I have repeatedly been told by patients who had recovered, that their first consciousness of deviation from a supposed sane condition, was induced by comparisons of themselves with the insane companions in the wards. Apprehensions generally entertained by the inexperienced, that a mild case of derangement would be intensified by contact with a large number similarly affected, is not confirmed in experience. On the contrary, in well regulated hospitals, where attention is given to the classification of patients, to regularity in exercise, eating, sleeping and amusements, beneficial

changes are often soon recognized by the patients themselves, indicating that restoration to health has begun.

In these progressive stages of convalescence, too much praise can hardly be awarded to competent attendants, who act the part of friends, directing and encouraging the feeble intellect by kind and gentle acts, even when at first coldly received and perhaps unappreciated for months. It is during this stage that patients need to have their minds diverted and occupied by various amusements, or by light employments, chosen wisely to meet their characters. Our institution as yet is able to offer but few of the recreative amusements or employments possessed by older hospitals.

In the last report of the "Pennsylvania Hospital for the Insane," at Philadelphia, an institution erected and supported by Christian benevolence, without the aid of the Commonwealth, mention is made, that "the pleasure grounds, embracing at the two departments almost one hundred acres of beautifully undulating land, with their fine trees and various improvements, and having nearly four miles of carriage-drives and as much brick or board walks, are invaluable as adjuncts in the proper management of an institution for the insane, and scarcely any, no matter what may have been their mental or physical condition, have ever been here for any length of time without deriving positive benefit from their regular and daily use."

In addition to the above out-door attractions, much has been done by Dr. Kirkbride within the past few

years to afford varied evening and indoor entertainments. A large hall, adapted for lectures, concerts and gymnastic exercises, was provided mainly by the managers, at a cost of several thousands of dollars, and is in constant use. A large stock of photographic pictures, engravings, paintings, museum articles, books and games, with billiard rooms and bowling alleys, are the approved methods and appliances used in restoring to health this unfortunate class of afflicted humanity. Other hospitals than the one mentioned are now adopting these useful accessories to medical treatment.

We are encouraged with the progress made during the past twelve months in our own building and grounds. The number of books has much increased and the engravings, photographs and lithographs which enliven our halls, speak of the friendly interest of generous citizens of this and other cities of the State. Beautiful plants, a fern-case and three aquaria attract patients, as they enter halls which are perhaps to be occupied by them as their homes for months. A few games of harmless nature are provided, and the billiard-room invites those who are sufficiently restored to understand and enjoy the play. One evening each week is devoted to music and social enjoyments, participated in by patients and attendants under the direction of the officers. During the winter, some friends, amateur performers, kindly furnished several vocal and instrumental concerts. Our acknowledgments for these are formally made in another place.

On the evening of the 24th December, our beautiful chapel was decorated tastefully. The exercises, at which were present more than two hundred of our patients, consisted in the reading of poetry, music, and in the distribution of presents from a Christmas-tree which had been prepared for the occasion. A more extended programme of lectures, concerts and amusements has been prepared for the coming year, and it is hoped that our means for a liberal increase in this direction may increase from year to year.

Satisfactory progress in completing a variety of unfinished work, which, owing to want of funds, remained over from the previous year, has been made. At the head of this list in the order of importance, stands the chapel. This room, forty-four feet in width, fifty-seven feet in length, and twenty-two feet in height, was finished and furnished with the necessary furniture and fixtures, and it is all that could be desired as an audience room. Before its completion, weekly religious services were held in one of the halls occupied by patients; but since, the chapel has been regularly used on the Sabbath, to the advantage and comfort of our patients. Acknowledgments are gratefully and sincerely due to the Reverend gentlemen of Middletown and vicinity, who have cheerfully and regularly conducted the services during the year.

In my last report your attention was directed to the importance of making provision for the protection of our stock and preservation of the farm products. Econ-

omy and necessity combined to require an additional appropriation for this purpose of eight thousand dollars, which was promptly voted by the last General Assembly. In August last, plans and specifications were procured, and contracts entered into with responsible parties to furnish timber and other building materials, and the building begun with prospect of early completion, but an unavoidable delay of six weeks was caused by the severe storm in October, which, it will be remembered, occasioned much damage and an unprecedented flood through the Connecticut valley. Owing to this unexpected casualty, the contractor was hindered in the work until late in the autumn. By employing a large gang of men, with his personal supervision, he completed the barn in a satisfactory manner during January.

The barn is situated on a slope two thousand feet in the rear of the hospital, and has sub-cellar for pigs and manure, a commodious, well sheltered and ventilated cellar (three sides above ground) to accommodate about forty cows, and a superstructure of wood fifty-six feet in width, ninety feet in length, and twenty-three feet in height, for the storage of hay, grain and farming implements.

Owing to the exposed condition of our grounds surrounding the hospital, much annoyance has been experienced; but an early completion of the permanent inclosures, which were commenced and nearly finished during the last season, will obviate this and secure to patients the desired seclusion. With this needed pro-

tection we expect to allow all of our patients the freedom of the grounds much of the time during the pleasant months of the year.

Ample space for exercise is afforded to the most excitable patients, in two large yards which have been inclosed in connection with the lower halls.

In the month of August a contract was made for the completion of the main porch of the center building and of the small porch of the north wing.

Our farmer, Mr. Clinton B. Weatherbee, has had under cultivation the larger part of the hospital farm, which, with the pastures and meadows, has produced a total of products valued at five thousand dollars, and of which a list is appended:—

Hay,	88 tons.	Lettuce,	
Corn Fodder (say),	10 “	Beets, Green,	18 bushels.
Corn,	300 bushels.	Melons,	500 lbs.
Potatoes,	1450 “	Winter Squash,	3 tons.
Carrots,	125 “	Pumpkins,	4 “
Beets,	36 “	Radishes,	200 bunches.
Onions,	13 “	Cabbage,	252 heads.
Turnips,	300 “	Peaches,	1 bushel.
Parsnips,	15 “	Pears,	7 “
Beans, White,	7½ “	Apples,	21 “
“ String,	26 “	Celery,	1000 lbs.
“ Pole,	28 “	Veal,	120 “
Peas,	18 “	Pork,	4434 “
Sweet Corn,	188 “	Eggs,	657 doz.
Cucumbers,	26 “	Chickens,	325 lbs.
Tomatoes,	42 “	Milk (grass made),	11,648 quarts.
Summer Squash,	100 “		

Mr. Weatherbee reports the weight of the hogs butchered as follows:—279, 500, 312, 300, 300, 406, 360, 311, 341, 305, 250, 270, 601; total, 4434 lbs.

Aside from the actual cash value of these products, opportunity for labor has been afforded to some of our patients, and has been of substantial benefit to a number of convalescents who have found healthful employment during the summer months. I mention particularly the instance of a nervous, excitable monomaniac, who chafed under the usual restraints of hospital life, but was comparatively quiet, contented and happy when allowed the freedom of the farm.

This is one of the practical and incidental benefits of farm work in hygienic treatment. It is doubted whether the labor of the insane can be made pecuniarily profitable. Experience thus far shows that a small proportion only of the entire number are physically strong enough to endure continuous manual labor.

ACKNOWLEDGMENTS.

We are under renewed obligations to the newspaper press for the subjoined list of papers received during the year:—

Hartford Daily Courant,	Hartford, Conn.
“ “ Post,	“ “
“ Weekly Times,	“ “
The Religious Herald,	“ “
Conn. General Advertiser,	“ “
New Haven Evening Register,	New Haven, Conn.
“ Morning Journal & Courier,	“ “
“ Weekly Palladium,	“ “
Loomis’s Musical Journal,	“ “
Watson’s Art Journal,	

The Constitution,	Middletown, Conn.
Sentinel and Witness,	“ “
Norwich Daily Advertiser,	Norwich, “
“ Weekly Courier,	“ “
Norwalk Weekly Gazette,	Norwalk, Conn.
Meriden Daily Republican,	Meriden, “
Tolland County Journal,	Rockville, “
The Winsted Herald,	Winsted, “
The Spirit of Missions,	New York, N. Y.
Forney's Weekly Press,	Philadelphia, Pa.
Litchfield Inquirer,	Litchfield, Conn.

If those having the control of newspapers in our State could see how eagerly these daily and weekly visitors are looked for, and how much they do to promote the comfort and welfare of our patients, it would not be necessary for me to appeal for their assistance.

It is a source of gratification to the Superintendent to report an increasing disposition on the part of the public to manifest their interest in this benevolent work, by contributions of various kinds for the wants of the patients. During the year we have received many tokens of this kind:—seventy-five dollars to purchase books for the library from “a lady friend”; a beautiful rustic stand and basket of plants from Mr. Wm. E. Hubbert; four trees from Prof. Johnston; plants and flowers from Miss Tompkins; also from Miss Payne; five dollars and a steel engraving in gilt frame entitled, “Old Age,” from Mrs. Samuel C. Hubbard; a fine large engraving from Mr. W. W. Wilcox; three large engravings from Mr. R. L. de Zeng; one hundred lithographs from that untiring friend of the insane, Miss Dix; twelve

exquisitely tinted chromos from Mr. Addison Hutton, of Philadelphia, Pa.; a complete set of croquet from Mr. Samuel C. Hubbard; a barrel of apples and twelve quarts of whortleberries from Mr. Wm. S. Camp; one black walnut writing-desk from Mr. E. F. Sheldon; one large aquarium from Mr. Benjamin Douglas; agricultural reports from T. S. Gould, Esq., Secretary of the State Board of Agriculture; fifty bibles from the Middletown and vicinity Bible Society; fifty prayer books from the New York Bible and Prayer Book Society, through the Rev. Mr. Thorne; many valuable reports and medical works from Dr. John R. Lea, of Hartford; religious papers from Mr. J. J. Whitney, of Winsted.

In addition to the above, a large number of interesting books, papers, magazines and games have been received from Miss Mary Roberts, Miss Russell, Prof. D. C. Gilman, Mrs. Fellows, Mr. A. M. Smith and Mr. Birge; from Mr. C. E. Putnam, the "New York Daily Sun," illustrated magazines, papers and periodicals.

We are indebted to Mr. Samuel C. Hubbard, and to a number of ladies of Middletown, for the strawberry festival enjoyed by our patients on the afternoon of July 3d; to the Wesleyan University Glee Club for a delightful vocal concert; and to Mr. Parsons and friends of New Britain, for a pleasant evening entertainment.

The institution is also under deep obligations to the resident officers, for their continued and efficient services during another year. Without their zealous co-operation

the Superintendent would be unable to properly execute your philanthropic designs.

The attendants and other employes whose duties are at all times laborious and peculiarly trying, deserve special mention, and it gives me pleasure to speak thus favorably of nearly all who have been with us during the year.

In behalf of those who are incapable of expressing their obligation to your Board for the continued interest you have manifested in their welfare, I acknowledge their indebtedness, while I thank you for the support which you have given the Superintendent and other officers in administering the affairs of this noble charity.

A. M. SHEW, *Superintendent.*

Middletown, Conn., March 31st, 1870.

TREASURER'S REPORT.

The following statement of the fiscal concerns of "The General Hospital for the Insane of the State of Connecticut," for the year commencing April 1st, 1869, and ending March 31st, 1870, is respectfully submitted to the Board of Trustees:—

RECEIPTS.

Balance in the Treasurer's hands, April 1st, 1869,	-	\$ 1,029.31
Appropriation of the State of Connecticut,		35,543.00
Revenue account from the Hospital,	- - -	62,129.58
Amounts borrowed on notes, signed by several members of the Board of Trustees, individually, for working capital,	- - - - -	25,000.00
		<u>\$123,701.89</u>

PAYMENTS.

Amount of Superintendent's orders,	-	\$119,854.11
Interest paid on notes signed by members of the Board,		996.43
Balance in the Treasurer's hands, March 31st, 1870,		<u>2,851.35</u>
		\$123,701.89

All of which is respectfully submitted.

M. B. COPELAND, *Treasurer.*

Middletown, Conn., March 31st, 1870.

We hereby certify, that we have examined the vouchers and accounts of the Treasurer, of which the above is an abstract, and found them correct.

JOSEPH CUMMINGS, }
JULIUS HOTCHKISS, } *Auditors.*

Middletown, April 12th, 1870.

APPENDIX.

ADMISSION OF PATIENTS.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which such a person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons; two pairs new socks; one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under clothing, shoes and stockings corresponding to that required for the male patient, have one flannel petticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for chapel worship and out of doors exercise and riding.

4. In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the hospital from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections four and six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section five of Amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten A. M. and twelve M., and between two and four P. M., on Mondays, Wednesdays and Fridays only, but no visitors shall be admitted to the wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

FORM FOR PROBATE COURT,

*And proceedings in the matter of admission of patients under Sec. 4 of Amended Act,
Chapter CII., May Session, 1867.*

To the Hon. Court of Probate of the District of

The undersigned, First Selectman of the town of _____
respectfully represents that _____ of _____
is an insane person, and is now, and for _____ has been
(describe whether pauper or indigent, whether in alms-
house, or how kept, etc.) He therefore prays that your Honorable Court will take
said matter into consideration, and appoint a physician to visit said insane person,
and inquire into and investigate _____ case, according to the Statute Laws of Con-
necticut in such case made and provided, and upon finding the allegations of this
petition to be true, to order said _____ to be taken with-
out delay to the Hospital for the Insane, in the town of Middletown, and State of
Connecticut.

Dated _____ 187 _____ at _____ Conn.
(Signed) _____

First Selectman.

At a Court of Probate holden at _____ on the _____
day of _____ 187 _____

PRESENT: _____ Judge.

Upon the foregoing petition and application of _____
First Selectman of the town of _____ it is ordered that
_____ of _____ physician, be, and he is
hereby appointed to visit said _____ represented to be insane,
to investigate and inquire into _____ case, and make return to this Court of the
facts concerning _____ alleged insanity.

Attest,

Clerk.

To the Hon. Court of Probate in and for the District of

The undersigned, _____ physician, hereby makes return
that, in pursuance of an order of this Court, passed on the _____ day
of _____ 187 _____, he visited the said _____
at _____ in said _____ represented to be insane;

that he made a full and complete investigation of _____ in
 said case, and is of the opinion that the said _____ is
 insane, and that the prayer of said petition should be granted.

Dated at _____ this _____ day of _____ 187

(Signed)

Physician.

At a Court of Probate holden at _____ in and for the
 District of _____ on the _____ day of _____

PRESENT :

Judge. .

Upon the hearing of the petition of _____ First
 Selectman of the town of _____ setting forth and showing that
 one _____ an insane person, is now _____ of said
 _____ and praying, for reasons therein set forth, that
 may be removed to the Hospital for the Insane at Middletown, as per petition on
 file, this Court having investigated the case, and heard the report of the physi-
 cian duly appointed to examine said case, doth find the allegations of said petition
 to be true, and it is ordered that the said _____ be
 removed without delay to the Hospital for the Insane of the State of Connecticut,
 at Middletown.

Attest,

Clerk.

FORM OF REQUEST FOR PRIVATE PATIENTS.

To the Superintendent of the General Hospital for Insane, at Middletown, Conn.

The undersigned, of _____ county of _____ State of _____
 requests the admission in the Hospital, under your charge,
 of _____ resident of _____ county of _____
 aged _____ who has been (*here state occupation, condition, &c.*) He (or she) is a
 native of _____ and is (*here state connection or relationship*) of
 the undersigned.

(*Give here, in writing, a history of the case, when insanity commenced, and by
 what caused.*)

Dated

187

FORM OF PHYSICIAN'S CERTIFICATE.

I, _____ physician, of _____ county of _____ State of _____ hereby certify that I have examined into (or am acquainted with) the state of health and mental condition of _____ of _____ county of _____ State of _____ and that he (or she) is, in my opinion, insane, and a fit subject for the Hospital for the Insane.

Dated

187

(Signed)

Physician.

NOTE.—The Amended Act of 1869 requires that the physician giving the certificate shall make oath or affirm.—See parts of Acts relating to admission, on the succeeding pages.

FORM OF BOND.

Know all men by these presents, That we, _____ of the town of _____ county of _____ State of _____ are held and firmly bound unto _____ Treasurer of the General Hospital for the Insane of the State of Connecticut, located at Middletown, and to his successors in office, in the sum of five hundred dollars, for the payment of which we jointly and severally bind ourselves by these presents.

Whereas, _____ of the town of _____ county of _____ State of _____ an insane person, has been admitted as a boarder in the Hospital for Insane aforesaid; now, therefore, the condition of this obligation is, that if we shall truly pay, during his continuance as such boarder, his board quarterly in advance, and such extra charges as may be occasioned by his requiring more than ordinary care, and for such needful articles of clothing as he shall require, which shall be procured by the steward of said Hospital, and shall remove the said _____ when the Superintendent shall give notice of the need or propriety of such removal, from whatever cause, and shall also pay not exceeding fifty dollars for all damages may do to the furniture or property of the Hospital, and also for reasonable charges in the event of death, with interest on each bill from and after the time it becomes due, then this obligation is void, otherwise remains in force.

Dated

PARTS OF ACTS

RELATING TO ADMISSIONS.

Chapter CII.—Approved 1867.

“SEC. 4. That whenever any pauper in any town may be insane, it shall be the duty of the first selectman of that town, to make application in his behalf to the Judge of Probate of the district wherein said pauper resides, for his admission to the hospital, and said judge shall appoint one regular and respectable physician, who shall fully investigate the facts of the case, and if satisfied after such investigation that said pauper is insane, the judge shall issue an order to such first selectman, requiring him, without delay, to take such insane pauper to the hospital, where he shall be kept and supported so long as may be requisite or expedient; and one-half of the expense of his support shall be defrayed by the town wherein said pauper resides, and the other half by the State; and that when a person in indigent circumstances, not a pauper, becomes insane, application may be made in his behalf to the judge of probate for the district wherein he resides, and said judge shall appoint a respectable physician, who shall fully investigate the facts of the case, and if satisfied after such investigation that such indigent person is in indigent circumstances and insane, the judge shall issue an order to the person or persons making such application, directing him or them to take such indigent person to the hospital, where he shall be kept and supported so long as may be requisite or expedient; and one half of the expenses of his support shall be paid by the State, and the other half by the parties making the application.

“Sec. 5. That the trustees may authorize the superintendent to admit, under special agreements, whenever there are vacancies in the hospital, such cases as may seek admission.”

Chapter LXXXV.—Approved 29th July, 1868.

“SEC. 1. That whenever a Judge of Probate for any district shall issue an order for the admission of any indigent insane person to the Hospital for the Insane in this State, he shall make a record of such order, and immediately transmit a duplicate of the same to the Governor of the State.

"SEC. 2. That before any bill for the support of such indigent insane person in said hospital shall be paid by the Treasurer of the State, the same shall be approved by the Governor."

Chapter LXXX.—Approved 8th July, 1869.

"SEC. 1. Any lunatic or distracted person may be placed in a hospital, asylum, or retreat for the Insane, or other suitable place of detention, either public or private, by his or her legal guardian, or relatives, or friends in case of no guardian; but in no case without the certificate of one or more reputable physicians, after a personal examination made within one week of the date thereof, which certificate shall be duly acknowledged before some magistrate or other officer authorized to administer oaths, or take the acknowledgment of deeds in the State where given, who shall certify to the genuineness of the signature, and to the respectability of the signer.

"SEC. 2. Any lunatic or distracted person, in addition to the modes already provided for by law, may be placed in a hospital, asylum, or retreat for the insane, or other suitable place of detention, either public or private, by order of any justice of the peace who shall fully investigate the facts of the case, either with or without notice to such lunatic, and if, upon such investigation, he shall find that such lunatic or distracted person is at large, and dangerous to himself, or herself, or others, or requires hospital care and treatment, he shall order such insane person to be taken to some hospital, asylum, retreat, or other suitable place of detention, to be there kept so long as may be requisite or expedient; but no person shall be so committed without the certificate of one or more reputable physicians, as specified in the next preceding section.

"SEC. 3. Any lunatic or distracted person may be placed in a hospital, asylum, retreat, or other suitable place of detention and treatment, public or private, by order of any judge of the superior court of this state, after the following course of proceedings, viz: on a statement or complaint in writing, of any respectable person, that such person is insane, and that the welfare of himself, or herself, or of others, requires his or her restraint, it shall be the duty of such judge immediately to appoint a commission who shall inquire into, and report upon the facts of the case. If in their opinion it is a suitable case for confinement, such judge shall issue his order for such disposition of such person as will secure the object and purpose of such application.

"SEC. 4. The commission provided for in the last preceding section, shall be composed of not less than three, nor more than four persons, one of whom at least, shall be a physician, and another a lawyer, judge, or justice of the peace. In their

inquisition they shall hear such evidence as may be offered touching the case, also the statement of the party complained of, and of his counsel. The party shall have such notice of the proceedings as said judge shall order, and said judge is hereby authorized to have such person placed in suitable custody, during the pendency of said proceedings.

"SEC. 5. On a written statement being addressed by any respectable person to any judge of the superior court of this state, that a certain person then confined in a hospital, asylum, or retreat for the insane, or other place of detention for the insane, is not insane, and is thus unjustly deprived of his or her liberty, such judge, at his discretion, shall appoint a commission of not less than three, nor more than four persons, one of whom at least shall be a physician, and another a lawyer, who shall hear such evidence as shall be offered touching the case, and without summoning the party before them, shall have one or more personal interviews with such person, so arranged, if possible, that such person shall not know or suspect the object or purpose of such interview. Said commission shall, within a reasonable time, make report to said judge, and if, in their opinion, the party is not insane, the said judge shall issue an order for the discharge of such person.

"SEC. 6. If the officers or managers of any hospital, asylum, retreat, or other place of detention, or any of them, shall wish for a judicial examination of a person claimed to be insane in their charge, such examination shall be had in the manner provided in the fifth section of this act.

"SEC. 7. The commission provided for in the fifth section hereof, shall not be repeated in respect to the same party oftener than once in six months, and in respect to such as are committed under the third section hereof, such commission shall not be appointed within the first six months after such commitment.

"SEC. 8. Persons placed in a hospital, asylum, retreat, or other suitable place of detention, under the first section of this act, may be removed therefrom by the party placing such person therein.

"SEC. 9. Persons placed in a hospital, asylum, retreat, or other suitable place of detention, under any of the provisions of this act, may be discharged by the authorities in whom the government of the institution is vested, pursuant to such rules and regulations as they may from time to time adopt in relation to patients and the management of the institution.

"SEC. 10. If, upon the application or complaint of any person made to any judge of the superior court of this State, that a certain person is insane, and suffer-

ing for want of proper care or treatment, upon finding the facts true, he shall order such person to be placed in some hospital, asylum, or retreat for the insane, or other suitable place of detention, at the expense of those who are legally bound to maintain such person.

"SEC. 11. The cost and expenses of any of the proceedings herein provided for, shall be paid in the manner, and by the person or party, as the magistrate or judge before whom the same shall be had, shall order and direct, and such magistrate or judge is hereby authorized to issue execution for such costs accordingly."

REPORT.

To the General Assembly of the State of Connecticut :—

THE Trustees of the General Hospital for the Insane would respectfully present to your Honorable Body their Fifth Annual Report.

During the year past, by the Divine blessing, the Institution under their care has been quietly, steadily, and very successfully performing the work for which it was chartered.

The Report of the superintendent, giving careful and minute statements of the interior affairs of the Hospital is herewith submitted.

High praise is due to him, and to his assistants, for their kind, skillful, and conscientious performance of the laborious, difficult, and very responsible duties of their offices. They have succeeded admirably in carrying out the design of making this, in every respect, a first class Institution.

The Report of the Treasurer to the Trustees is also appended. It shows the finances of the Hospital to

be in good condition. The income has been sufficient to meet the current expenses.

The Trustees have met Quarterly and by Committee much oftener. A portion of the resident Trustees have made monthly visits to the Hospital to examine its finances, inspect the premises, and consult with the Superintendent for its general interests.

The abundant produce of the farm, which has been well cared for, has added largely to the health and comfort of the patients.

A high board fence, much needed to protect the grounds near the Hospital from intrusion, as also the patients from strolling visitors and idlers, has been in part constructed. Its completion has been delayed by the strenuous opposition of certain interested persons, who have thus far prevented the fulfillment of the pledge, which was made to the Trustees before they located the buildings and secured by vote of the town of Middletown, by which, a street little used and running across the Hospital property between the main buildings and the barn, was closed. Much inconvenience and trouble have resulted.

In the last annual Report it was said, "In order to profit by the lowest prices of the markets in the very considerable purchases required for so large an institution it is needful to buy with ready cash. To do this, and thus to keep the commercial credit of the State Hospital at the highest point, several of the Trustees united to provide a cash capital of \$25,000; which

sum was borrowed on the notes of individuals, members of the Board, for the uses of the Hospital, from two Savings Banks in Middletown. The advantage of such a money provision will be evident to all.

By authority conferred by the Legislature of 1870 the Trustees have sold, for Thirty-five hundred dollars, to the Valley Rail Road Company and to the town of Middletown the right of way through the part of the Hospital farm bordering on the river; five hundred of which were appropriated to build fences thereby made necessary, and three thousand towards paying the Twenty-five thousand borrowed last year.

The number of patients constantly in the Hospital, crowd it to its utmost. There are now registered seventy-four applications for admission, in behalf of persons needing the benefit of its treatment, some of whom, though in a suffering condition, must wait their turn till the eyes of their friends are weary with watching, and their hearts are sick through hope deferred. Patients who should have found at once a place here, because there was no room for them, have been carried out of the State to Northampton and Brattleboro, until those institutions can receive no more. In some other cases the cost of securing proper care elsewhere has been consuming the substance of the fatherless.

Numerous painful facts, which have come to the knowledge of the Trustees confirm the propriety of the humane action of the several Legislatures, which

since 1865 have legislated for the benefit of the citizens of Connecticut who might suffer the ills of a mind diseased.

They acted with a wise regard to economy in founding and fostering this Institution, since early attention secured the restoration to health of a large number of insane persons, who would become incurables if neglected. But there is pressing and sorrowful necessity that the building should be enlarged according to the original plan, at the earliest practicable day.

The experience of the past thirty years affords reasonable ground for the belief, that the number of persons in the State, needing treatment for insanity, for a long time to come, will increase year by year. That number is already so great, that the Hospital, if enlarged by two wings, would have none too much room for their accommodation.

In order to do all that was possible, with present means, for the poor, for whom at most there is insufficient room, during the year, in receiving applicants, patients of that class have had the preference. This condition of things is a hardship to persons of moderate means, who need the benefits of Hospital treatment, but are neither paupers or indigent.

The remedy is in the hands of the Legislature. The property holders of the State have cheerfully paid for an institution of great utility and value; but it is yet incomplete and there is not enough room for all the town and State patients. Most of those, who have

been taxed to build it, if they needed, could not have its care for themselves or their children.

The Trustees believe that prompt measures should be taken to remedy this evil, by adding the present year to the Hospital the two wings contemplated in the original plan as shown in the engraving accompanying this report. Insanity is no respecter of persons. No man can be certain that disease or accident will not at a future day render him, or some one very dear to him, dependent for restoration to soundness of mind, upon the best counsel that science can furnish, combined with facilities for wise care, which only a Hospital of the best kind can supply. Some severe suffering has been endured the past Winter which could have been escaped, could the sufferers have found shelter in the Hospital. Nor is there cause to believe that less pain and misery will be borne by the insane in years to come, than in the past, until the State shall make suitable provision for their wants.

The Trustees are encouraged to believe there is a growing conviction among intelligent people in Connecticut, and elsewhere, that the pecuniary interests of the State, as well as humanity and true charity, unite in demanding that the best possible provision be made, at public expense, for the care and recovery of all who are afflicted with insanity. The danger to property and life from insane persons unrestrained, the wretchedness which comes to those who are improperly or unskillfully restrained in poor houses,

or in private buildings, and the increased probability that what would otherwise be a transient disease will by improper treatment be a life-long malady, are powerful arguments for a liberal and enlightened policy.

“The Association of Medical Superintendents of American Institutions for the Insane,” during its annual session held at Hartford, in June last, by invitation visited the Hospital.

An editorial report of the visit in the *COURANT* used this language: “We need only say that the visitors, who are the best judges of such a thing in the country, expressed themselves as extremely well pleased with it [the Hospital.] Some of the most eminent of them, whose indorsement is the highest sanction, said privately, that they knew of no other institution in the country, where the objects sought in such an institution had been better obtained. They said that the construction showed great forethought and knowledge of all the requisites, and a most judicious expenditure of money. We may not improperly quote Dr. Ray as of this opinion.

Dr. Kirkbride thought the Institution exceedingly creditable to the State, and remarked that it was evident the money had been well and carefully expended. The splendid situation was much admired.”

The Trustees are unanimous in the opinion that no Hospital of equal excellence, and capacity to accommodate patients, has been erected since the war for less money. Thus far it has only cost about sev-

enty-five cents on an average to each inhabitant of the State.

When it is remembered that there is more than one religious society in the State, not of great wealth, which has within a few years erected for itself a house of worship costing from one-fourth to one-third as much as the State has paid for the Hospital ; and that a single school district in Hartford has expended for its school house half as much ; and that single manufacturing companies have erected mills and furnished them with machinery, at a much greater cost ; it is evident that the expense for this Institution, in which above half a million of people have an interest, has not burdened them.

The law requires that the price of board shall be kept at its cost to the Institution. Cash purchases very considerably lessen the cost of provisions. But if towns delay payment when bills are due, and the State only pays at the end of the quarter, the difficulty of buying for cash is increased.

The Trustees would recommend that the law be amended so that the State bills be paid monthly, instead of quarterly as at present.

The gentlemen elected last year to fill a vacancy in the Board of Trustees from Fairfield County, finding himself unable to attend to the duties of the office, has tendered his resignation.

The official term of the members of the Board from New Haven and Middlesex Counties expires this year.

The services of the present members have been so valuable to the Hospital and to the State that we would respectfully ask their reappointment.

REPORT OF THE SUPERINTENDENT
TO THE
BOARD OF TRUSTEES.

GENTLEMEN:—The closing of another year of Hospital history brings with it the duty of presenting a summary of the events of the twelve months to the 1st of April, 1871. The blessing of God has been over us during this period, and I am permitted to report general good health for the year among officers, employes, and patients. No unusual sickness has invaded our household, and we have been exempt from those accidents not uncommon to Institutions filled with persons in all the various stages of Insanity.

A fair proportion of those committed to our care have been restored to health, while much has been done to ameliorate the condition of that larger proportion of chronic cases now occupying the wards.

A want of system in tabulating Hospital details and

results made difficult the comparison of the Reports of the various Institutions of this country; hence the Association of Superintendents of American Institutions for the Insane, at their annual meeting at Hartford in June last, recommended a form for presenting Statistical tables, which form will be followed in this Report.

At the date of the last Report there were remaining two hundred and thirty-two (232) patients of whom one hundred and fourteen (114) were males and one hundred and eighteen (118) were females.

During the twelve months since there have been admitted forty-nine (49) males and twenty-six (26) females, seventy-five (75) in all—making the number under treatment for the year three hundred and seven (307,) one hundred and sixty-three (163) males and one hundred and forty-four (144) females;—of these were discharged:

<i>Recovered,</i>	twenty (20),	fourteen (14) males	and six (6) females.
<i>Improved,</i>	sixteen (16),	eleven (11) “	and five (5) “
<i>Unimproved,</i>	ten (10),	five (5) “	and five (5) “
<i>Died,</i>	twenty-one (21),	eleven (11) “	and ten (10) “
<i>Inebriates,</i>	three (3),	“	

Remaining at this date one hundred and nineteen (119) males and one hundred and eighteen (118) females, two hundred and thirty-seven (237) in all. The daily average during the year is 233.69.

Of the three classes for whom provision is made in the Act of Incorporation, there are at present one

hundred and seventy-five (175) pauper patients, fifty-eight (58) indigent patients, and four (4) private patients.

This simple statement of the proportions of these three classes (which varies very little from the statement of last year) is a complete confutation of the unjust assertions which were made in the General Assembly, viz., that the present buildings were adequate to accommodate all the Insane Poor, if rich and paying patients were excluded. Without attempting to discuss the question which is suggested respecting the injustice of excluding from public Institutions erected at the public expense persons who are able to maintain themselves, I desire simply to report that of the ten self-supporting patients of last year, two have since become paupers, two have recovered, one was removed to another Institution, and one died, leaving the four private patients mentioned above.

The law of the State regulating admissions requires the Superintendent to receive applications, without regard to their relation to classes, in the order of their application; but he has steadily during the past year endeavored to dissuade the friends of all who had means of their own from making application for admission to our over-crowded wards.

At this date there are seventy-four (74) applications beyond our capacity. The officers are informed, too, of many who would apply if there was a prospect of an immediate reception. We are doing all we can to

meet the wishes of friends and officers of Towns to accommodate those for whom they apply. The number of applications has sometimes exceeded 100 beyond our ability to receive.

A serious consequence of the present policy pursued by the State in affording accommodations only to a limited number of its Insane, will be a gradual but steady increase of the number of chronic cases, and it is easy to calculate that in a few years it will cost more money to support the chronic Insane than it would now to finish this building in accordance with the original design, and thus be able to receive promptly all cases in the early stages of the disease when they are more readily cured, and more likely to be soon returned to their vocations and families.

Of recent cases admitted to the Hospital since its opening three years ago, eighty-eight have been restored to health after an average stay of fifteen weeks and two days. Thus eighty-eight recent cases cost the State and Towns only \$6,724.96, and are now a part of the producing population of their several communities; while the first eighty-eight chronic cases have already been here an average of 151 weeks each and cost the State and Towns \$57,640.00, and yet remain non-producers, to be an expense probably during their lives.

In a population as large as that of Connecticut, experience shows that about 250 new or acute cases of Insanity will annually occur, the majority from the

laboring and active classes of life. These, to be rightly dealt with, in view of their cure and restoration to their several kinds of profitable labor, need Hospital accommodations at once. It is so well known as to be almost needless to repeat that Insane patients cannot be advantageously to themselves or community, treated in almshouses or at their own homes.

In view of the number of Insane already existing in the State and of the annual increase to be expected, is it economy or humanity to further delay such increase of accommodations as shall enable all to receive medical and experienced treatment and thus be restored after a few months to their full duties to society?

It seems a hard case to the officers of such towns as have not heretofore had occasion to send a patient to the Hospital to have their first application refused simply for want of room when they know that other towns have for three years availed themselves of its means of protection and treatment for their cases. Connecticut has one hundred and sixty-four (164) towns; one patient from each would nearly fill the Hospital. Some of the larger towns have 12, 15, and 20 or even more patients already here.

The present policy if pursued will ultimately circumscribe if not wholly defeat the very object intended in the creation of a State Hospital. If we were to make immediate room for the recent cases which apply it would involve the necessity of returning to the sev-

eral alms-houses all the chronic cases ; but would your officers be justified in doing so or would the State sanction such a retrograde movement ? Would not Legislators wisely say “ it is far better to double the present capacity of this Hospital by carrying out the original plan of the building ” ?

As a belief seems to be entertained in some sections of the State that exceeding liberal provision has already been made for the Connecticut Insane, I take occasion to make a few extracts from Reports and give a few facts from other States.

From the Report of the Directors and Superintendent of the West Virginia Hospital for the Insane for 1867 :

“ Massachusetts with five large Hospitals within her borders, is providing a sixth ; New York with five large public and some excellent private Hospitals has just resolved to erect two more that will each cost nearly if not quite a million of dollars. New Jersey, small but brave in duty, with one of the best Hospitals in the world, has just resolved to provide for all its Insane, and is enlarging at an expected cost of from two to three hundred thousand dollars. Pennsylvania with five Hospitals of large size and some smaller ones is enlarging its western Hospital and building a new one at Danville. Maryland with two excellent Hospitals is now building two more that when finished will cost together over half a million of dollars, one of them being from private munificence entirely. Ohio

with five excellent Hospitals, (one devoted to the colored insane) has just resolved to enlarge two of them to more than double their present capacity, and also to erect a sixth equal to any of the others, the cost of which is estimated at from one-half to three-fourths of a million of dollars. Kentucky has two and means "to provide for every insane person within her limits."

Since 1867 nearly all of the above plans have been consummated and others not then contemplated have been formed and buildings begun, and in process of completion.

A report presented to the fourth annual meeting of the Rhode Island Hospital concludes as follows :

"It is objected by some that Hospitals are expensive. Of this we are aware ; but are not streets and bridges very expensive ? Are not our private residences, our churches and other edifices very expensive ? The practical question is not whether a Hospital costs a large sum of money but whether it is worth what it costs, whether the money is judiciously expended. No great institutions dispensing their blessings from generation to generation can be established without costing money. But what nobler use for money than to establish them ? How trifling, ignoble, and evanescent are the objects of many of our expenditures compared with the founding of a great Institution for the relief of the suffering, for the healing of the sick, and for the exemplification of a true Christian benevolence for centuries to come ?"

From the West Virginia Hospital Report before referred to, I copy a tabular statement of several Hospitals for the Insane with cost of buildings, etc., remarking only that all these were built before the late war and consequent advent of high prices, and it would be a moderate estimate now to add fifty per cent to the prices then ruling :

NAME, &c.	Capacity.	Cost.	Cost for Patient.
New York State Asylum, Utica,	440	\$517,400	\$1,185
Maryland Hospital, Baltimore,	130	213,600	1,443
McLean Asylum, Somerville, Mass.,	200	321,000	1,605
Penn. Hosp. for Insane, Philadelphia,	240	330,000	1,377
New " " " "	250	325,000	1,300
New Jersey Asylum, Trenton,	250	250,000	1,000
Maine Hospital for Insane,	175	150,700	861
Mt. Hope Institution, Baltimore,	120	200,000	1,666
Butler Hospital, Providence, R. I.,	140	116,000	828
Lunatic Asylum, Taunton, Mass.,	250	250,000	1,000
Michigan Hospital, Kalamazoo,	288	340,000	1,180
Northampton Hospital, Mass.,	250	335,000	1,340
Iowa State Hospital, Mt. Pleasant,	250	359,666	1,440
Average cost <i>per capita</i> before the war,			1,248
" " " " with 50 per cent. added for increased prices, since the war.			1,872

Multiply the above average, \$1872, by 200, the number of patients which the present buildings are intended to accommodate, (although now occupied by 237 patients) and the resulting figures are \$374,400, so that thus far the cost of our hospital has been within the average. But one important fact should be kept in view, viz: that all of the out buildings consisting of bakery, laundry, sewing department, boiler-house, shops, and barns have been constructed with the view to provide for from 400 to 500 instead of 200 patients; hence

future extensions will be required simply to accommodate patients.

Proposals from responsible builders were placed in your hands last year offering to erect one or two wings similar to those already completed and occupied for the sum of \$75,000 each. Adding this amount of \$150,000 to the cost of the buildings, \$375,000, the total will be \$525,000, which will provide accommodations for from 400 to 500 patients at a cost of less than \$1250 each, which we have already found to have been the expense of similar buildings previous to the war. With this addition to our present capacity your Hospital could accommodate the chronic insane and also open its doors promptly to all recent cases.

During the year 31 patients from this State have been treated at Northampton, Mass., and 30 at Brattleboro, Vt. By this generous action on the part of Sister States much suffering has been alleviated and some recent cases cured that might otherwise have become chronic. But we can no longer hope to meet the wants of the State in this direction. Your Superintendent was officially notified in February that the Hospitals of Massachusetts could receive no more patients from out of the Commonwealth. A similar announcement comes to us from Vermont.

General Results.

Twenty-one (21) deaths occurred during the year.

There were in April two (2), in May two (2), in June one (1), in July one (1), in August (1), in September five (5), in October one (1), in November three (3), in December two (2), in February one (1), and in March two (2). The number of deaths equals 6.84 per cent of the whole number under treatment. The respective ages were 49, 80, 45, 88, 49, 37, 24, 28, 70, 39, 70, 36, 36, 29, 45, 35, 55, 68, 41, 67; thus the average age would be 49.55 years. The proportion of deaths between the sexes is about equal, eleven (11) having occurred among one hundred and sixty-three (163) male patients and ten (10) among one hundred and forty-four (144) female patients. Nearly all of these cases were chronic, the disease having existed in one for more than forty years.

During the year a valuable use of a comparatively new remedy, the Hydrate of Chloral, has been made in the treatment of some forms of Insanity.

Having administered it to as many as one hundred persons of both sexes, of various ages and constitutional tendencies, we have no hesitation in saying, 1st, that it is the most sure and powerful of all the sleep-producing remedies known to the profession; 2d, that it has little if any other influence than that just mentioned; 3d, that it is better suited to the excited than the depressed forms of insanity; 4th, that the dose may vary from fifteen (15) to sixty (60) grains; 5th, that a watery solution loses strength on exposure to light even when placed in a ground-glass stoppered

bottle. Sleep induced by an ordinary dose of chloral seems to be natural and refreshing. The patient is easily aroused but usually speaks of being cold. If continued for several weeks a slight inflammation of the eyelids manifests itself, and in one case of violent chronic mania where doses of sixty grains had been given as often as three times a day for several months the bowels became slightly irritable. We have found it specially useful in early stages of acute mania.

Some physicians assert that sleep induced by this agent is unnatural and useless, and that it does not shorten the attack. My experience has not been sufficient to answer the objection, but reasoning "a priori" I cannot but believe that even a few hours sleep repeated day after day must in the end benefit patients. This remedy is valuable in the treatment of that class of chronic cases found in every Hospital for Insane, who seem to be oppressed with sleepiness during the day but toward night become wakeful and irritable, talking and singing boisterously. In one remarkable case of this kind we had the satisfaction of rapid and complete recovery soon after the use of chloral.

Special Pathologist.

In my last Report I suggested the importance of the appointment of a Special Pathologist whose duty would be to make thorough scientific autopsies in important cases. The time of the resident medical officers is so occupied by regular and often perplexing

daily duties in a large Institution, that they have not sufficient leisure to thoroughly examine and analyze the morbid results of insidious and doubtful cases of mental derangement.

Recognizing the importance of such examinations, you promptly and unanimously appointed to this office Dr. E. C. Seguin, of New York, who brings to the work energy and ability as well as the experience of several months as an assistant to the distinguished Brown-Sèquard. Some of the results of the investigations by Dr. Seguin, are herewith reported.

Out-door Improvements.

As fully as we could, we have continued the improvements on the grounds, fences, and buildings. The summer of 1870 was unusually dry and afforded a rare opportunity for sub-soil drainage. The labor of several convalescent patients, under the direction of an attendant, laid about 4000 feet of Boynton's best drain-tile, which is now carrying off from the grounds a continuous two-inch stream of water.

Considerable work has also been done by them in grading and sodding the grounds adjoining the south wing; also in constructing a Macadamized road to the barn buildings. Capacious root cellars, storing 4000 bushels of vegetables, have also been made, and about 90 rods of permanent fence corresponding with that previously erected. By continuing these improvements from year to year, we hope by and by to have graded and laid out in a picturesque manner the {grounds

surrounding the Hospital without calling upon the State for an appropriation for this purpose.

Farm.

Under the judicious management of Mr. Clinton B. Weatherbee, portions of our farm hitherto unused, have been brought under cultivation, increasing the receipts from this source nearly two thousand (\$2000) dollars as compared with those of former years. When it is remembered that the drouth of last year probably lessened the production of farm and garden crops by a third, this statement will be a satisfactory one. Much remains to be done before our land will be under the state of cultivation we aim for. Several of the fields need ditching and under-draining; bushes and stones are to be removed and fences reset. In these improvements we intend to use, as far as is wise, the labor of convalescents, thus doing them good, while a substantial benefit enures to the Hospital. Most insane persons are disinclined to manual labor, or owing to their mental and physical condition cannot apply themselves to it. A few, however, are peculiarly devoted to some chosen occupation, while others are useful in aiding the sane in the performance of the various kinds of work about a large institution. To all such the judicious bestowal of special privileges and favors as a reward therefor tends to encourage them in the right direction; but the primary object of the labor of the insane should be their own improvement, mental and physical.

Financial Condition.

Referring to the Steward's detailed statement which is herewith submitted, it will be seen that the Hospital received from all sources (including cash on hand and balance with Treasurer at the beginning of the year) the sum of \$62,139.16, and that the total expenditures for the support of the Institution during the same period amounted to \$61,028.90, leaving a balance in our favor of \$1110.26.

Your Superintendent is fully convinced that the regular Hospital revenue will be sufficient to meet all the wants of the Institution so long as provisions and other necessary articles remain at present prices.

I find in the last Annual Report of the Minnesota Hospital for the Insane the following table of expenses of several hospitals showing the weekly cost in each and the average in all.

Pennsylvania Hospital for Insane, Phila.,	-	-	-	\$8.68
Government Hospital, Washington, D. C.,	-	-	-	7.88
Northern Ohio, Newberg, O.,	-	-		7.17

We have received the following Newspapers and Magazines during the year, for which we are under renewed obligations:

Hartford Daily Courant,	Hartford, Conn.
“ Evening Post,	“ “
“ Weekly Times,	“ “
The Religious Herald,	“ “
Conn. General Advertiser,	“ “
New Haven Evening Register,	New Haven, “
“ “ Morning Journal and Courier,	“ “ “
“ “ Weekly Palladium.	“ “ “
Loomis’ Musical Journal,	“ “ “
The Constitution,	Middletown, “
Sentinel and Witness,	“ “
Norwich Daily Advertiser,	Norwich, “
“ Weekly Courier,	“ “
Norwalk Weekly Gazette,	Norwalk, “
The Bridgeport Republican and Standard,	Bridgeport, “
Meriden Daily Republican,	Meriden, “
Westport Advertiser,	Westport, “
Windham County Transcript,	
Litchfield Inquirer,	Litchfield, “

Forney's Weekly Press,	Philadelphia, Pa.
New York Semi-weekly Times,	New York City.
Watson's Art Journal,	" " "
Illustrated Christian Weekly,	" " "
American Messenger,	American Tract Society.
Moore's Musical Record,	Manchester, N. H.
The Galaxy,	New York.
The Hearth and Home,	" "
The Atlantic,	Boston, Mass.
Godey's Lady's Book,	Phila., Pa.

The many contributions of various kinds received during the year indicate an increasing disposition on the part of the public to interest themselves in this benevolent work :

From Hon. Robbins Battell one hundred and fifty dollars, "to be used as most needed for the amusement and entertainment of patients;" fifteen dollars from "a lady friend" to purchase trees; plants, flowers and flower stands from Mrs. Benjamin Douglas; a large basket of grapes from Mrs. Henry G. Hubbard; also from Rev. Mr. Thorne a basket of pears and packages of papers; several books from Mrs. Samuel C. Hubbard, Miss Russell and M. B. Copeland; a parlor croquet board from Miss Fellowes; a complete file of the London Illustrated News for the year 1870, from Mrs. Fellowes; Circular No. 4, 1870 from the Surg. Gen. U. S. Army; valuable public documents from Hon. S. W. Kellogg, M. C.; several fine steel plate engravings from J. W. Bradley, Esq., Phila. Pa.; regular files of California papers from William Shew, Esq., of San

Francisco; illustrated papers and magazines and the "New York Daily Sun" from Mr. C. E. Putnam.

In addition to the above, a fund has been contributed recently, by sixty individuals each donating five dollars, to which we hope to add enough to purchase a large Stereopticon with suitable slides, and several hundred books for our library.

We are indebted to a number of ladies and gentlemen in Middletown and to Mr. Parsons and friends of New Britain for two delightful musical entertainments; also to Prof. Hibbard for one of his inimitable readings, which was universally enjoyed by our patients.

To the several clergymen of this vicinity who have kindly conducted our chapel services throughout the year, we owe a peculiar debt, not in our power to cancel. The most that I can do, I do cheerfully, and that is to make this public acknowledgment of their services.

I cannot close this imperfect report of the past year without once more expressing the deep obligation I am under to those who are associated with me in this arduous work, for their continued and efficient services.

No changes have occurred among the officers and but few among the attendants and other employed persons. I am sometimes surprised at this when I remember what a laborious and peculiarly trying life is allotted to all those who devote themselves to the

care of the insane. It is in your power, gentlemen. to lighten these burdens in the future as you have done in the past by your constant support and encouragement, manifested by frequent visits to the Institution, and the personal interest you take in the welfare of those who are committed to its care.

Respectfully submitted,

ABRAM MARVIN SHEW,
Superintendent.

Middletown, Conn., March 31, 1871.

PATHOLOGIST'S REPORT

OF TWO CASES.

CASE I—DEMENTIA—CHRONIC CHOREA—ATROPHY OF ANTERIOR LOBES OF CEREBRUM.

M. W., Æt. 69—Conn.,—Widow; was admitted July 20th, 1869.—“No history furnished with patient, except that she has been living several years at the almshouse. She has violent choreic movements which are general; is free from them during sleep; has confused delusions respecting persons whom she meets; imagines that the attendants and physicians are old friends.

Jan. 5th, 1870:—No change; general health fair.

March 1st.—Has lost flesh lately; otherwise no change.

June 1st.—Emaciation still going on; failing gradually.

July 1st.—Still failing.

“*3d.*—Patient has an acute attack of diarrhœa; refuses all remedies except stimulants.

Aug. 30th.—Is rather better; slight conjunctivitis; ordered a wash of sulphate of zinc and atropia.”

Examination Aug. 4th. The patient presents ordinary choreic movements of the chronic type. Speech considerably interfered with in respect to articulation; age, loss of teeth, and chorea together causing this. Psychically she exhibits no positive mental aberration except violent temper. However a considerable degree of dementia is present.

Sept. 12th.—At 6 o'clock P. M. died, of asthenia apparently. Autopsy. Body opened twenty-four hours after death; weather cool; body in a good state of preservation. Rigor mortis moderate. Body very long and extremely emaciated. No eruption on skin. There are many bruises and scratches on legs and arms inflicted by patient. The mammary arter-

ies are visible as they run in a very tortuous manner from the intercostal space to the atrophied breasts; they (the arteries), feel like wire to the touch. In anterior part of thighs, and inner part of arms, a similar state of the small arteries may be felt. On turning the body over on its face, three pints of ill-smelling, bloody liquid escaped from the mouth.

Spine and Contents. Great dryness and fragility of vertebrae. No congestion of meningo—rachidian veins. Dura-mater normal throughout. The arachnoid presents a few very small calcareous opacities. Quantity of subarachnoid fluid small, barely an ounce (estimate). Cord appears healthy to naked eye externally, and on a section made at level of fifth Cervical nerve.

Skull and Contents.—Pericranium not injected, about normally adherent. No external lesion of skull. Considerable difficulty is experienced in removing skull-cap; explained by finding a very considerable hyperostosis of the inner table of the vertical part of the frontal bone. The lesion seems limited to this bone, although upon the inner table of the temporal, and the wings of the sphenoid there are a few isolated exostoses the size a pea. The section in the frontal bone was made 40 mm. above the superior edge of orbits. At this level, at a point directly above the right eye the frontal bone measures 20 mm.; above left eye 17 mm.; in median line 15 mm.; in thickness the lesion ceases almost abruptly at the coronal suture. In the diseased parts the inner table is uneven and knobbed. The dura-mater lying over it is decidedly vascular, abnormally adherent everywhere; but exhibits no new formations. The right parietal bone about the center measures 9 mm., the left 8 mm. in thickness. The arachnoid is moderately infiltrated with fluid, which is somewhat opalescent near the vessels. At a point a little anterior to the fissure of Rolando on both sides, there is a roll of infiltrated arachnoid, corresponding to the place where commences the pressure of the diseased bone. No fluid, or exudation at base of brain, over cerebellum, or around medulla oblongata.

There is very marked flattening of the anterior lobes of the

cerebrum ; the 1st* and 2d convolutions being most affected. There is no change in color, or consistence, nothing whatever abnormal, in compressed parts. Cerebrum weighs 31 oz. On careful examination no lesions are discovered except slight punctate injection of central white matter, and a gaping state of the vessels of the opto-striate bodies. No calcification of small arterics. Islands of Reil healthy. Each ventricle contains about one ounce of clear fluid. A small bony formation exists in arachnoid near inner ear of right fissure of Rolando. Cerebellum weighs 4.3 oz., and appears perfectly healthy. Medulla oblongata appears healthy, except that the floor of fourth ventricle is perhaps abnormally grayish and translucent near calamus.

Thorax and Contents.—Costal cartilages are not much calcified. Lungs do not collapse on exposure ; slight old adhesions in both pleural sacs, most marked about upper lobes. Lungs congested and œdematous, with a few patches of lobular pneumonia. At inner part of anterior border of right lower lobe, there is a small encysted abscess the size of a pea.

At a corresponding point in the left lung there is a cavity the size of an almond containing broken down lung tissue, not tubercular or gangrenous ; most probably a patch of lobular pneumonia.

The heart is of fair size, but its left ventricle is very thick, a good inch, and the interventricular septum measures three-quarters of an inch in thickness. Right heart is flabby. The cardiac muscle appears a little grayish, aorta calcified in spots near the heart ; valves not abnormal.

Abdomen and Contents.—Liver small, its surface slightly bronzed in spots ; texture healthy, gall bladder obliterated by calculi. A large one lies in *cul-de-sac*, the size of a dove's egg, white and beautifully crystalline on fracture. In a second pouch, near the obliterated duct are three smaller green-black calculi as large as pepper grains.

Stomach is large, (by mistake not opened.) Spleen healthy ; slightly lobulated. Kidneys small and pale, but healthy. Intestines normal, excepting the large which are

*Turner's classification.

extremely thin and translucent, containing a large number of scybalous masses. Mesenteric arteries are rigid and large. Celiac axis is diminished one-half in caliber near its origin by hypertrophy of its coats. Abdominal aorta and branches calcified, dilated, and rendered irregular and tortuous. Just above the bifurcation there is a calcification which forms two-thirds of the circumference of the aorta. Excepting fibrous state of ovaries, the organs of generation are normal.

Limbs.—Removed portions of upper part of median and ulnar nerves, also of sciatic (right side); placed in chromic acid. Removed portions of right biceps, of right trapezius (clavicular portion;) placed in chromic acid. The muscles appear normal to naked eye.

CASE II.—CHRONIC MANIA—GRANULAR DEGENERATION OF VENTRICLES—CORTICAL SCLEROSIS OF CORD, ETC.

S.—S. Æt. 43.—Conn.—Married—Stone Cutter. Admitted July 10, 1870—History.—"First symptoms noticed two months ago. Had a slight 'fit,' which was followed by symptoms of sub-acute mania. He steadily grew worse, and became unmanageable at home, on account of violence toward family and others. At times has been rational, but most of the time incoherent; having delusions in regard to being a policeman, owning livery stable, etc. Previous to having this fit he was thought eccentric.

Aug. 9th.—Has had no active symptoms until to-day, when he became delirious, and required restraining in bed.

Sept. 1st.—Is up, and about now as usual; though he seems more stupid and irritable.

Sept. 20th.—Transferred to the 'excited ward' on account of a growing disposition to molest other patients. Imagines that they call him bad names, etc. Patient is somewhat deaf.

Oct. 10th.—General health failing, and taking tonics and stimulants. Soils clothing and bed.

Nov. 1st.—Did not seem to recognize his wife who visited him two or three days ago. Frequently suffers from colic.

Nov. 11th.—At 6 o'clock A. M., was discovered in a 'fit' by the attendant. The fit seems to be apoplectic. Has stertorous breathing; flushed countenance; pulse 132 and very strong,—carotid arteries beating violently; pupils contracted and not responding to light. No reflex movement of limbs produced by tickling feet. When first seen by attendant the arms were jerking. At 6 o'clock P. M., no material change. Has occasional spasms, movements of arms, spells of jerking and irregular breathing. Sweats profusely and passes large quantities of urine.

Nov. 12th.—A. M. Pulse not as strong. The paroxysms of irregular respiration continued through the night. No other change. Noon; breathing more regular; pulse better; pupils respond to light; he makes attempts to swallow. Ordered stimulants; is sensible to pain of pricking and pinching; right side apparently more sensitive than left. Temperature normal. 6 o'clock P. M., swallows whisky and water, though with some difficulty. Pulse 100.

Nov. 13th.—Apparently better. Takes milk punch and beef-tea with less difficulty in swallowing. Respiration more regular. 5 o'clock P. M., is about as in morning. "7 o'clock P. M., is reported in a dying condition. Death takes place at 9 o'clock P. M."

Autopsy.—Body examined twelve hours after death; weather cool. Rigor mortis moderate. Some hypostatic congestion of skin of back and limbs. Small bed-sore on sacrum.

Spine and Contents.—Fat next to dura-mater injected. But little fluid under arachnoid. Dura-mater and arachnoid appear perfectly healthy; there being a few filamentary adhesions between the two in the region of the cervical enlargement. On the anterior surface of the spinal canal, there is found a small tumor the size of a large pea, situated in the substance of the posterior common ligament, opposite the fibro-cartilage lying between the last dorsal and the first lumbar vertebræ. It pushes the dura-mater somewhat forward, but not enough to have produced any pressure on the cord. The tumor is fibro-cartilaginous. On making sections through different parts of the cord, no abnormal appearance is discernible to the naked eye, except the very unusual development of vessels in the gray matter and near the anterior fissure. Spinal cord is placed in Müller's fluid for transportation.

Skull and Contents.—Bones and dura-mater normal. Pacchionian bodies unusually numerous. The arachnoid is not perfectly transparent along vessels, but the milkiness is hardly pathological. A minute inspection of the entire external surface of the cerebrum fails to reveal any lesions. The pia mater everywhere peels off well. On section, the gray mat-

ter of the convolutions appears unusually dark. The *centrum ovale majus* is much injected. Opto-striate bodies normal.

The ventricles are the seat of a very interesting lesion. In the first place they are all considerably dilated, and contain a good deal of clear fluid. The floor of the lateral ventricles half way up the lateral boundary, appears granular and thickened. The granulations, easily seen and felt, appear translucent, pearl-like, and vary much in size, from a mere point to the bulk of the head of a small pin. On passing the finger over the diseased tissue it appears unusually firm. The third ventricle and infundibulum are considerably enlarged, and studded with granulations; the same being true of the aqueduct of Silvius. The foramina of Monro measure nearly one quarter inch in diameter, and the lesion involves them, as well as the *septum lacidum*. The roof of the ventricles is normal; and so are the choroid plexuses.

Cerebellum appears perfectly normal; but the valve of Vieussens is the seat of the granular degeneration above described. Medulla oblongata appears healthy to naked eye, except that floor of fourth ventricle to the apex of the calamus scriptorius exhibits the granular degeneration; though to a less degree than the lateral and third ventricles. The nerves at the base of brain appear normal.

Thorax and Contents.—Heart normal; contracted. Commencing atheroma of arch of aorta.

The lungs do not fully collapse on exposure. Left lung presents some recent adhesions of its lower part with costal pleura; no fluid. The lower lobe is hepatized, and presents a number of patches of commencing resolution; pieces sink in water. Lower part of upper lobe slightly congested; at apex there is a wrinkled cicatrix the size of an almond, underneath which lie a cretaceous mass as large as a pea, with tubercular granulations somewhat smaller, imbedded in the lung tissue around it, in a zone one inch in diameter. Right lung exhibits only extreme congestion and oedema of upper and lower lobes; the middle lobe being normal. No trace of tubercles in this lung.

Abdomen and Contents.—The stomach is the seat of consid-

erable ecchymosis along the lesser curvature, and there are traces of this in the large *cul-de-sac*.

Kidneys of usual size ; capsules peeling off normally. Cortical portion of right kidney is perhaps a little pale.

Liver, spleen, and intestines healthy. Some urine in bladder ; is not albuminous.

Although the cord appeared healthy to the naked eye, microscopical study revealed the existence of several lesions in and about it. In the first place, there were found evidences of chronic inflammation of the pia mater and of the outer portion of the spinal cord throughout its entire length, and all around it, constituting a cortical sclerosis. Secondly, it was found that the left anterior commissure of the cord was destroyed by a mass of newly formed connective tissue, in closing blood vessels, and by an effusion, in all probability hemorrhagic in character. The destruction of the commissure extended to the cervical enlargement for a distance of several inches.

Microscopic examination showed that the granular degeneration of the ventricles was due, in all probability, to an extension of the inflammatory action, involving primarily the sub-epithelial tissue, and the epithelium only in a secondary and subordinate way.

For details of these lesions, see a report of the case, with illustrations in the American Journal of the Medical Sciences, July, 1871.

Respectfully submitted,

E. C. SEGUIN, M. D.

58 West 26th Street, New York City,

March 31st, 1871.

APPENDIX.

ADMISSION OF PATIENTS.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which such a person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons; two pairs new socks; one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under clothing, shoes and stockings corresponding to that required for the male patient, have one flannel petticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for chapel worship and out of doors exercise and riding.

4. In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the hospital from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending, and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections four and six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section five of Amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten A. M. and twelve M., and between two and four P. M., on Mondays, Wednesdays and Fridays only, but no visitors shall be admitted to the wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

FORM FOR PROBATE COURT,

*And proceedings in the matter of admission of patients under Sec. 4 of
Amended Act, Chapter CII., May Session, 1867.*

To the Hon. Court of Probate of the District of

The undersigned, First Selectman of the town of
respectfully represents that of
is an insane person, and is now, and for has been
(describe whether pauper or indigent, whether in
almshouse, or how kept, etc.) He therefore prays that your Honorable
Court will take said matter into consideration, and appoint a physician to
visit said insane person, and inquire into and investigate case, accord-
ing to the Statute Laws of Connecticut in such case made and provided,
and upon finding the allegations of this petition to be true to order said
to be taken without delay to the Hospital for
the Insane, in the town of Middletown, and State of Connecticut.

Dated 187 at Conn.

(Signed)

First Selectman,

At a Court of Probate holden at on the
day of 187 .

PRESENT : Judge.

Upon the foregoing petition and application of
First Selectman of the Town of it is ordered that
of physician, be, and he is
hereby appointed to visit said represented to be
insane, to investigate and inquire into case, and make return to this
Court of the facts concerning alleged insanity.

Attest,

Clerk.

To the Hon. Court of Probate in and for the District of

The undersigned, physician, hereby makes return
that, in pursuance of an order of this Court, passed on the
day of 187 , he visited the said
at in said represented to be insane ;

that he made a full and complete investigation of _____ in
 said case, and is of the opinion that the said _____ is
 insane, and that the prayer of said petition should be granted.

Dated at _____ this _____ day of _____ 187 .

(Signed)

Physician.

At a Court of Probate holden at _____ in and for the
 District of _____ on the _____ day of _____

PRESENT : _____ Judge.

Upon the hearing of the petition of _____ First
 Selectman of the town of _____ setting forth and showing that
 one _____ an insane person, is now _____ of said
 _____ and praying, for reasons therein set forth, that
 may be removed to the Hospital for the Insane at Middletown, as per pe-
 tition on file, this Court having investigated the case, and heard the report
 of the physician duly appointed to examine said case, doth find the alle-
 gations of said petition to be true, and it is ordered that the said
 _____ be removed without delay to the Hospital for the In-
 sane of the State of Connecticut, at Middletown.

Attest,

Clerk.

FORM OF REQUEST FOR PRIVATE PATIENTS.

*To the Superintendent of the General Hospital for Insane, at Middletown,
 Conn.*

The undersigned, of _____ county of _____ State of _____
 requests the admission into the Hospital, under your
 charge, of _____ resident of _____ county of _____
 aged _____ who has been (*here state occupation, condition, &c.*) He (or she)
 is a native of _____ and is (*here state condition or relationship*) of
 the undersigned.

(*Give here, in writing, a history of the case, when insanity commenced, and
 by what caused.*)

Dated

187 .

FORM OF PHYSICIAN'S CERTIFICATE.

I, _____ physician, of _____ county of
 State of _____ hereby certify that I have examined into (or am
 acquainted with) the state of health and mental condition of
 _____ of _____ county of _____ State of _____
 and that he (or she) is, in my opinion, insane, and a fit subject for the
 Hospital for the Insane.

Dated _____ 187 .

(Signed)

Physician.

NOTE.—The Amended Act of 1869 requires that the physician giving the certificate shall make oath or affirm.—See parts of Acts relating to admission, on the succeeding pages.

FORM OF BOND.

Know all men by these presents, That we, _____ of the
 town of _____ county of _____ State of _____ are held
 and firmly bound unto _____ Treasurer of the General
 Hospital for the Insane of the State of Connecticut, located at Middletown,
 and to his successors in office, in the sum of five hundred dollars, for the
 payment of which we jointly and severally bind ourselves by these pres-
 ents.

Whereas, _____ of the town of _____ county of
 _____ State of _____ an insane person, has been
 admitted as a boarder in the Hospital for Insane aforesaid; now, therefore,
 the condition of this obligation is, that if we shall truly pay, during h
 continuance as such boarder, h _____ board quarterly in advance, and such
 extra charges as may be occasioned by h _____ requiring more than ordinary
 care, and for such needful articles of clothing as _____ shall require, which
 shall be procured by the steward of said Hospital, and shall remove the
 said _____ when the Superintendent shall give notice of
 the need or propriety of such removal, from whatever cause, and shall also
 pay not exceeding fifty dollars for all damages _____ may do to the furniture
 or property of the Hospital, and also for reasonable charges in the event
 of death, with interest on each bill from and after the time it becomes due,
 then this obligation is void, otherwise remains in force.

Dated _____ 187 .

PARTS OF ACTS RELATING TO ADMISSIONS.

Chapter CII.—Approved 1867.

“SEC. 4. That whenever any pauper in any town may be insane, it shall be the duty of the first selectman of that town, to make application in his behalf to the Judge of Probate of the district wherein said pauper resides, for his admission to the hospital, and said judge shall appoint one regular and respectable physician, who shall fully investigate the facts of the case, and if satisfied after such investigation that the said pauper is insane, the judge shall issue an order to such first selectman, requiring him, without delay, to take such insane pauper to the hospital, where he shall be kept and supported so long as may be requisite or expedient; and one-half the expense of his support shall be defrayed by the town wherein said pauper resides, and the other half by the State; and that when a person in indigent circumstances, not a pauper, becomes insane, application may be made in his behalf to the judge of probate for the district wherein he resides and said judge shall appoint a respectable physician, who shall fully investigate the facts of the case, and if satisfied after such investigation that such indigent person is in indigent circumstances and insane, the judge shall issue an order to the person or persons making such application, directing him or them to take such indigent person to the hospital, where he shall be kept and supported so long as may be requisite or expedient; and one-half of the expenses of his support shall be paid by the State, and the other half by the parties making the application.”

“SEC. 5. That the trustees may authorize the superintendent to admit under special agreements, whenever there are vacancies in the hospital, such cases as may seek admission.”

Chapter LXXXV.—Approved 29th July, 1868.

“SEC. 1. That whenever a Judge of Probate for any district shall issue an order for the admission of any indigent insane person to the Hospital for the Insane in this State, he shall make a record of such order, and immediately transmit a duplicate of the same to the Governor of the State.”

"SEC. 2. That before any bill for the support of such indigent insane person in said hospital shall be paid by the Treasurer of the State, the same shall be approved by the Governor."

Chapter LXXX.—Approved 8th July, 1869.

"SEC. 1. Any lunatic or distracted person may be placed in a hospital, asylum, or retreat for the Insane, or other suitable place of detention, either public or private, by his or her legal guardian, or relatives, or friends in case of no guardian; but in no case without the certificate of one or more reputable physicians, after a personal examination made within one week of the date thereof, which certificate shall be duly acknowledged before some magistrate or other officer authorized to administer oaths, or take the acknowledgment of deeds in the State where given, who shall certify to the genuineness of the signature, and to the respectability of the signer.

"SEC. 2. Any lunatic or distracted person, in addition to the modes already provided for by law, may be placed in a hospital, asylum, or retreat for the insane, or other suitable place of detention, either public or private, by order of any justice of the peace who shall fully investigate the facts of the case, either with or without notice to such lunatic, and if, upon such investigation, he shall find that such lunatic or distracted person is at large, and dangerous to himself, or herself, or others, or requires hospital care and treatment, he shall order such insane person to be taken to some hospital, asylum, retreat, or other suitable place of detention, to be there kept so long as may be requisite or expedient; but no person shall be so committed without the certificate of one or more reputable physicians as specified in the next preceding section.

"SEC. 3. Any lunatic or distracted person may be placed in a hospital, asylum, retreat, or other suitable place of detention and treatment, public or private, by order of any judge of the superior court of this state, after the following course of proceedings, viz: on a statement or complaint in writing, of any respectable person, that such person is insane, and that the welfare of himself, or herself, or of others, requires his or her restraint, it shall be the duty of such judge immediately to appoint a commission who shall inquire into, and report upon the facts of the case. If in their opinion it is a suitable case for confinement, such judge shall issue his order for such disposition of such person as will secure the object and purpose of such application.

"SEC. 4. The commission provided for in the last preceding section, shall be composed of not less than three, nor more than four persons, one of whom at least shall be a physician, and another a lawyer, judge, or justice of the peace. In their inquisition they shall hear such evidence as may be offered touching the case, also the statement of the party complained of, and of his counsel. The party shall have such notice of the proceedings as said judge shall order, and said judge is hereby authorized,

to have such person placed in suitable custody, during the pendency of said proceedings.

“SEC. 5. On a written statement being addressed by any respectable person to any judge of the superior court of this state, that a certain person then confined in a hospital, asylum, or retreat for the insane, or other place of detention for the insane, is not insane, and is thus unjustly deprived of his or her liberty, such judge, at his discretion, shall appoint a commission of not less than three, nor more than four persons, one of whom at least shall be a physician, and another a lawyer, who shall hear such evidence as shall be offered touching the case, and without summoning the party before them, shall have one or more personal interviews with such person, so arranged, if possible, that such person shall not know or suspect the object or purpose of such interview. Said commission shall, within a reasonable time, make report to said judge, and if, in their opinion, the party is not insane, the said judge shall issue an order for the discharge of such person.

“SEC. 6. If the officers or managers of any hospital, asylum, retreat, or other place of detention, or any of them, shall wish for a judicial examination of a person claimed to be insane in their charge, such examination shall be had in the manner provided in the fifth section of this act.

“SEC. 7. The commission provided for in the fifth section hereof, shall not be repeated in respect to the same party oftener than once in six months, and in respect to such as are committed under the third section hereof, such commission shall not be appointed within the first six months after such commitment.

“SEC. 8. Persons placed in a hospital, asylum, retreat, or other suitable place of detention, under the first section of this act, may be removed therefrom by the party placing such person therein.

“SEC. 9. Persons placed in a hospital, asylum, retreat, or other suitable place of detention, under any of the provisions of this act, may be discharged by the authorities in whom the government of the institution is vested, pursuant to such rules and regulations as they may from time to time adopt in relation to patients and the management of the institution.

“SEC. 10. If, upon the application or complaint of any person made to any judge of the superior court of this state, that a certain person is insane, and suffering for want of proper care or treatment, upon finding the facts true, he shall order such person to be placed in some hospital, asylum, or retreat for the insane, or other suitable place of detention, at the expense of those who are legally bound to maintain such person.

“SEC. 11. The cost and expenses of any of the proceedings herein provided for, shall be paid in the manner, and by the person or party, as the magistrate or judge before whom the same shall be had, shall order and direct, and such magistrate or judge is hereby authorized to issue execution for such costs accordingly.”

TRUSTEES' REPORT.

To the Honorable,

The General Assembly of the State of Connecticut :

The Trustees of the "General Hospital for the Insane of the State of Connecticut," in presenting their Sixth Annual Report, ending 31st March last, acknowledge, with gratitude to God, the good which has been effected in the Institution, its freedom from marked and contagious diseases, and the very small percentage of deaths within its walls, during the year past.

They refer with satisfaction to the able reports of the Superintendent and others, submitted herewith, in which receipts, disbursements, products of farm, statistics, etc., are fully set forth.

It will be seen from Dr. Shew's statements, with what pleasure he hails the completion of the women's wing, already begun under a special Committee of the State, and expected to be ready for occupation by the 1st of January, 1873—and how earnestly he pleads for an appropriation for the men's wing, in order that the evils of the present overcrowded condition of the building, and of too long delay in receiving patients, may be remedied by increased accommodations.

The remarks of the Superintendent in relation to Insane Convicts, to the placing them in same wards with those innocent of crime, and to making provision for separate accommodation for them, deserve serious attention.

It is known to many members of the Legislature that a town-road has existed just to the East of the Hospital buildings, dividing the property belonging to the State. The Town of Middletown, equally with the Trustees and officers of the Hospital, united in an opinion of the benefit which would ensue from closing said road, and bringing the grounds adjoining the Institution within one enclosure.

To effect this amicably, and set aside any local opposition, it was needful to acquire control of about fourteen acres of land, and three dwelling houses thereon. Shortly before the close of the session of 1871, negotiations for the purchase were brought to a point, and the tract of land which had been the cause of preventing the junction of the two parts of the Hospital grounds, came into the possession of the Trustees. Consultation with certain leading members of the Legislature, and officers of the State, to whom the matter had been explained, confirmed the action of the Trustees, and they were assured that an early appropriation would be recommended, with which to cancel the notes of hand given individually by members of the Board, upon which notes was borrowed the money to buy this land for the State. But in the press of Legislative business, at the winding up of the session, the providing of the means was unfortunately omitted.

The Trustees respectfully ask an early appropriation of seventeen thousand five hundred dollars, and the interest on the notes given by the individual members of the Board.

The Town of Middletown has voted to close this road, and has, for the convenience of the public, opened another road West of the Hospital.

The houses purchased have been altered, and a partial trial of the "Cottage System" has been made, comments on which will be found in the Superintendent's report. It does not appear to be as economical a system as the "Congregate," nor as acceptable generally to the patients.

The Special Committee on the affairs of the Hospital, appointed in 1870, made their printed Report to the General Assembly of 1871, and among favorable notices, approved warmly of the wisdom, and even "generosity" of individuals of the Board, who had, on their private credit, provided twenty-five thousand dollars, as a working capital for the business department of the Institution, with which cash purchases could be made of supplies, etc., absolutely needed by the Hospital. That Committee reported in favor of an appropriation with which to retire the individual notes, given for the benefit of the State of Connecticut. That appropriation was not made—those notes yet remain in the possession of two Savings Banks in the city of Middletown. The Trustees respectfully ask that the retiring of these notes may be made early practicable by a prompt vote

of the money by your Honorable Body. The benefit of such a ready-cash capital, affording means to purchase at cash rates, secure discounts on supplies, and preserve a high financial credit for the Institution, will be apparent to every member of the Legislature. Every cent thus saved and gained, has been saved and gained *for the State*—yet it has been done by *individual responsibility*.

The Trustees are well satisfied with the interior working of the Hospital, and feel in their hearts to commend highly the officers and employés, by whose agencies the work is done.

It is hoped that the Legislature, as a Body, or by their Committee on Humane Institutions—in their fostering oversight of this great organ of the Humanity and Charity of the State, will, at an early day of the session, visit the Hospital, and so be prepared by personal knowledge to do what shall, in their good judgment, be for the best interests of the State in this direction.

In the regular order, the terms of service of two members of the Board expire each year—the places of those from Fairfield and Litchfield counties are to be filled.

Very respectfully submitted,

MARSHALL JEWELL,	Hartford.
ROBBINS BATTELL,	Norfolk.
SAMUEL LYNES, M. D.,	Norwalk.
H. SIDNEY HAYDEN,	Windsor.
LUCIUS S. FULLER,	Tolland.

SUPERINTENDENT'S REPORT

TO THE

BOARD OF TRUSTEES.

GENTLEMEN :—With the close of another year it becomes my duty to submit the Sixth Annual Report of the General Hospital for the Insane of the State of Connecticut.

The tables herewith presented are carefully drawn from our permanent records, and will show the result of the last year's labors, as well as a statistical history of the Institution from its opening in April, 1868.

To those who, by frequent visits, have been informed of the general condition of the Institution, it may seem needless to recapitulate details which have attended the usual professional and other labor here performed.

It should be remembered, however, that the annual report of a public institution ought to furnish to the public a summary of such facts as are of interest to every citizen in the commonwealth; and that these facts, so familiar to us, will, in the general distribution, reach a large number of readers who are not conversant with the character and aims of an institution for the Insane.

Results already attained during the brief history of this Hospital furnish direct evidence of its usefulness. Applications for admission constantly increase, and are already far beyond the capacity of the present structure.

To meet these demands I appeal to you for an enlarged building, increased accommodations, and the continuance of your hitherto hearty and generous encouragement.

On the 31st of March, 1871, there were in the Institution two hundred and thirty-seven (237) patients, of whom one hundred

and nineteen (119) were males and one hundred and eighteen (118) were females. During the last twelve months there have been admitted fifty-six (56) males and thirty-six (36) females, ninety-two (92) in all, making the number under treatment for the year three hundred and twenty-nine (329), one hundred and seventy-five (175) males and one hundred and fifty-four (154) females. Of these were discharged:

<i>Recovered,</i>	seventeen (17),	eleven (11) males,	six (6) females.
<i>Improved,</i>	eleven (11),	seven (7) “	four (4) “
<i>Unimproved,</i>	twenty-four (24),	fourteen (14) “	ten (10) “
<i>Died,</i>	fifteen (15),	nine (9) “	six (6) “

Remaining at this date, one hundred and thirty-four (134) males and one hundred and twenty-eight (128) females, two hundred and sixty-two (262) in all. The daily average during the year is 242.64. No other testimony is needed to prove the wise forethought of those who, only six years ago, were most urgent in their efforts to establish a general hospital for the insane of Connecticut.

It will be noticed that ninety-two (92) patients were admitted, thus making the total number of persons under treatment greatly in excess of any previous year. The applications for the same period were 178.

The painful fact of these numerous applications, however, does not afford an exact criterion of the increasing demands for such an Institution.

The selectmen of towns and probate judges, knowing that the house is overerowed, have made application only for such persons as were unmanageable at home; your officers are informed of many who would apply if there were a prospect of immediate or early reception.

The Act of Incorporation provides for the admission of three classes of patients, viz.: the town poor, the indigent, and private or self-supporting patients. By subsequent resolution of the General Assembly, the officers of this Hospital were directed to receive and hold such insane convicts as might, by due process of law, be transferred from the State Prison at Wethersfield.

Of these four classes there are at present one hundred and eighty-four (184) pauper patients, seventy (70) indigent patients, two (2) private patients, and six (6) insane convicts.

This simple statement bears evidence to the fact that the people of Connecticut desire to protect first the afflicted poor, and then those who are able to bear a part or the whole of the ex-

pense of their support. But is it generally known that the policy adopted in 1866 to provide for the insane of Connecticut has been only partially carried out? Do the people of this Commonwealth understand that, while accommodations have been provided for about two hundred and fifty patients, there are at least as many more cases knocking at our doors for admission? I am sure that the urgent appeals, the pitiful stories of suffering and danger daily brought to the notice of your Superintendent, if heard in the legislative halls, would move to pity the hardest hearts.

At the last session of the General Assembly an appropriation was made for the erection of another wing, for the accommodation of one hundred and twenty-five female patients. Work on it is vigorously prosecuted, and it is expected the building will be opened on or before January 1st, 1873. With this large addition to the present building, rooms will be provided for all female patients without previous application. I trust the need will be apparent to the General Assembly to provide the amount to erect a corresponding wing on the South side, for the reception of male patients, to carry out the plan of the Hospital. The building would then have ample accommodations to meet the demands of the State for the next few years.

It is perhaps not generally known that the present policy of the State is, to receive patients in the regular order of application, which mode virtually excludes, at the time of greatest need, acute cases—requiring imperatively immediate hospital care—from the benefits of prompt, systematic treatment.

By referring to table No. XXVII, it will be seen that there are at this date two hundred and forty-two (242) chronic cases in our wards (our inheritance of old almshouse treatment), and only twenty (20) whose restoration to health may be hopefully anticipated.

By studying table No. XIV, you perceive that of five hundred and sixty-nine (569) patients admitted since the Institution was opened—three hundred and forty-eight (348) were brought to us after the disease had existed more than one year, and two hundred and ninety-two (292) of these more than two years. Under these circumstances our tables cannot show a large percentage of recoveries. The Hospital is doing its allotted work none the less usefully by providing for the chronic insane, a majority of whom are troublesome and dangerous to the community when at large.

It is undoubtedly true that the State has already provided ample accommodations for nearly all of this class, facts in our possession showing that only a few deranged persons remain in the almshouses.*

Every consideration, then, of sound policy, true economy and wise philanthropy would seem to require that the comparatively small additional appropriation needed to finish the Hospital, should be made, to relieve the sufferings of those remaining in the almshouses, as well as to promptly provide for the admission of recent cases, as they constantly occur.

The following words from my last Annual Report are none the less true to-day, and hence will bear repetition :

“A serious consequence of the present policy pursued by the State in affording accommodations only to a limited number of its insane, will be a gradual but steady increase of the number of chronic cases, and it is easy to calculate that in a few years it will cost more money to support the chronic insane than it would now to finish this building in accordance with the original design, and thus be able to receive promptly all cases in the early stages of the disease when they are more readily cured, and more likely to be soon returned to their vocations and families.”

“In a population as large as that of Connecticut, experience shows that about 250 new or acute cases of insanity will annually occur, the majority from the laboring and active classes of life. These, to be rightly dealt with, in view of their cure and restoration to their several kinds of profitable labor, need hospital accommodations at once. It is so well known as to be almost needless to repeat, that Insane patients cannot be, advantageously to themselves or community, treated in almshouses or at their own homes.”

During the past few years, the question of the proper care and treatment of insane criminals has attracted the earnest attention of philanthropists and thoughtful people of all lands interested in the improvement of prisons.

Recognizing the fact that prison walls, close cells and constant confinement are not compatible with the welfare of deranged persons, the Legislature of the State of New York, in 1858, made an appropriation for the erection at Auburn of an asylum for

* While writing this, I have received an application from New Haven, for accommodations for “over twenty insane persons” “now in the almshouse,” and for “several more” “at institutions out of the State.”

insane convicts. The building is commodious, well planned, and organized as other State institutions, and to it are sent insane convicts and persons charged with crime where insanity is suspected.

Some other States with smaller population have amended their statutes so as to authorize the Governor, after being satisfied of the insanity of convicts, to send them to State hospitals. In 1869 the Committee on Prisons of the General Assembly of this State reported the astounding fact that there were several insane convicts at Wethersfield, closely confined in damp cells, without suitable provision for comfort or treatment.

Acting upon this information the following resolution was promptly adopted:

“Resolved by this Assembly:—That the Trustees of the General Hospital for the Insane of the State of Connecticut, are hereby required and directed to make suitable provision for the reception of said insane convicts into the institution under their care and direction.”

The two additional resolutions specify the manner in which the spirit of this resolution shall be carried out.

In compliance with the provisions of this act, eight prisoners have been sent to us from Wethersfield—one of whom died, and one eloped, leaving six the present number of this class in the Hospital.

Without attempting to discuss the question as to the justice or injustice of placing criminal insane in contact and hourly association with innocent persons, I would suggest a plan by which ample justice may be done to both classes without subjecting the Institution to ungenerous criticism.

An appropriation of five thousand (\$5,000) dollars would enable you to reconstruct and furnish a stone building situated in the rear of the Hospital, which has heretofore been used for shop purposes. This building was erected with the ulterior view of being used for some such purpose; it is of stone, 27×52 feet, two stories in height, with a Mansard roof. It could be arranged to accommodate twelve patients of this class, securing for them humane hospital treatment while separated from the larger body of innocent persons occupying our wards.

When friends and relatives of patients come to visit them, the first remark often made is, *“I hope my brother is not on a ward with criminals.”* A negative reply can generally be given, but

occasionally I am obliged to confess that the person referred to is not only the companion, but also, in our crowded building, the room-mate of criminals.

The good people of Connecticut, ever ready to respond to the calls of the suffering, have decided to provide humanely for these poor creatures; but I cannot believe that they wish to have the present unsatisfactory arrangement perpetuated for want of the expenditure of so small a sum, which would remove all objections.

During the past four months we have had an opportunity of making a partial trial of the "Cottage System." Two dwelling houses situated a few rods south of the main building, on the land recently purchased for the Hospital, were refitted and furnished in a plain manner for the occupation of fourteen (14) male and sixteen (16) female patients, selected from the class of quiet chronic cases. The buildings are simple wooden structures, heated by coal stoves and lighted by common oil lamps. Every precaution possible has been taken, and yet they are liable to be burned at any moment. The only means of ventilating these houses is by opening windows and doors.

The plan was not adopted from choice; it was resorted to as a temporary measure to provide immediate accommodations for thirty poor insane persons until the permanent wings of the Hospital could be erected.

Sufficient time has elapsed to convince me that, under more favorable circumstances, the "Cottage System" can be made to play an important part in connection with a regularly organized Hospital. There is a certain air of social comfort, more like the ordinary home life, pervading these cottages, than can be found in the wards of a hospital. I have already witnessed a favorable change in the conduct and disposition of one noisy, troublesome, chronic patient since her removal to the cottage for females, leading us to entertain the hope that she will eventually recover. But, on the other hand, I find that very few of these "would be willing long to exchange the activities and the social good cheer of the larger numbers for the monotony and dullness of the isolated cottage." The system, I believe, can be applied only to a limited number. A few cottages substantially constructed of brick or stone, situated sufficiently near the main building to be properly heated by steam and lighted by gas from the common center, would be a desirable addition to our present methods of

caring for the insane. With this arrangement the Superintendent would, *from day to day*, transfer to the cottages such patients as he found in condition to require fewer restraints upon their personal liberty.

Water Supply.

The supply of water for a hospital should be pure, abundant at all seasons, and of the proper chemical composition to adapt it to the various uses of a public institution. In this respect your location possesses superior advantages. Perhaps a brief description of the reservoir and connecting pipes will aid those who are locating similar Institutions.

At a distance of one and a half miles from the building, is an interesting geological range of hills, known as the "White Rocks." These hills are nearly destitute of soil and vegetation, but thousands of springs bubble forth from crevices in the rock, unite and form streams of considerable size, which pass into the Connecticut River through a number of ravines. On one of these streams, known as "Trout Brook" or "Butler's Creek," a reservoir covering about two acres, was formed by making a substantial dam across the ravine. This dam or embankment is one hundred and fifty (150) feet in length, fifteen (15) feet in width across the top, with a slant each way of eighteen (18) inches to every twelve (12) inches perpendicular. The inner slope is covered with broken stone; the top is four feet above high water mark. A large waste canal, cut in the rocks on one side of the dam, carries off surplus water. The bottom of the reservoir was thoroughly grubbed of vegetable matter and soil before being used. The average depth of water is about four (4) feet; elevation above the ground floor of the Hospital seventy-four (74) feet. From this reservoir a six-inch iron pipe conveys the water to the building. At suitable low points "blow-offs" were put in the main pipe, by which sediment can be removed.

The quality of the water is unexceptionable, and in ordinary seasons, of sufficient quantity to supply several institutions of this size. During the greater portion of the year the amount of water passing off through the waste canal would be considered sufficient for a good mill privilege.

General Results.

Fifteen (15) deaths occurred during the year. There were in April one (1), in May one (1), in August one (1), in September

two (2), in November three (3), in December one (1), in January three (3), in February two (2), and in March one (1). Thus it will be seen that the rate of mortality, calculated upon the whole number treated, is 4.55 per cent. The average age was 51.8 years. Nine (9) deaths occurred among one hundred and seventy-five (175) male patients, and six (6) among one hundred and fifty-four (154) female patients. A large proportion of the deaths were due to the slow and gradually debilitating influence of diseases of the nervous system long continued. Only three patients died of acute disease.

We have continued the use of chloral in nearly all cases of wakefulness and irritability, and have had the satisfaction of witnessing marked improvement in some and complete recovery in others. Our experience during the past twelve months would seem to substantiate the conclusions previously arrived at and explained in my last report. Other medicinal remedies have of course been used as necessity required.

We have found the thermometer of practical value in the treatment of diseases of the nervous system. A greater familiarity with its uses will, I am sure, place it among the most valuable instruments of practical diagnosis.

Your pathologist, Dr. Seguin, has made a critical examination in a case of General Paresis (that most formidable of all diseases), the results of which are fully set forth in his report herewith transmitted. Similar carefulness and completeness of examination of a few of such cases would undoubtedly throw much light upon a field of physiological and pathological domain hitherto nearly unexplored.

During the year much has been done in the way of general improvements that will bear a passing notice. A substantial post and board fence has been made to enclose our reservoir—the result of labor performed mainly by patients and attendants. Three hundred (300) young apple, pear and plum trees were purchased in October, and carefully transplanted; also a large number of raspberry and gooseberry and currant bushes and several varieties of grape vines. The first cost of these is trifling in comparison with the profitable results hoped for in years to come. Roads and walks have been made and ornamental trees and shrubs started around the building; much more remains to be done in this direction, and healthy employment can be given for years to such of our inmates as are suited to out-door labor.

Several large storerooms have been finished off in the basement of the center building, into which the general supplies are received. The ventilating flues from the rooms in the intermediate wing which previously terminated in the attic, discharging their contents through one large opening, have been prolonged independently, in stacks of six flues, above the roof, thereby increasing their efficiency, while lessening danger from fire. It is proposed to continue a similar much needed improvement in the south wing.

The high board fence referred to in my last report has been completed, with the exception of a few rods, where it is to cross the old highway recently closed by a vote of the Town. To insure protection against intrusion on the grounds of the Hospital, a small building is needed near the principal entrance, to be occupied by a man of small family, whose duty would be to keep in order the roads and walks, to open and close the gate for visitors, and prevent the incursion of cattle and damage to grounds and crops from the carelessness of those neglecting to close the gate. It is evident that such an arrangement would prove a great convenience to the Hospital and to the public.

Mr. Clinton B. Weatherbee continues the supervision of the Hospital farm. Referring to a subjoined list of products, it will be seen that his labors have been successful and profitable.

The total of valuation is about the same as that of last year. A comparison of quantities, however, shows the pleasing fact that last year's crops were nearly double those of any corresponding period. As all products of the farm are used in the Institution, the quality and quantity are of far greater importance than the market price. The increase in quantity is attributable to a favorable season, additional labor of patients and improved condition of the land. It is our aim to gradually bring under tillage all parts of the farm, and by a system of drainage and use of the house sewage, to enrich and improve land which has been heretofore of little value.

I am not able to report the exact number of days' labor performed by convalescent and quiet chronic patients. Appreciating the restorative value of systematic out-door employment, I have endeavored to encourage those who desire to work, or whom we judge would be benefited by light occupation. During the summer season, from fifteen (15) to thirty (30) male patients assisted on the farm: many more were regularly engaged about the

grounds and buildings. A fair proportion of the female patients were occupied in the sewing room, laundry and kitchen, and much of the routine work on the wards was performed even by others who needed to be judiciously watched.

Financial Condition.

The regular Hospital revenue has been sufficient to meet the current wants of the Institution during the year.

From the Treasurer's report and Steward's detailed statement herewith submitted, it will be seen that the Hospital received from all sources (including cash on hand and balance with Treasurer at the beginning of the year) the sum of \$76,809.40, and that the total expenditures during the same period were \$75,573.32, leaving a balance with Treasurer and cash on hand of \$1,236.08.

Favorable contracts at low rates have already been made for the coal needed during the next twelve months.

Acknowledgments.

The subjoined list of newspapers and magazines has been received during the year, for which we are under renewed obligations:

Hartford Daily Courant,	Hartford, Conn.
" Evening Post,	" "
" Weekly Times,	" "

Manchester, N. H.
 New York.
 " "
 Boston, Mass.
 Philadelphia, Pa.

Many friends of the insane have continued to manifest their interest by contributions of various kinds:

Mr. A. B. Gillette, of Hartford, added to our library a complete set (32 vols.) of J. Fennimore Cooper's novels, substantially bound expressly for hospital use; Mrs. Frederick W. Hubbard, 4 bound volumes Atlantic Monthly, 2 volumes Ladies' Repository, and Life of Gen. Lyon; Miss Mary Roberts, 6 volumes Eclectic Magazine and other books; several books, illustrated papers, puzzles, and baskets of flowers from Mrs. Roekwell; from the estate of Miss Jane Cooper, several volumes and magazines; McLean & Co., complete set of Dickens' works, diamond edition; Mrs. Dyson, books, engravings and maps; Charles E. Kent, Esq., several volumes Appletons' Journal, Hearth and Home, American Agriculturalist, and other papers; Wm. T. Gleason, Esq., 18 books; from a Friend, of New Haven, 2 copies of Illustrated Christian Weekly; a complete file of the London Illustrated News for the year 1871, from Mrs. Fellowes; a Kidder's battery from A. M. Smith, Esq., of New Haven; Rev. I. H. Bradford, Superintendent Industrial School for Girls, 12 Trophy tomato plants; and many valuable tokens of interest from Mrs. Hubbard, Rev. Mr. Thorne and M. B. Copeland, Esq.

We are indebted to the South Congregational Church Choir of Middletown, and to Mr. Parsons and friends of New Britain, for two delightful musical entertainments.

Our chapel services have been conducted regularly on every Sabbath afternoon during the year by the clergymen of Middletown and vicinity. Much interest is manifested by the patients, and few interruptions occur to mar the sacredness of these gatherings.

No changes have occurred in the staff of officers, and but few among the employed in the various positions in and about the Hospital. I desire to express my deep obligations to all associated with me in places of trust, who have conscientiously assisted in sharing the burdens incident to hospital life.

To the members of your Board, I am greatly indebted for hearty and intelligent co-operation and personal kindness. The trying life of those devoted to the care of the insane here, is made lighter by your sympathy and care. It is our highest aim to attain for this Institution the greatest measure of usefulness of which it is capable.

For all our blessings and for that protection which has guarded us from so many dangers, renewed acknowledgments are due to an overruling Providence. Reverently invoking His blessing, I again commend this Institution to your continued oversight and to the fostering aid of an enlightened Commonwealth.

Respectfully submitted,

ABRAM MARVIN SHEW,

Superintendent.

Middletown, Conn., March 31, 1872.

TREASURER'S REPORT.

The following statement of the fiscal concerns of "The General Hospital for the Insane of the State of Connecticut," for the year commencing April 1st, 1871, and ending March 31st, 1872, is respectfully submitted to the Board of Trustees :

Receipts.

Balance in Treasurer's hands, April 1st, 1871.	\$ 887.85
Revenue Account from the Hospital, -	75,699.14
	<hr/> \$76,586.99

Payments.

Amount of Superintendent's Orders, -	\$75,495.42
Balance in Treasurer's hands, March 31st, 1872,	1,091.57
	<hr/> \$76,586.99

All of which is respectfully submitted.

M. B. COPELAND,

Treasurer.

Middletown, Conn., April 1st, 1872.

We hereby certify that we have examined the vouchers and accounts of the Treasurer, of which the above is an abstract, and find them correct.

APPENDIX.

ADMISSION OF PATIENTS.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which the person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woollen coat, one woollen vest, one pair of woollen pantaloons, two pairs new socks, one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under clothing, shoes and stockings corresponding to that required for the male patient, have one flannel petticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for chapel worship and out-of-doors exercise and riding.

4. In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the Hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending, and attendance, for all who are supported at the public charge, is five dollars per week.

7. Panper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections Four and Six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section Four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section Five of Amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten A. M. and twelve M., and between two and four P. M., on Mondays, Wednesdays and Fridays only, but no visitors shall be admitted to the wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

TRUSTEES' REPORT.

To the Honorable, the General Assembly of the
STATE OF CONNECTICUT:

The Board of Trustees of the "General Hospital for the Insane of the State of Connecticut," at Middletown, herewith submit their Seventh Annual Report.

In so doing they would acknowledge with devout gratitude the Divine goodness which has continued to bless the Hospital, and has given it a year of unusual prosperity. The benefits that the patients receive from the skillful treatment and healthful influences it affords are increasingly apparent.

The encouraging facts relating to the interior management and successful working of this Institution during the year, ending March 31st, 1873, are set forth in the annexed Report of the Superintendent, and its financial condition in that of the Treasurer.

The additional north wing, voted by the Legislature of 1871, has been opened for the reception of female patients, of whom a large number were waiting for admission. The corresponding south wing, to which money was appropriated by the Legislature last year, has been pushed forward by the Commissioners as rapidly as circumstances would admit.

The houses purchased in 1871, and used as cottages for quiet patients, prove a valuable auxiliary to the Hospital. The time may come when it will be wise to increase the number of these buildings.

The street across the grounds in the rear of the Hospital, so long a fruitful source of trouble has been peaceably closed.

The financial condition of the Hospital, as shown by the Report of the Superintendent and of the Treasurer, is such as to afford satisfaction to all its friends. The care with which

purchases of provisions are made, the excellent and profitable management of the farm, the exactness of the system by which the accounts are kept, all these afford good ground for confidence in the economy and skill of its administration.

The value of what may be called the working capital of the Hospital, as ascertained by a careful inventory, has increased since April, 1872.

The Superintendent and his assistants, who have remained through the year, have so ably and successfully performed their various and often trying duties as to deserve a continuance of our personal regard and hearty support.

The necessity for the Hospital and its firm hold upon the intelligent sympathy of the citizens of Connecticut have, in the year past, been more than ever apparent. Its fitness to do the beneficent work of caring for the insane of the State, for which it was chartered, becomes more evident as its facilities are augmented, the large and increasing number of those needing its help more reliably ascertained, and it is generally understood that it possesses means, inferior to none yet discovered, of effecting a permanent cure of its patients: or failing in that, of humanely and tenderly ministering to their necessities while they remain within its walls.

No appropriation is asked for the Hospital this year.

The official term of the members of this Board from the counties of Hartford and Tolland terminates in 1873.

Very respectfully submitted,

MARSHALL JEWELL,	Hartford,
H. SIDNEY HAYDEN,	Windsor,
LUCIUS S. FULLER,	Tolland,
SAMUEL G. WILLARD,	Colchester,
JOSEPH D. BATES,	Danielsonville,
RICHARD S. FELLOWES,	New Haven,
HENRY WOODWARD,	Middletown,
ROBBINS BATTLE,	Norfolk,
SAMUEL LYNES, M. D.,	Norwalk,
BENJAMIN DOUGLAS,	Middletown,
JULIUS HOTCHKISS,	"
JOSEPH CUMMINGS,	"

SUPERINTENDENT'S REPORT

TO THE

BOARD OF TRUSTEES.

GENTLEMEN :— The Seventh Annual Report of the General Hospital for the Insane of the State of Connecticut, for the fiscal year ending March 31st, 1873, is respectfully submitted.

The number of persons admitted and discharged and the results of treatment are given in the annexed tables.

It will be noticed that three hundred and thirty-six (336) persons (all from Connecticut) have received the protecting care of the Hospital and enjoyed its privileges during the year. The number of applications for admission was one hundred and ninety (190).

Of the four classes for whom provision is legally made, there have been two hundred and seventeen (217) pauper patients, ninety-eight (98) indigent patients, twelve (12) private patients, and nine (9) insane convicts.

Referring to table No. 1, you observe that eleven (11) persons have been discharged "Recovered." This number includes only those whose restoration to health is complete and positive : in whom there is no more reason to anticipate another attack of mental derangement than in the same number of sane persons selected from society in general. It does not include those who have recovered from the delirium caused by chronic inebriety.

Under the second class, "Improved," are numbered many discharged persons whose restoration to health was considered complete, or assured, and who were permitted to leave the Hospital to make room for more urgent cases. Subsequent information has usually justified this course of action. A wise precaution would, however, often dictate a longer stay until

the mind had become strong and accustomed to act under the influence of new surroundings.

Under the third class, "Stationary," are enumerated all inebriates, whatever may have been their condition when discharged. Some of these continue temperate for years after leaving the Hospital; others resist temptation for a while but finally succumb to the power of appetite and diseased organization. Hence it seems correct to class all such cases among those who are "Stationary." This division also includes a large number of quiet chronic cases who were removed by the Selectmen or judicial authorities to make room for dangerous and destructive patients.

The number of deaths during the year is equal to 6.25 per cent of the total number under treatment and 7.93 per cent of the daily average. This shows a slight increase of mortality compared with the Report of last year, but is still below the average death-rate in hospitals for the insane. Among the alleged causes of death (see Table XXII), you will note an absence of specific cerebral disorders in a majority of the cases. One patient was brought to the Hospital in an unconscious condition and only survived four days. Another case of acute mania which was delivered at the Hospital literally bound from "head to foot" with a clothes line, (an antiquated, improper and needless mode of restraint), died on the eighth day. Deaths occurred in months as follows: in April one (1), in May three (3), in June five (5), in August two (2), in September one (1), in October one (1), in November one (1), in December four (4), in February one (1), and in March two (2.) It thus appears that the mortality in the six warm months exceeded that in the six cold months. The average age was 47.90 years. There were eleven (11) deaths among one hundred and seventy-seven (177) male patients, and nine (9) among one hundred and fifty-nine (159) female patients. The causes are given in table XXII. In my report of last year your attention was directed to the fact that of two hundred and sixty-two (262) patients remaining on the 31st day of March, 1872, two hundred and forty-two (242) were chronic cases in whom the disease had lasted from two to forty years. Owing to the policy of receiving patients in the regular order

of application nearly all of the seventy-four (74) admitted since that date have belonged to the same class. With the exception of nine (9) or ten (10), all of this number have been kept from six to twelve months awaiting their chance. Repeatedly have I been obliged to deny admission to urgent cases from this immediate vicinity and seek accommodations for them elsewhere. It is, therefore, with profound satisfaction that I anticipate the early completion of the new north wing. The addition of these four wards, with accommodations for one hundred female patients, will lessen our labors while increasing our numbers. Experience teaches the advantages derived from a judicious classification: without it, successful treatment is almost an impossibility. Thus far in the history of this Institution, the success attained has been accomplished under the disadvantages of an over-crowded building, and hence a lack of proper classification.

At the last annual meeting of "The Association of Medical Superintendents of American Institutions for the Insane," held at Madison, Wisconsin, the following resolutions were unanimously adopted and commended to the consideration of all having authority in the management of Hospitals for the insane:—

Resolved, That this Association regards the custom of admitting a greater number of patients than the buildings can properly accommodate, which is now becoming so common in Hospitals for the Insane in nearly every section of the country, as an evil of great magnitude, productive of extraordinary dangers, subversive of the good order, perfect discipline and greatest usefulness of these institutions, and of the best interests of the insane.

Resolved, That this Association, having repeatedly affirmed its well-matured convictions of the humanity, expediency and economy of every State making ample provision for all its insane, regards it as an important means of effecting this object that these institutions should be kept in the highest state of efficiency, and the difference in condition of patients treated in them, and those kept in almshouses, jails, or even private houses, be thus most clearly demonstrated.

Resolved, That while fully recognizing the great suffering and serious loss that must result to individuals by their exclusion from hospitals when laboring under an attack of insanity, this Association fully believes that the greatest good will result to the largest number, and at the earliest day, by the adoption of the course now indicated.

Resolved, That the boards of management of the different hospitals on this continent be urged, most earnestly, to adopt such measures as will effectually prevent more patients being admitted into their respective institutions, than,

in the opinions of their superintendents can be treated with the greatest efficiency, and without impairing the welfare of their fellow sufferers.

Resolved, That the Secretary be instructed to furnish a copy of these resolutions to the boards of management of the different hospitals for the insane in the United States and the British Provinces.

MAY 30th, 1872.

At the present time, when so much is being said about the Plea of Insanity in criminal cases, it may interest thoughtful people to know that in Connecticut persons accused of crime and acquitted by reason of mental derangement are sent to this Institution for custodial treatment. During the period covered by this report, twelve (12) persons of this class have been received, the majority of whom are still under treatment. Authority for this mode of procedure is found in an amendment to Section two hundred and forty-three (243) of the Act concerning crimes and punishments, and is as follows: "Whenever any person, tried on any criminal charge, shall be acquitted on the ground of insanity or dementia, the court before which the trial shall be had, may, if it shall deem it proper, order such person to be confined in The General Hospital for the Insane of the State of Connecticut, for such time as said court shall direct."

General Improvements.

During the year much has been done in the way of general improvements. To enumerate all in detail would require considerable time and space. I will mention such as seem of special interest. Early in the season a large and substantial coal-shed, capable of storing five hundred (500) tons, was erected near the Hospital wharf and Conn. Valley Railroad. By this arrangement, a cargo can be unloaded rapidly at any season of the year and kept under cover until such time as the Hospital teams can be advantageously used in hauling it to the building.

Up to the present time our facilities for keeping ice have been equal to about two-thirds ($\frac{2}{3}$) of the quantity required. To meet the increased demand incident to an accession of numbers it was decided to build near the Hospital Reservoir a house of sufficient size to store seventy (70) tons. This building was completed and filled during the winter.

Last October two cow sheds, each sixty feet in length, with stalls for twenty-eight (28) head of cattle, and a piggery eighty feet in length, were added to the large Hospital barn; also several root bins in the cellar.

Many other improvements and additions will be made as soon as the funds will admit.

During the coming summer I trust that much needed work in filling and grading grounds in front of the Hospital, in laying out walks and roads and in starting shrubbery and trees may be done. Owing to the rough and unfinished condition of the land immediately surrounding the building it has been impossible to direct out-door exercises and sports, except in the mildest weather. Under these circumstances, the yards connected with the wards for excitable patients have been of incalculable benefit.

Farm.

The Hospital farm has furnished nearly enough vegetables to supply our wants. Mr. Weatherbee continues to direct this portion of labor with energy, skill and faithfulness. Improvements have been made in fences, ditches, roads and barns. Stock has been added from time to time as the growth of the family seemed to require; in fact, we point with satisfaction to the subjoined list of farm products, as the only statement needed to disprove the assertion that the "farm" was an "expensive luxury." Aside from its value as a producing source, it is of incalculable advantage to a large proportion of chronic male patients, affording them an opportunity for healthful out-door employment, such as they could not have in any other way. The all-important question in the management and treatment of the insane after the acute stage, is how to properly occupy their time and attention during the months of convalescence or years of chronic derangement. It is during this period that the mental faculties either become stimulated into healthful action, or depressed into a state of lethargy and indifference, which soon tends towards dementia. Public opinion will not now sanction the course here suggested, but I believe the time is not far distant when all Superintendents

will be required to prescribe work and employment for their patients as they now do medicines and amusements.

Cottage System.

I can conscientiously and gladly confirm what our last report contained on this subject. In spite of the crude and disadvantageous way in which we are making trial of it, the results are favorable. It will be pleasant to the friends of the insane to know that in the woman's cottage, containing as the average of the year past about fifteen (15), almost wholly of the demented class, there has been no special sickness, no quarrelling, and their being thus grouped under sagacious attendants has developed a power of setting themselves to work which has surprised us. For example, 64 pairs of stockings have been knit, 84 towels and 140 yards of toweling have been hemmed for our new north wing, 52 handkerchiefs and 30 bed-spreads were hemmed and much repairing done; and all this from our most mentally wrecked ones.

It shows that with wise attendants much happiness may be brought by suitable employments, even to such wretched ones. besides giving substantial results for the Institution. The very success with our imperfect little two cottages, makes me long for the day when it will be in your power to order the erection of more structures adapted expressly to the wants of the men and women who would be benefitted by the Cottage System.

A Transfer Home.

All having care of convalescent insane are conscious of the powerful effect of what I may call a sense of timidity, which operates on patients who are so well recovered as to reflect on the prospect of their leaving the wards, and entering again the scenes of an active world. Many instinctively shrink from going away, as they reflect on the position out of which they have come and forward to busy events, it is no wonder they feel sensitively all the expected questionings and actions of the renewed contact with acquaintances and friends. It is just here that I am made to feel a want for our Institution, namely, what I have called for lack of a better name, a Transfer Home, where these convalescents could be transferred to remain from a week to a month, to remove the tinge of delusions, and in getting used to sane companions, and in recovering the tone of mind, heart, spirit and manners in view of an early return to their occupations and homes. As inflammation of the eyes requires confinement in a darkened room, and on the removal of the evil, light is gradually introduced, so as not to wound but to strengthen the delicate visual organs, so in diseases of the brain, in recovering from them, there are stages of freedom to be attained even slowly, until the full restoration.

Receipts and Expenditures.

By referring to the detailed statement herewith submitted, you will observe that the Hospital received from all sources, (including balance with Treasurer and cash on hand April 1st, 1872,) the sum of seventy-nine thousand, seven hundred and ninety-three dollars and thirty-eight cents (\$79,793.38), and that the total expenditures during the same period, were seventy-seven thousand, nine hundred and eighty-one dollars and fifty-six cents (\$77,981.56), leaving a balance with Treasurer and cash on hand of \$1,811.82.

Religious services have been conducted regularly every Sabbath afternoon during the year by the Clergymen of Middletown and vicinity. About one-half of all the patients are in condition to attend and enjoy these exercises. In their be-

half I desire thus publicly to acknowledge the obligation we are under to those gentlemen who have, gratuitously, and at much personal inconvenience, rendered this service. Much has been done during the year by officers, employees and friends to amuse and instruct those committed to our care. Many valuable slides were added to the collection, and the Stereopticon was used one evening in the week, except when the time was occupied by lectures, readings, or concerts. The usual dancing parties have been continued during the cool season of the year.

To the Rev. C. M. Loomis we are indebted for an interesting lecture on South Western Africa, illustrated by drawings and the exhibition of implements and weapons used by the natives.

To Mr. Barnabee and troupe for one of their inimitable musical entertainments.

To Prof. Franklin and friends for an "Old Folks Concert."

The billiard room has continued to be a resort for some of our patients.

During the summer a Base Ball Club was organized from among officers and employees, which was sufficiently skilled to play matched games with clubs from other towns. As the ball ground is located a few rods from the Hospital, this sport attracted and interested the south wing patients, and thus helped to while away many summer afternoons.

Hon. T. S. Gold, Secretary of State Board of Agriculture, furnished 9 volumes of Reports, for which we are under renewed obligations; also to A. B. Gillette, of Hartford, for a complete set of Scott's novels, handsomely bound; to Geo. F. Prior, of Middletown, several volumes of magazines and books; to Messrs. Thorne, Copeland, Hubbard, Putnam, McLean, Rockwell, and Finney, for similar favors; Mrs. Fellowes, of New Haven, has continued to furnish the London Illustrated News, which I have had bound for permanent use.

To the publishers of the subjoined list of newspapers, received gratuitously, I would return thanks. Among our readers are many persons who watch for their "daily" with as much eagerness as do men in other conditions of life. I

trust that other papers may be added to the list during the year.

During the year just drawing to a close I have been aided in this arduous work by many officers and employees whom it would be a pleasure to mention by name with words of commendation for their constant, untiring and self-sacrificing devotion to their several duties. To all such I am under heartfelt obligations. Others, from lack of natural fitness or want of proper self-respect and self-control, have found by experimental knowledge that other fields of labor were better adapted to their several idiosyncrasies. With all such I have endeavored to deal kindly, firmly and justly, always placing the best interests of the Hospital first and foremost. It can never be considered as any mark of disrespect, when an individual is not likely to gain credit or give satisfaction in a station, to give him an opportunity to embrace another pursuit better calculated to advance his own interests.

At your meeting in October you saw fit to increase your Superintendent's duties and responsibilities in a manner which I trust has contributed to the efficiency and better manage-

ment of the Hospital. For this new mark of confidence, and for your cordial and intelligent co-operation during another year, I am truly grateful. Humbly invoking the blessings of Divine Providence, I again commend this Institution to your continued oversight.

Respectfully submitted,

A. M. SHEW,

Superintendent.

Middletown, Conn., March 31st, 1873.

APPENDIX.

Admission of Patients.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which the person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons, two pairs new socks, one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under clothing, shoes and stockings corresponding to that required for the male patient, have one flannel petticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for chapel worship and out-of-doors exercise and riding.

4. In all cases the patient's best clothing should be sent ; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the Hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending, and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections Four and Six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section Four of Amended Act, 1867, and By-laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section Five of Amendment to Act approved July 23, 1867, and By-laws.

10. Visitors are admitted to the Institution between the hours of ten A. M. and twelve M., and between two and four P. M., on Mondays, Wednesdays, and Fridays only, but no visitors shall be admitted to the wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

CALVIN S. MAY, M. D.,	<i>Second Assistant Physician.</i>
FRANK B. WEEKS,	<i>Clerk.</i>
CLINTON W. WEATHERBEE,	<i>Farmer.</i>
MRS. MARY HALLOCK,	<i>Matron.</i>
MRS. MARGARET DUTTON,	<i>Assistant Matron.</i>

All communications relative to the admission, etc., of Patients, should be addressed to the Superintendent. Blanks will be furnished on application.

TRUSTEES' REPORT.

*To the Honorable, the General Assembly
of the State of Connecticut :*

The undersigned, the Board of Trustees of the General Hospital for the Insane of the State of Connecticut, at Middletown, herewith present their Eighth Annual Report.

They would gratefully acknowledge the loving protection of the Heavenly Father which has guarded and blessed the Hospital another twelve-month. In many respects the year has been to it one of real prosperity. More patients have shared in its benefits than heretofore. The whole number treated during the year, ending April 1, 1874, was five hundred and twenty-four. The number remaining at that date was three hundred and ninety-four. Of their condition, and much else, that is of interest in their ease, the Report of the Superintendent herewith submitted contains valuable information. In it will be found also important facts relative to the practical working of the Institution.

The farm has been well tilled and highly productive. Great care has been taken to increase its fertility, to make needed improvements, and to keep all the buildings in good repair.

The income of the establishment has been managed with economy and skill. The thorough and exact system of keeping accounts continues to work satisfactorily, and the bills for current, as well as all other expenses have been promptly met.

The Commission appointed by the Governor, in accordance with the terms of the appropriation made in 1871 and in 1872, have completed their labors in a manner that reflects the highest credit upon those gentlemen, and additional honor upon the State, which can in these days secure from its citizens services of so great value for a work so important, protracted and difficult.

The south wing, capable of accommodating one hundred and five men, was completed and formally opened for patients on the 6th day of January last, in the presence of the Governor, the State Board of Charities, and other distinguished citizens. It has afforded a much needed relief to a considerable number of patients, who had been carried to Hospitals out of the State, and to others whose insanity is recent. The north wing, opened last year for women, has been full for months, and it appears certain that the south wing will soon be insufficient for the number of men needing its care.

At no very distant day, as the Board believes, cottages, neat, attractive, and not too expensive, will be required, in which a class of quiet patients can enjoy advantages of home-like surroundings, and those convalescing may be better prepared to enter again with comfort and safety the busy scenes of life. This would probably be the most economical manner of providing for patients when the number shall exceed the present capacity of the institution.

It is due to the officers and attendants of the Hospital to say that they have continued to perform their daily duties in a manner so conscientious and discreet, and with so much tact as to deserve a full measure of commendation and confidence.

It is fitting in this connection to mention our common loss, when, in January last, death suddenly took from the Superintendent, his estimable wife, deprived the family of her friendly, cheerful, and healthful influence, and the patients of the enjoyment of her admirable musical gifts in conducting the service of song in the Chapel.

As the buildings have now been completed after the original plan, and the institution is free from debt, the Trustees desire to say that they hold in grateful remembrance, the successive Legislatures which gave the charter in 1866, and voted always the full appropriations asked for by the Board to carry out the humane design of the charter ;—appropriations that have in the aggregate been much larger than, at the outset, any one anticipated.

The good people of this State also have shown an intelligent and generous appreciation of, and a steadily increasing inter-

est in this enterprise, as they have learned its necessity, and observed its beneficent working. Nor would we fail to mention the many wealthy and influential citizens, who, notwithstanding the cost, have when difficulties were greatest, encouraged the Board to go forward, and have steadily aided to insure success.

To all these we tender our hearty thanks, in behalf of hundreds of afflicted men and women, who were poor and ready to perish from disease and mental weakness; but who have now been warmed and fed, and tenderly cared for under this roof; whereby many of them have been restored to their right mind.

We regard this institution as an honor to Connecticut. In no State, as we believe, are patients like these receiving medical treatment more scientific, considerate or successful, or care from attendants more intelligent, kind-hearted, and faithful.

The Hospital asks for no appropriation this year. We would recommend that the name be changed to "The Connecticut Hospital for the Insane."

The official terms of the Members of this Board from New London and Windham Counties expire in 1874.

All of which is respectfully submitted.

SUPERINTENDENT'S REPORT

TO THE

BOARD OF TRUSTEES.

GENTLEMEN:—I have the honor to submit the Eighth Annual Report of the General Hospital for the Insane of the State of Connecticut, together with comprehensive Statistical Tables, arranged in uniformity with those adopted by "The Association of Medical Superintendents of American Institutions for the Insane."

The official year ending March 31st, 1874, has been one of peculiar interest. During this period you have witnessed the completion of the Hospital, so far as the plan was adopted by the proper authorities, in 1866.

For the first time in its history, this Institution has been in condition to receive promptly all applicants of both sexes. As a result, the number of persons admitted and discharged and the total number under treatment exceeds that of any previous year.

Referring to the tables, it will be noticed that there were remaining two hundred and seventy-one (271) patients at the date of the last Annual Report, of whom one hundred and thirty-eight (138) were males, and one hundred and thirty-three (133) were females; ninety-three (93) males and one hundred and sixty (160) females have since been admitted, making a total of five hundred and twenty-four (524) persons who have received custodial or curative treatment. The disparity of admissions in the sexes, is explained by the fact that during the first few months of the official year, male patients could be received only when vacancies occurred by death, discharge or removal. The daily average was 339.51. Of the one hundred and thirty

(130) persons who were discharged, thirty-seven (sixteen men and twenty-one women) were regarded as recovered; thirty (nine men and twenty-one women) were so much improved that they were permitted to go home on trial and have since, in nearly all instances, become fully restored; twenty-eight (thirteen men and fifteen women) mild chronic cases were removed, before the completion of the new wings, to make room for others. The deaths were thirty-five, (eighteen men and seventeen women) which is equal to 6.67 per cent of the total number under treatment. It is worthy of special remark, that one-fourth of those who died had passed beyond the time allotted to man, and twelve of the remaining number were between fifty and seventy years of age; the average was 51.74 years, which is considerably above the mean average of past years. There were eighteen (18) deaths among two hundred and thirty-one (231) male patients and seventeen (17) among two-hundred and ninety-three (293) female patients. One person died two days after admission—one three,—one six,—two thirteen,—two fourteen,—and one fifteen; but the majority of deaths were the result of degenerative changes, incident to long continued mental disease.

Referring to Table No. XXVIII, you observe that of three hundred and ninety-four (394) patients remaining at this date, only thirty-five (35) are considered curable. This opinion is based upon the fact that in three hundred and fifty-nine (359), the disease has already lasted from two to forty years. It is discouraging to contemplate that such a large proportion will probably continue more or less deranged during life, when perhaps a majority of these might have been cured if promptly submitted to Hospital treatment.

It is reasonable to presume that the number of admissions during the past year is a fair criterion of what may be expected in future. Assuming that the discharges and deaths of the next twelve months will equal those of the past, and that the admissions continue in the same ratio, a little calculation demonstrates that the Hospital, which has accommodations only for four hundred and fifty (450) patients, will be crowded to its full capacity before the expiration of another year. It will then be necessary to delay admissions until vacancies occur,

or to send the quiet, harmless chronic patients to the almshouses, (a possibility that I shudder to contemplate,) to make room for acute cases, who come to us from the laboring and active classes of life.

At this date Connecticut may well be proud of the position which she occupies in providing for her dependent classes. Reliable information from town and judicial officers, discloses the gratifying fact, that *all* or *nearly* all of the insane poor have been removed from jails and almshouses to this Institution, while the Retreat at Hartford, with its well furnished apartments, affords accommodations to those who are able to pay liberally for care and treatment. Now, before the actual pressure begins to be felt, would it not be wise to consider what future provision will be required for the insane of Connecticut?

A public Institution of this kind, erected, owned and governed by the State should be open and accessible to every citizen of the State who needs its protecting care. In theory, class distinctions are unknown; the rich and the poor, the learned and the ignorant alike become insane, and require custodial treatment, in a majority of cases away from home. In actual practice, thus far, the policy has been to favor the poor and indigent.

By referring to Table No. X, you observe that of the two hundred and fifty-three (253) persons admitted during the year, two hundred and twelve (212) were supported wholly or in part by the State and Towns, while only forty-one (41) were able to pay their own expenses. This distinction in favor of the poor is still more evident when you consider the class of admissions from the opening of the Hospital in 1868. Of the eight hundred and ninety-six (896) admitted since the beginning, seven hundred and ninety-nine (799) were beneficiaries, and only ninety-seven (97) self-supporting.

It will be perceived (Table No. IV,) that four persons were admitted during the year who were not insane. To relieve the fears of any nervous or over-anxious reader of this report, who has perhaps spent many sleepless nights in useless suspicions after reading "Hard Cash," or listening to the plausible harangue of some pretentious lecturer, who, by touching

upon this sensitive cord of the public mind succeeds in filling the otherwise empty seats. I would explain that one of the four was a convict from Wethersfield Prison, who feigned insanity in order to effect a transfer to this Hospital, in expectation that he could easily escape from his lawful punishment. After a few months residence here he was returned to his proper place. The second, a boy of fourteen years, after having burned several barns and a church, was brought to us from the Bridgeport Jail, to be placed under observation for the purpose of determining definitely his mental condition. It was soon evident that he was simply a cunning, unprincipled lad who needed the disciplinary teaching of the Meriden Reform School, to which he was duly sent. The third was also a case in which a medico-legal question was involved. The last of these "not insane" cases, a woman of intemperate habits and ungovernable temper, who was sent here by the town authorities, only remained two days. Thus it appears that none of the four were placed here "to get rid of them." On the contrary, they had committed crimes and were trying to evade justice. I hope the time may soon come when the public will have such confidence in the Board of Trustees and the Resident Officers of the Hospital, that the fact of a person being detained at the Institution for any great period of time will be accepted as conclusive proof of his or her insanity and proper detention. Before leaving this subject, I desire to place on record, a statement founded upon an experience of thirteen years, and embracing the care and treatment of two thousand insane persons, in four different States; I have not known a case of so called "false imprisonment" in a Hospital or Asylum; neither have I had reason to suspect improper motives on the part of friends or public officers. Nearly all doubts and difficulties in any particular case grow out of the peculiarities of the case itself and ignorance respecting the nature of insanity.

It is generally supposed that an insane person must necessarily rave, destroy and disturb. This popular appreciation of insanity is shown by the questions daily asked by visitors, who desire to see those patients who are "really crazy," meaning of course cases of acute mania. Persons familiar with

Hospitals soon learn that the proportion of "crazy" patients is very small, and that the majority of all under treatment, after the acute stage has passed, are more or less quiet and rational, able to eat and sleep, and to do various kinds of work the same as other persons. Many may have suicidal, homicidal or extravagant propensities, which are kept in check by the watchful care of attendants and the regularity of Institution life.

A Hospital is doing its legitimate work as much in this way as it is when managing a dangerous and destructive maniac. Those who think differently, might as well claim that a physician should only be called to the sick when dangerously ill. There are various degrees and forms of insanity, no two presenting the same exact characteristics. The restlessness and complaining spirit which is manifested by a proportion of patients, is the result of disease and not of confinement. This is shown by the fact, that at home they were even more uneasy; and also, that under proper treatment at Hospital they recover from this manifestation, which is merely one symptom of the disease. We are apt to forget that persons become insane at home and not at the Hospital; or in other words, that the causes which produced the insanity in any given case were existing at home.

The cares, anxieties and responsibilities of domestic life, especially among the poor, incompatibility of temper, uncongenial work, poverty of diet and irregular habits are all sufficient to produce mental derangement in a person already debilitated. Hence, when removed to Hospital, where regularity of diet, hours of exercise and repose, and attention to physical and moral treatment can be had, restoration is the natural consequence. The earlier the change is made the greater is the hope of cure. Often influenced by the opinions of officious neighbors and irresponsible busy-bodies, the friends delay sending the loved one from home, so long as they can manage to keep her there; finally, after months or years of dallying, when the disease has become chronic, they take her to a Hospital and wonder why a cure is not effected.

We have been annoyed by the admission of several patients who were committed on the order of Police Courts or Justi-

ees of the Pease. The statute which authorizes such commitments is defective ; it does not determine who is responsible for the payment of Hospital bills in such cases. If the Selectmen were not consulted before the commitment by the Police Courts, they generally refuse to acknowledge the indebtedness, and refer us for payment to the Comptroller and His Excellency the Governor. I do not find any statute which would authorize the approval of such bills. Thus far the Hospital has obtained payment through the approval of the chief magistrate of the State.

I would suggest that an effort be made to secure the enactment of a proper statute to meet the requirements of such cases.

Notwithstanding the unsettled condition of financial questions, and the resulting uncertainty in business matters, the regular income from State, towns and individuals has been sufficient to meet all our wants, and to enable us to continue improvements on the farm and about the buildings. The plan adopted eighteen months ago of making all purchases for cash works to the satisfaction of all parties. By referring to the financial statement, herewith presented, you will observe that the Hospital received from all sources (including balance with Treasurer, \$1,583.98, and cash on hand, \$227.84, April 1st, 1873,) the sum of ninety-two thousand eight hundred and seventy-nine dollars and two cents, (\$92,879.02,) and that the total expenditures during the same period, as per vouchers audited monthly by the Finance Committee, were eighty-seven thousand, nine hundred and eighty-four dollars and twenty-nine cents, (\$87,984.29,) leaving a balance of \$1,499.30 with Treasurer, and \$3,395.43 cash on hand.

For special details respecting farm labor and its results, I would refer you to some interesting facts, properly tabulated by Mr. Weatherbee, who has efficiently conducted the farming operations during the past five years. In this connection I would again bear testimony to the great value of out-door labor as an auxiliary means of treatment in mental disease. The old adage, respecting idle hands, applies to the occupants of an institution for the insane, and I have often thought that many lives were saved and minds restored to usefulness by

judiciously disturbing the languor which usually accompanies chronic insanity. This kind of work is not generally profitable, and to develop it requires peculiar adaptation in those who have the immediate care of such persons. A pleasant smile and an encouraging word will sometimes induce a patient to perform manual labor which, in the end, may aid in his restoration to health.

It may be a matter of surprise to those who are not familiar with the daily life and habits of the insane in Hospitals, to learn that a large proportion of all male patients at this institution have been employed about the farm or buildings under slight supervision, or were allowed the liberty of the grounds, during the summer months, unattended. The following tables showing the relative number in each year, were carefully prepared by Dr. Hallock :

1869, average number present,	109.	No. at large,	29.	Per cent at large,	26.6
1870, do. do. do.	115.	do. do.	35.	do. do.	30.4
1871, do. do. do.	120.	do. do.	37.	do. do.	30.8
1872, do. do. do.	131.	do. do.	55.	do. do.	42.0

An additional number, who were considered safe to be at liberty, but for various reasons (lameness, old age, dementia, &c.,) remained in the house or airing courts, is shown by the following table :

1869, there were	19.	1871, there were	-	23
1870, do.	20.	1872, do.		22

By adding together the above tables, the total number who were in condition to be trusted with their freedom, needing no supervision whatever, so far as elopement is concerned, will be as follows :

1869, No. present,	109.	No. at large,	29 added to 19, total	48.	Per cent,	44.0
1870, do.	115.	do.	35 do. 20, do.	55.	do.	47.7
1871, do.	120.	do.	37 do. 23, do.	60.	do.	50.0
1872, do.	131.	do.	55 do. 22, do.	77.	do.	58.7

Of the number actually at liberty, without supervision, only two needed restraint at intervals, on account of periodical excitement.

The value of custodial treatment is demonstrated by these facts ; we know from actual experience that the regularity of

hospital life is sufficient to keep many of the above mentioned persons within the limits of self-control; and that when restored to full freedom at home, (a frequent occurrence,) they soon go beyond the limits, and are returned to us in a worse condition than at first.

Owing to the unfinished condition of the grounds, and the presence of many workmen employed about the new wings, we have not tested the question of relative trustfulness between males and females. My impression, formed from general observation, is, that a much smaller number of the latter class can be trusted with liberty. The disease appears to develop more of the restless and unruly elements in her organization; she is less contented with her surroundings and treatment, and more desirous of attention from officers and visitors; then, too, it is more difficult to provide employment adapted to each case.

I trust that you will not consider it inappropriate for me to refer to the unfinished condition of the grounds immediately surrounding the Hospital. As building operations have terminated, now would seem to be the proper time to commence the work of grading and systematically laying out the walks and drives. A definite plan should be selected, and the services of an experienced landscape gardener provided for; nearly all of the heavy labor can be performed by our regular working force. The importance of this matter is so obvious that I need not offer special reasons therefor.

A variety of evening entertainments, consisting of lectures, readings, concerts, tableaux, and dramatic representations, have been furnished during the year. Two hundred new slides were purchased and used in the Stereopticon with gratifying results.

It is my purpose to do all that can be done in this direction to relieve the tedium of hospital life. In pursuance of this plan many books are added monthly to the different ward libraries, and engravings hung upon the walls, whenever the funds will admit. Early in the year an arrangement was made with the dealers to furnish daily all of the preceding days' papers remaining unsold. In addition, the publishers of the following named newspapers have, as heretofore, generously

furnished copies regularly and gratuitously; to all such our acknowledgments are due.

Hartford Daily Conrant,	Hartford, Conn.
do. Evening Post,	do. do.
do. Weekly Times,	do. do.
Religious Herald,	do. do.
Connecticut General Advertiser,	do. do.
New Haven Evening Register,	New Haven, do.
do. Morning Journal and Courier,	do. do.
do. Weekly Palladinm,	do. do.
Connecticut Herald and Weekly Journal,	do. do.
The Constitution,	Middletown, do.
The Sentinel and Witness,	do. do.
Norwich Daily Advertiser, (part of year,)	Norwich, do.
do. Weekly Conrier,	do. do.
Tolland County Journal,	Tolland, do.
Bridgeport Republican and Standard,	Bridgeport, do.
Meriden Daily Republican, (part of year,)	Meriden, do.
Whitney's Musical Guest,	Toledo, Ohio.
The Sheltering Arms, (monthly,)	New York City.
Watson's Art Journal,	do. do.

In addition to these contributions, the following donations have been received:

A fine set of Marryatt's Novels, twelve volumes, from A. B. Gillette, of Hartford. The "Surgical and Medical History of the Rebellion," from Dr. Samuel Lynes, of Norwalk. Five Dollars and a number of Books from Mr. Bnr-ronghs, of Middletown. H. D. A. Ward, Esq., contributed a complete set of the New York Daily Graphic, (in bound volumes), together with files of old papers and magazines. As in former years, Hon. T. S. Gold, Secretary State Board of Agriculture, has furnished volumes of Agricultural Reports from other States.

We are under especial obligations to the following named gentlemen for a course of seven interesting and highly instructive Lectures:

President Cummings, Wesleyan University, on Foreign Travels.
 Prof. Wm. North Rice, do. do. on Glaciers.
 Prof. C. T. Winchester, do. do. on Oliver Goldsmith.
 Dr. C. L. Loomis, Middletown, two Lectures on South-Western Africa.
 Rev. J. H. Bradford, Middletown, on Temperance.
 Col. B. S. Pardee, New Haven, on Western Life.

Early in the summer a number of young ladies of the South Congregational Church Sabbath School formed a mission for

the purpose of collecting flowers and arranging bouquets, to be sent to the Hospital on every Saturday afternoon. The interest increased until the whole school was engaged in this good work; as a result, our people received and enjoyed weekly from one hundred to one hundred and fifty beautiful bouquets, which were distributed in all the wards, sitting rooms, dining rooms and parlors. To those who have cheerfully devoted their time to this benevolent purpose, our acknowledgements are due.

Since the opening in 1868, religious services have been held every Sabbath afternoon at two o'clock, much to the advantage, comfort and benefit of the patients, a large proportion of whom have been present at the services. No regular chaplain is employed; we are therefore under greater obligations to the Reverend gentlemen of Middletown and vicinity, who have devoted their time gratuitously to this work.

No changes have occurred in the staff of officers. If experience and length of service adds to the efficiency of persons engaged in ordinary avocations, it must be evident that labor, which requires special training and peculiar adaptation, will be more intelligently performed by those who have devoted their best energies for years to the work.

In November, an increase of numbers necessitated the employment of another Medical officer. Dr. Calvin S. May, of New Haven, a graduate of Yale Medical School, was chosen to fill the place, which he has occupied since that time. If thorough professional preparation and entire devotion to the work are important qualifications, you are fortunate in having secured the services of Dr. May as second assistant Physician.

I am under renewed obligations to the officers, attendants and employees who have endeavored, with ability, fidelity and tact to secure for this Institution a still greater measure of usefulness. Surrounded by the peculiar difficulties incident to the care of those suffering from mental and moral deviations, it would be strange, indeed, if we have succeeded in satisfying everybody. Our aim has been to restore health by proper medical and moral treatment, failing in this, to control, protect and provide for the safety, comfort and well being of those committed to our care.

In conclusion, I desire to express my deep obligations to the members of your Board, who, by intelligent co-operation and personal kindness, have greatly assisted in sharing the burdens of another year.

Respectfully submitted,

ABRAM MARVIN SHEW,

Superintendent.

Middletown, Conn., March 31st, 1874.

TO THE SUPERINTENDENT.

DEAR SIR :

The following Report of Farming operations for the year ending March 31st, 1874, is respectfully submitted.

Quantity and Value of Products.

Hay,	94 tons,	\$2,350 00
Straw,	8 do.	160 00
Corn fodder, (dry,)	20 do.	100 00
Corn,	430 bushels,	215 00
Oats,	121½ do.	72 90
Rye,	44 do.	44 00
Broom Seed,	30 do.	7 50
Potatoes,	2,830 do.	2,405 50
Carrots,	336 do.	168 00
Beets,	242 do.	121 00
Onions,	42 do.	84 00
Turnips,	457 do.	178 50
Beans, (string,)	46 do.	73 60
Beans, (pole,)	38 do.	76 00
Beans, (white shell,)	3 do.	6 00
Peas, (in shell.)	49 do.	122 50
Parsnips,	85 do.	42 50
Sweet Corn,	73 do.	73 00
Cucumbers,	86 do.	107 50
Tomatoes,	37 do.	37 00
Summer Squash,	121 do.	121 00
Winter Squash,	4 tons,	320 00
Lettuce,	23 bushels,	23 00
Spinaeh,	25 do.	25 00
Beet Greens,	104 do.	104 00

Pie Plant,	856 pounds,	21 30
Melons,	4,549 do.	90 00
Cabbages,	5,000 heads,	400 00
Celery,	1,500 do.	75 00
Asparagus,	2 bushels,	9 00
Strawberries,	74 quarts,	14 80
Raspberries,	72 do.	14 40
Currants,	24 do.	3 00
Pears,	13 bushels,	19 50
Apples,	21 barrels,	99 75
Cider,	2 do.	10 00
Milk, (grass fed,)	19,440 quarts,	1,166 40
Beef,	3,770 pounds,	320 45
Veal,	912 do.	91 20
Pork,	10,143 do.	659 29½
Calf Skins,	13	26 00
Pigs, (sold,)	-	68 00
Turkeys,	233 pounds,	58 25
Chickens,	178 do.	35 60
Eggs,	358 dozen,	114 56
Broom Brush,	400 pounds,	24 00
Total value,		<hr/> \$10,358 00½

Weight of Hogs,—345, 340, 526, 530, 307, 332, 465, 375, 417, 386, 495, 472, 400, 389, 455, 549, 462, 430, 391, 443, 376, 389, 448, 421. Total,—10,143 pounds. Average,—422½ pounds.

Respectfully submitted,

C. W. WEATHERBEE,

Farmer.

TABLE I.

MOVEMENT OF THE POPULATION.

12 to 18 do.	3	4	7
18 to 24 do.	4	1	5
2 to 3 years,	2	2	4
3 to 5 do.	3	2	5
Over 5 do.	—	—	—
Total,	101	52	153
Average duration of all,	6.73 mos.	9.25 mos.	7.6 mos.

TABLE XIX.

FORM OF DISEASE OF THOSE RECOVERED FROM THE
BEGINNING.

DISEASE.	Number Recovered.			Per cent Recovered of each form Admitted.		
	Males.	Females.	Total.	Males.	Females.	Total.
Mania, Acute,	65	33	98	52.42	35.48	45.16
do. Chronic,	2	5	7	1.24	2.70	2.02
do. Epileptic, -	1	—	1	4.	—	2.56
do. Puerperal,	—	4	4	—	50.	50.
do. Suicidal,	—	2	2	—	40.	20.
Delirium, simple,	8	1	9	80.	100.	90.
Monomania,	4	1	5	26.66	25.	26.31
Methomania, (inebriates,)	9	1	10	39.13	100.	41.66
Melancholia, Acute,	12	5	17	50.	14.	28.33
Total Recovered, -	101	52	153			

TABLE XX.

CAUSE (EXCITING) OF DISEASE OF THOSE RECOVERED FROM
THE BEGINNING.

DISEASE.	Number Recovered.			Per cent Recovered of each class Admitted.		
	Males.	Females.	Total.	Males.	Females.	Total.
Ill Health,	11	20	31	15.5	19.04	17.61
Intemperance, -	39	3	42	62.90	60.00	62.68
Masturbation, -	2	—	2	10.00	—	9.09
Excessive Venery, -	2	—	2	100.	—	100.
Tobacco, -	2	—	2	66.66	—	66.66
Connected with the Affec- tions, -	4	3	7	66.66	13.04	24.13
Connected with fluctuations of Fortune, -	1	—	1	20.	—	11.11
Connected with Religion,	5	1	6	50.	14.28	35.29
Over-study, -	—	2	2	—	33.33	20.
Business Anxieties,	9	1	10	40.90	25.	38.61
Nervous Shock, -	—	2	2	—	15.	30.
Epilepsy, -	1	—	1	4.	—	2.56
Puerperal, -	—	5	5	—	29.41	29.41
Unknown, -	25	15	40	10.73	7.07	8.98
Total Recovered,	101	52	153			

TABLE XXI.

NATIVITY OF THOSE RECOVERED FROM THE BEGINNING.

COUNTRY.	Number Recovered.			Per cent Recovered of each class Admitted.		
	Males.	Females.	Total.	Males.	Females.	Total.
United States, white,	72	36	108	22.36	14.63	19.01
United States, colored, -	2	1	3	20.00	25.00	21.43
Canada, -	1	—	1	25.00	—	25.00
England,	5	—	5	33.33	—	20.83
Ireland, -	15	13	28	15.23	9.92	12.28
Germany, -	5	1	6	31.25	6.66	19.35
Italy, -	1	1	2	50.00	50.00	50.00
Total Recovered,	101	52	153			

TABLE XXII.

DEATH AND THE CAUSES.

CAUSES.	Within the Year.			From the Beginning.		
	Males.	Females.	Total.	Males.	Females.	Total.
Mania, Acute, - -	1	3	4	17	6	23
Mania, Chronic, -	6	3	9	9	4	13
Carbuncle, Exhaustion from,	—	—	—	1	—	1
Cancer of Breast,	—	—	—	—	1	1
Cancer of Stomach, -	—	—	—	1	—	1
Consumption,	1	1	2	7	6	13
Congestion of Lungs, -	1	1	2	1	1	2
Gangrene of Lung, - -	—	1	1	—	1	1
Pneumonia, - - -	1	1	2	7	3	10
Senile Decay, - - -	3	2	5	11	5	16
Apoplexy, -	—	—	—	3	—	3
Inanition, -	1	2	3	4	4	8
General Paresis, -	—	—	—	5	—	5
Violence, - - -	—	—	—	—	1	1
Suffocation during Epilep. fit,	—	—	—	1	—	1
Strangulation by Food,	—	—	—	1	—	1
Strangulation by Suicide,	—	1	1	1	3	4
Shock from Injuries,	—	—	—	—	1	1
Drowning while Swimming,	1	—	1	1	—	1
Epilepsy, -	—	—	—	2	4	6
Diarrhœa, -	—	—	—	2	2	4
Dysentery, -	1	—	1	1	—	1
Cirrhosis, -	—	—	—	—	1	1
General Dropsy, -	—	—	—	1	—	1
Leucocytosis, -	—	1	1	—	1	1
Undetermined, -	2	1	3	6	2	8
Total,	18	17	35	82	46	128

TABLE XXIII.

AGES AT DEATH.

AGE.	Within the Year.			From the Beginning.		
	Males.	Females.	Total.	Males.	Females.	Total.
Under 15,	—	—	—	—	—	—
15 to 20,	1	—	1	2	—	2

APPENDIX.

Admission of Patients.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which the person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons, two pair new socks, one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under-clothing, shoes and stockings corresponding to that required for the male patient, have one flannel peticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for Chapel worship and out-of-door's exercise and riding.

4. In all cases the patient's best clothing should be sent ; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the Hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending, and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections Four and Six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section Four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section Five of Amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten, A. M., and twelve, M., and between two and four, P. M., on Mondays, Wednesdays, and Fridays only, but no visitors shall be admitted to the Wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

TRUSTEES' REPORT.

*To the Honorable, the General Assembly
of the State of Connecticut :*

The Board of Trustees of the Connecticut Hospital for the Insane, respectfully present this their Ninth Annual Report, for the year ending March 31st, 1875.

The records of the past year show the usefulness of your Institution in its care of 605 patients to the first of April instant. At that date there were 450 insane persons, from all parts of the State, in the Hospital. The tabular statements, in the absence of Dr. Shew, prepared by Dr. Hallock, exhibit the usual details as to patients, the phases of their disease and the success attending the treatment.

During the last Autumn your Superintendent, Doctor Shew, was seized with an illness which threatened to be serious and permanent. Medical advisers and friends concurred with your Trustees that an absolute respite from care for some months was a necessity. His record of faithful devotion to the Hospital, from a period before the foundations of it were laid, was almost a rebuke to us that we had not earlier insisted upon his taking regular annual vacations. This forced one was voted, by a full Board unanimously. From letters received from him we are encouraged to believe that his relief from care will produce a permanent cure, and that in June he will return to his post.

His absence would have been more seriously felt by the Hospital but for the able helpers left in charge,—Dr. Hallock and Dr. May, the Assistant Physicians, also the Matron and the Assistant Matron, who have all faithfully and loyally devoted themselves to carrying on the established system of the

work. The Clerk and the Farmer have been no less faithful in their departments, and have deservedly gained regard and confidence.

We are the more particular to mention the above, as in Dr. Shew's absence all have shown interest in the harmonious working of the Hospital, worthy of praise.

The special duties of Head of the Institution, during the absence of the Superintendent, were devolved, by vote of the Board in December last, on our co-Trustee, the Hon. H. Sidney Hayden, of Hartford County, from whom the Trustees have received the following communication :

"The Commissioners employed in the erection of the new North and South wings, reported to the General Assembly of 1874, that after the completion of their work, there remained in hand four thousand, five hundred dollars. With this money they proposed to erect a suitable Mortuary Building, to form a Lodge and Gateway at the North entrance to the Hospital grounds on Silver Street. This work has now been completed."

Annexed is presented the certificate of E. W. Moore, that vouchers for the full amount of the appropriation, namely, for one hundred and eighty thousand dollars, have been presented and found correct.

"The Commissioners having completed the Lodge and Gateway, advantage was taken of the delightful Fall months of October and November to commence the first systematic effort to grade the grounds of the Hospital. The plans for grading have been furnished and the work will be carried on this year."

It has been very gratifying to those to whom you have intrusted this Benevolent Institution, to observe the lively regard which it receives from the officers of the towns, who have the duty of sending patients to it, and of punctually paying the charges for their maintenance. The good which the Institution has done and is doing, and the evils which it has averted, seem to have made a favorable impression, of which we speak with high satisfaction.

His Excellency, the Governor, has placed in his message a number of significant statements as to the increase of insanity

generally in the world, and especially in this State. These statements will rightly impress you more than any we can make, that increased accommodations are already needed is only too painfully clear.

The responsibility for such increase is left to the wisdom of your Honorable Body.

In conclusion, the Trustees gratefully acknowledge the manifest Divine favor, which has another year crowned with blessing the labors for those bereft of their reason.

The official term of the members of this Board from New Haven and Middlesex Counties expires in 1875.

All of which is respectfully submitted.

CHARLES R. INGERSOLL,	New Haven.
RICHARD S. FELLOWES,	New Haven.
HENRY WOODWARD,	Middletown.
ROBBINS BATTELL,	Norfolk.
SAMUEL LYNES, M. D.,	Norwalk.
H. SIDNEY HAYDEN,	Windsor.
LUCIUS S. FULLER,	Tolland.
SAMUEL G. WILLARD,	Colchester.
JOSEPH D. BATES,	Danielsonville.
BENJAMIN DOUGLAS,	Middletown.
JULIUS HOTCHKISS,	Middletown.
JOSEPH CUMMINGS,	Middletown.

COMPTROLLER'S OFFICE, STATE OF CONNECTICUT.

HARTFORD, MAY 6TH, 1875.

I hereby certify, that I have examined the bills and vouchers presented by the Commissioners, for the erection of the new North and South wings of the "Connecticut Hospital for the Insane," at Middletown, and find the same amount to the sum of one hundred and eighty thousand dollars, (\$180,000), to be correct.

E. W. MOORE.

Acting Superintendent's Report

TO THE

BOARD OF TRUSTEES.

I have the honor to lay before you the following report, exhibiting the operations of the Hospital for the year ending March 31, 1875, together with the usual statistical tables after the forms adopted by the Association of Medical Superintendents.

	Males.	Females.	Total.
Number of patients at the beginning of the year,	175	220	395
Admitted in the year,	122	88	210
Whole number treated,	297	308	605
Discharged,	78	77	155
Remaining,	219	231	450
Average present during the year,	198.63	227.17	425.80

During the year forty-one patients were discharged recovered, forty-four improved, thirty-four stationary, and thirty-six died.

The following table shows the admissions and discharges from the beginning of the Hospital :

Total number of patients admitted,	-	-	1,106
Total number discharged,—recovered, -	-	-	194
Total number discharged,—improved, -	-	-	145
Total number discharged,—stationary,	-	-	153
Total number patients died, -	-	-	164
			656
Number remaining, -	-	-	450

Summary of Facts and General Observations.

Of the 1,106 patients admitted since the opening of the Hospital, 124 have been private or paying ; 336 indigent or partly self-supporting ; and 646 have been of the pauper class.

The ratio of recoveries and deaths is about the same as last year.

The proportion recovered of all under treatment was something over six per cent ; last year it was seven per cent.

The proportion of deaths of all under care was a little less than six per cent. ; last year it was a trifle over six per cent.

The ratio of deaths of the average number present was eight and a half per cent. ; last year it was a little over ten per cent.

During the past year, especially the last quarter, the amount of sickness has been greater than previously ; yet notwithstanding this fact the death rate is less this year than last by nearly two per cent. Among the employes there has also been considerable sickness, necessitating the employment of more than the usual amount of help.

The internal affairs of the Institution have gone on throughout the year uninterrupted by any accident, or other event worthy of special mention.

The cottages continue to be occupied and serve a useful purpose. These buildings, owing to age and original frailty, require considerable yearly outlays to keep them in repair and in a good sanitary condition.

The new South (male) wing, which was opened in January, 1874, became filled with its complement of patients in February last, thirteen months from the date of opening. It will be remembered that the new North (female) wing was wholly occupied in just one year from the time it was opened, and that soon after, female applicants had to go upon a waiting period or were referred to other hospitals. A like condition of things will soon be experienced on the male side of the house. So far, however, since that wing became full, vacancies have occurred as fast as new patients have arrived.

During the year there were transferred to the Hospital from the prison at Wethersfield, three "insane" convicts ;—

after an extended observation, however, two of them were found to be malingerers, and their cases were accordingly reported upon to the Governor, who remanded them back to prison. The number of insane convicts now in Hospital is eight.

Weekly amusements and entertainments have taken place as usual. In addition to the stereopticon exhibitions and dances, we have had under the management of Dr. May and Mrs. Dutton, several readings, concerts, theatricals, etc., taken part in by our own employes. These have been very successful and much enjoyed by the patients.

We are under obligations to Miss Chapman of Middletown, for an evening entertainment of select readings; to Messrs. Coleman, Arnold, Van Buren, and Craik of the Berkeley Divinity School, for a vocal concert; to Dr. C. L. Loomis of Middletown, for two interesting lectures (illustrated), entitled "The Wings of Thought;" to the Rev. Mr. Greeley of New Hampshire, for two lectures on scenes and events connected with our late civil war.

The publishers of the following named newspapers have continued to furnish copies regularly and gratuitously :

Hartford Daily Courant,	Hartford, Conn.
do. Evening Post,	do. do.
do. Weekly Times,	do. do.
Religious Herald, -	do. do.
Connecticut General Advertiser,	do. do.
New Haven Evening Register,	New Haven, do.
do. Morning Journal and Courier,	do. do.
do. Weekly Palladium,	do. do.
Connecticut Herald and Weekly Journal,	do. do.
do. Weekly Journal,	do. do.
Weekly State Journal,	do. do.
The Constitution,	Middletown, do.
The Sentinel and Witness,	do. do.
The Republican and Standard,	Bridgeport, do.
Connecticut Western News, (most of the year,)	Salisbury, do.
The Sheltering Arms,	New York City.
Watson's Art Journal, -	do. do.

The following contributions have been received :

From Rev. R. T. Thorne, Middletown, Conn., several copies weekly, of the Parish Visitor; Mrs. E. B. Monroe, Southport, Conn., pamphlets and books;

Mrs. H. S. Hayden, Windsor, 14 bound volumes Harper's Magazine; J. W. Bradley, Philadelphia, books and engravings to the value of one hundred dollars; Mrs. Perry, Southport, Ct., papers and magazines; Rev. Mr. Graeber, Meriden, Conn., German bibles and books; Chas. H. Kent, Kansas City, Mo., illustrated papers; Mrs. Gorham, Wilton, Conn., four dollars cash for library of 7th Hall, North; George H. Hulbert, Esq., Middletown, Conn., the Independent and the Advance; Mrs. Benj. Douglas, Middletown, Conn., Fashion Magazines; Col. Beuj. S. Pardee, New Haven, Conn., several pots of choice plants; A. Van Name, Librarian of Yale College, a large number of London Illustrated papers; Miss Stowe, New Haven, Conn., decorations for ward parlor; Miss Greeu, Mass., flower vases for ward parlor; A. B. Gillette, Hartford, Conn., three valuable fowls; Hon. T. S. Gold, Secretary State Board of Agriculture, several volumes of Agricultural Reports from other States.

We are under special obligation to the South Congregational Sabbath School "Flower-Mission" for their very valuable weekly gift of flowers to the Hospital during the past summer.

Religious services have been held on every Sabbath, conducted by clergymen of Middletown and students of the Berkeley Divinity School; also occasionally, by students of Wesleyan University. To these gentlemen we would express our sincere thanks.

Rev. Father O'Brien of Middletown, has on several occasions held services on week days.

During a part of the winter, Dr. Charles H. Langdon was engaged as one of the assistant physicians. He left on the first of March to assume a permanent situation at another institution. Since that date the medical service has been performed by the two medical officers present.

A report of the Steward's department will be given in detail by the clerk.

The farm under the management of Mr. Weatherbee has been highly productive. For details you are referred to the farmer's report herewith presented.

The various outside matters, improvements begun, completed, and in contemplation, I leave to be presented by Mr. Hayden, who is thoroughly conversant with them.

If not out of place, I would mention with praise the treatment and management of the male patients by Dr. May. I can speak in the highest terms of his skill, tact and judgment.

He has also rendered valuable professional assistance on the female side of the house.

In closing this imperfect report, it remains to say that to Mr. Hayden are due from us, one and all, many thanks for his wise counsel and aid in our work, and I may say it is owing to his good judgment and watchful care over the Institution that it has prospered as it has, during the absence of the Superintendent.

Respectfully submitted,

W. B. HALLOCK,

Middletown, Conn., March 31st, 1875.

FARMER'S REPORT

TO THE

SUPERINTENDENT.

SIR :

I have the honor to present the following Report of the Farming operations for the year ending March 31st, 1875.

Quantity and Value of Products.

Hay,	-	104 tons,	\$1,872 00
Straw,	- -	23 do.	345 00
Oats,		298 bushels,	- 193 70
Rye,	-	155 do.	155 00
Broom Seed,		40 do.	12 00
Potatoes,		2,143 do.	1,607 25
Carrots,	-	250 do.	125 00
Beets,		180 do.	90 00
Onions, -		282 do.	282 00
Turnips,		290 do.	116 00
Beans, (string,)		34 $\frac{1}{2}$ do.	51 75
Beans, (pole,)	-	104 do.	208 00
Peas, (in shell,)		72 do.	113 50
Parsnips,		15 do.	7 50
Sweet Corn,		178 do.	178 00
Cucumbers,		149 do.	186 25
Tomatoes,		217 do.	162 75
Summer Squash,		124 do.	124 00
Winter Squash,		1 ton, -	40 00
Lettuce,		48 bushels,	48 00
Beet Greens,		24 do.	24 00
Pie Plant, - -		680 pounds, -	17 00

Melons,	-	-	2,252 pounds,	45 04
Cabbages,	-		7,500 heads,	450 00
Celery,	-		1,300 do.	78 00
Asparagus,	-		2 $\frac{1}{4}$ bushels,	10 00
Strawberries,			930 quarts,	172 43
Raspberries,	-		140 do.	25 20
Currants,	-		142 do.	21 30
Pears,	-	-	12 bushels,	15 00
Apples,	-		70 barrels,	- 105 00
Cider,	-	-	46 do.	115 00
Milk, (grass fed,)	-		20,600 quarts,	1,030 00
Beef,	-	-	1,185 pounds,	106 65
Veal,	-		1,604 do.	208 52
Pork,	-	-	10,105 do.	1,010 50
Pigs, (sold,)				84 00
Turkeys,	-		77 pounds,	- 19 25
Chickens,	-		377 do.	- 67 86
Pigeons,			6 dozen,	- 12 00
Eggs,	-		294 $\frac{1}{2}$ do.	- 88 35
Broom Brush,	-		600 pounds,	42 00
Total value,				<hr/> \$9,664 80

Weight of each Hog,—380, 480, 376, 445, 547, 487, 509, 511, 431, 443, 481, 535, 498, 439, 415, 509, 568, 415, 395, 516, 315, 410. Total—10,105 pounds. Average,—459 $\frac{7}{2}$.

Respectfully submitted,

C. W. WEATHERBEE,

Farmer.

APPENDIX.

Admission of Patients.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which the person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons, two pair new socks, one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under-clothing, shoes and stockings corresponding to that required for the male patient, have one flannel peticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for Chapel worship and out-of-door's exercise and riding.

4. In all cases the patient's best clothing should be sent ; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the Hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending, and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections Four and Six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section Four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section Five of Amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten, A. M., and twelve, M., and between two and four, P. M., on Mondays, Wednesdays, and Fridays only, but no visitors shall be admitted to the Wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injurious to the patients.

TENTH ANNUAL REPORT

OF THE

BOARD OF TRUSTEES

OF THE

Connecticut Hospital for the Insane

OF THE

STATE OF CONNECTICUT,

WITH

SUPERINTENDENT'S AND TREASURER'S REPORTS;

Presented to the General Assembly at its Session in May, 1876.

By Order of the General Assembly.

MIDDLETOWN, CONN.

FELTON & KING, STEAM BOOK AND JOB PRINTERS.

TRUSTEES REPORT.

*To the Honorable, the General Assembly
of the State of Connecticut:*

THE TRUSTEES OF THE CONNECTICUT HOSPITAL FOR THE INSANE have now the honor to submit their Tenth Annual Report to the 31st of March, 1876, together with the interesting and suggestive report of the Superintendent, including tabulated statements of admissions, discharges, deaths, nationalities, &c. A description of the Hospital and its history during its first ten years, with a summary of its benevolent work, have been added in a separate article by Dr. Shew.

The largest number of patients on any one day was four hundred and sixty-four (464). The smallest number on any one day was four hundred and forty (440). These figures show that the Hospital has been full—it is only just to say *crowded*, during the whole twelve months past.

Those in charge appreciate the desire of the town officials to have all of their insane accommodated, and realize how natural are expressions of disappointment when, owing to the crowded condition of the wards, their special cases cannot, at once, on the occasion of need, be promptly admitted.

Patients are received in turn according to dates of application. There are now fourteen (14) waiting for room on the male side, and fifty-one (51) for the female department.

The question of the future provision of accommodation for the insane is an important and interesting one to every legislator and benevolent man.

During the year Miss Dix acceded to the wishes of your Board for a likeness of herself, and generously gave to the Hospital an oil portrait, richly framed. It hangs in the Trustee's room, and is a beautiful reminder of her continued interest in the prosperity of the Connecticut institution, which in its inception owed so much to her wise counsel and self-sacrificing efforts to secure its successful organization.

A large amount of work has been done in grading the grounds in front of the buildings, and a much-needed enlargement has been made to the laundry and boiler house, which has added sleeping rooms for the work people, a reading room, repair shop, &c., &c.

The Hospital income has sufficed to meet the ordinary expenses and repairs of the institution, and to make the above improvements. The report of the Treasurer is appended to this.

The attention of the Legislature is respectfully called to the fact that in some instances, the Poor of a town have been "farmed," outside of its borders, to other towns. Difficulties have thereby arisen in collecting dues from Contractors, and several hundred dollars are in arrears, which your Hospital would have received but for the complications growing out of the practice here complained of.

It is a satisfaction to acknowledge the almost universal promptness with which the Town officials have paid the bills of the patients.

Our physicians and other resident officers have been faithful in their duties.

It should be mentioned in this report, that there are forty (40) patients, thirty-three (33) males and seven (7) females of the criminal class, in the Hospital.

The official terms of the members from Litchfield and Fairfield Counties expire this spring.

For the constant blessing of God, which has attended this Hospital during the past year, the Trustees feel ever grateful and encouraged.

All of which is respectfully submitted.

CHARLES R. INGERSOLL,	New Haven.
ROBBINS BATTELL,	Norfolk.
SAMUEL LYNES, M. D.,	Norwalk.
H. SIDNEY HAYDEN,	Windsor.
LUCIUS S. FULLER,	Tolland.
SAMUEL G. WILLARD,	Colchester.
JOSEPH D. BATES,	Danielsonville.
RICHARD S. FELLOWES,	New Haven.
HENRY WOODWARD,	Middletown.
BENJAMIN DOUGLAS,	Middletown.
JOSEPH CUMMINGS,	Middletown.
JULIUS HOTCHKISS,	Middletown.

April 1st, 1876.

SUPERINTENDENT'S REPORT.

*To the Board of Trustees of the
Connecticut Hospital for the Insane :*

GENTLEMEN :—Agreeably to custom, I herewith submit the usual tables with the details and statistics of the Hospital, for the year ending March 31st, 1876. The number of persons under treatment exceeds that of any previous twelve months. The general health of officers, employés and patients has been good; fewer changes have occurred among those engaged in the work, and consequently more efficient service has been rendered.

In keeping the records and preparing tables therefrom the same rules are observed as in former years. Without these precautions the tabulated statistics or any deductions based upon them would be worthless. For instance, at some Hospitals it is customary to discharge a patient when he leaves the building and to re-admit him on a new number whenever returned. Thus an individual, suffering from periodical insanity, may leave the Hospital and return several times during twelve months and appear on the records each time as a new admission. To avoid error, it has been our custom to record such cases as "home on a visit," or "on trial." At the end of the year the records are balanced and all persons accounted for. Thus the number of admissions represents an equal number of persons; this rule applies to discharges and recoveries.

At the date of the last report there were remaining four hundred and fifty (450) patients, of whom two hundred and nineteen (219) were males, and two hundred and thirty-one (231) were females. There have been since admitted to this date, one hundred and sixty-six (166) patients; one hundred and eight (108) males, and fifty-eight (58) females.

Of this whole number, six hundred and sixteen (616); forty-five

(45) were discharged recovered, forty-six (46) improved, thirty-two (32) stationary, and thirty-three died. The daily average during the year is 452.64. The smallest number present on any day was four hundred and forty (440). The largest number four hundred and sixty-four (464). The following table shows the number of deaths annually, the percentage of average number, and percentage of whole number present during each year:

DEATHS AND THEIR RATIOS, FROM MAY 1ST, 1868, TO APRIL 1ST, 1876.

Official Year.	Whole No. of Patients.	Daily Average No. of Patients.	DEATHS.			Per Cent on whole No. of Patients.	Per Cent on Daily Average No. of Patients.
			Men.	Women.	Total.		
1868-69,	268	85.47	14	1	15	5.59	17.57
1869-70,	343	225.17	18	3	21	6.12	9.32
1870-71,	307	237.	11	10	21	6.71	8.86
1871-72,	329	242.58	9	6	15	4.55	6.18
1872-73,	336	264.53	12	9	21	6.25	7.86
1873-74,	524	339.51	18	17	35	6.67	10.30
1874-75,	605	425.80	21	15	36	5.95	8.45
1875-76,	616	452.64	26	7	33	5.35	7.31

The comparatively low death rate during the year is partly attributable to a number of favorable circumstances, which cannot always be counted on. With constantly increasing numbers of chronic cases, advanced in years and worn out by long continued maniacal excitement, we must sooner or later reach the limit beyond which good nursing, favorable hygienic arrangements and regularity of habits and diet may not prolong life. By referring to the table of causes you observe that nearly one-half of all deaths were the result of incurable organic changes, such as Bright's disease, general paresis and apoplexy. It will be observed that one hundred and eight (108) men were admitted during the year, and only fifty-eight (58) women. This has been owing simply to want of room in the wards devoted to females in consequence of a larger percentage of chronic cases and fewer recoveries. As the wards allotted to men are now crowded I believe that hereafter the admission will be more equally proportioned. Without knowing this you might infer that mental disease was more curable in one sex

than in the other. Experience shows that under the same influence there is little difference. One fatal form of insanity, general paresis, is becoming more common among men, while it rarely affects women ; hence we may reasonably expect more frequent recoveries, and, consequently, more vacancies, as well as more deaths among the men than among the women.

Statutory provision is made for three classes of patients, and the treatment for all is the same.

MENTAL CONDITION is the only true basis of classification. Previous social standing does not protect from abnormal and often repulsive mental manifestations. It is no uncommon experience to have those who are refined and cultured develop the opposite qualities when under the influence of strong delusions. The friends of highly excited patients sometimes express surprise and regret that their loved ones are not domiciled in a quiet ward with convalescents, where books, pictures and flowers adorn the walls and recesses, giving to each an air of comfort and home-likeness which is pleasant to behold. It is perhaps natural and excusable that they should lose sight of the fact which is evident to all others—that one excitable person would disturb and jeopardize the recovery of others. Hence we have always exercised the privilege of classifying patients according to their mental condition.

Of the three classes for whom the law provides there are at this date three hundred and two (302) pauper, one hundred and thirty-five (135) indigent and twenty-three (23) paying patients. The first group includes all who are sent by the Selectmen of towns or the State authorities. The second class comprises such as have moderate means and are able to pay one-half the expense of support ; the balance being charged to the State. All such are admitted on the order of Probate Judges, who are by law required to determine the fact of indigency. The last group includes those who are self-supporting, either personally or by friends.

Believing that a State Hospital should provide primarily for those who are in moderate circumstances, I have invariably advised applicants of the latter class to seek accommodations elsewhere. I do not understand that the Superintendent has discretionary power in the premises, hence when friends insist upon admission here, I have entered their application in regular order. The admissions during the year were one hundred and sixty-six (166) patients, but it should be borne in mind that *double* that number applied for entrance. The waiting period was often six months. Quite a number died before

their turn came ; others were sent to Institutions out of the State ; but the majority remained at home or in the almshouses, to the great annoyance and sorrow of friends and officials, until the period most favorable for treatment had passed. Who can estimate the sum total of suffering, anxiety and care incident to these delays ? Neither the Hospital or its officers are responsible, yet they receive the burden of blame.

The officers are deeply pained when patients are brought to the Hospital for whom the needed applications have not been made. We have by circulars and the press and by personal letters tried to prevent Town Officers from bringing patients without notice, and thus save useless expense. When a Hospital is filled, every additional case disturbs the order, destroys classification and multiplies the difficulties incident to successful treatment of the insane. In the attempt to benefit one, positive injury results to many. The officers have endeavored to make vacancies whenever practicable ; no violent or highly excited person has been refused admission when a quiet, chronic case could be exchanged. In this way many milder patients have gone back to the Town Houses, and others to their homes. As the Hospital is now filled to its utmost capacity with a large proportion of cases who from age, infirmity, or disease, require Hospital care, the number of discharges will be proportionally less, and the applications for admission increasingly greater. Judging from the past and from the character of those now occupying the wards, we cannot reasonably expect to discharge more than one hundred and fifty (150) persons during the next twelve months. Experience shows that in a population of 600,000 there will annually occur at least three hundred new cases of insanity who should receive prompt treatment. What provision can be made for the remaining one hundred and fifty ?

This is a vital question which should receive your earnest and careful consideration.

Notwithstanding the general financial depression, the bills for board and other expenses have been promptly paid. A number of patients have been sent by order of Judges, in compliance with Chapter V, Title VIII, of Revised Statutes. The law is defective, in that it does not explicitly determine who shall be responsible for the support of such cases. The Institution can only look to the Town from which the patient is admitted. If sent by order of a Police Court or a Justice of the Peace, the Selectmen may perhaps refuse to pay the bill, and thus oblige the Hospital to resort to legal measures for its collection,

I have reason to know that in a few instances, Selectmen have neglected complaints respecting insane persons, and have allowed other parties to apply to Police Courts rather than assume their official responsibilities. A majority of these cases, however, come before the courts charged with crime; when acquitted of the charge on the ground of Insanity, they are promptly transferred to the Hospital. During the past year seventeen persons, (16) males and one (1) female have been thus admitted. Of this number, one was imbecile, three epileptic, and two proved not insane; the others were ordinary cases of insanity. There are also twenty-three remaining in Hospital who were admitted in former years, making a total of forty (40) thirty-three (33) males, and seven (7) females, of the so called class of criminal insane, or about nine (9) per cent of the entire number.

A brief analysis of the nature of the crime for which they were arrested may be of interest to those who are tabulating facts respecting pauperism, insanity and crime. One person was arrested for throwing stones through the windows of a railroad car, while in motion; one for bigamy; one for killing a neighbor's cow; another for breaking house windows; two for vagrancy; two for arson; two for breach of peace; three for theft; five for murder; and twenty-one for assault and battery. Six of these were transferred from the State Prison at Wethersfield, and their history would seem to indicate that they were insane when tried and convicted.

Another annoyance to the Hospital in the collection of bills, grows out of the old but no less barbarous custom, which still exists in some sections, of "farming out" the poor to the lowest bidder. By this arrangement the Hospital is virtually at the mercy of the contractor.

A census of the Hospital population on Jan. 1st, 1876, prepared by Dr. C. S. May, showing the relative proportion of Americans and foreigners, and the manner of admission, is of special interest. At that date there were four hundred and sixty-four (464) patients, twenty-four (24) of whom were Americans and self-supporting. One hundred and thirty-two (132) were indigent, sixteen (16) of whom were of foreign birth and able to pay one half of the expense at Hospital. Three hundred and eight (308) were supported entirely at public expense, of whom one hundred and eighty-one (181) were foreigners. Thus it appears that one hundred and ninety-seven (197) persons, or two-fifths of the whole number under treatment at that date were not of American birth, and only sixteen were paying anything towards defraying their expenses.

A repulsive feature of some forms of mental derangement is the change of *personal habits* of individuals. Those who are naturally quiet, modest and taciturn become boisterous and rude ; others who are exquisitely neat and cleanly, manifest untidy propensities that would astonish their intimate friends. It has been our aim during the past year to study the so-called "filthy habit" of the insane for the purpose of ascertaining how much of it could be corrected by watchful care, personal attention to habits and mild discipline.

The subjects of this habit may be divided into three classes : Those who from paralysis or other physical causes are unable to control their secretions ; those who from absorbing delusions become unconsciously filthy ; and lastly, those who are partially demented, habitually lazy, or morally insensible, preferring to remain untidy rather than make any exertion. In a Hospital population made up largely of the chronic insane, there is an average of nine per cent who are inclined to be habitually filthy.

I am indebted to Dr. May for careful attention to this subject. The following statistics show the results of his labor and how much can be done by watchfulness on the part of attendants, and some additional care bestowed upon this class by the night watchman :

Average Number Present.	Number With " Dirty Habit."	Per Cent of Habit.
June, 1875, - 225	June, 21	June, 8.88
Oct., 1875, 225	Oct., 14	Oct., 6.22
Nov., 1875, 225	Nov., 8	Nov., 3.55
March, 1876, 230	March, 7	March, - 3.04

Thus it will be seen that there were in June last twenty-one men who regularly wet or soiled their beds nightly, out of a population of two hundred and twenty-five. Early in October the number had been reduced to fourteen, and at this date there are only seven. These facts relate to male patients ; we are not able to make as favorable a showing respecting female patients. Closely allied to this subject is another of even greater importance. I refer to the question of mechanical restraint. Experienced alienists have differed respecting the amount of restraint advantageous to the welfare of the insane.

Some Superintendents have found it necessary to employ more or less restraint in nearly all acute cases, and in many chronic ; while others of equal experience theoretically discard all mechanical appliances for controlling the excitable or turbulent, and depend entirely upon medicinal remedies and watchful attendance. Without attempting to discuss the merits of the question I report that our experience has led us to follow a medium policy. We have been governed in our course by the actual case presented. In some forms of acute mania, where it seemed necessary to economize all remaining strength, I have prevented its expenditure by confining the patient to a soft bed in a quiet, darkened room, alone. I conscientiously believe that this method is less exciting to the patient and more humane than the manual holding by nurses. The mere presence of another person in the room will often prevent a patient from sleeping.

After thus admitting the usefulness of restraint in certain cases, I desire to protest against the tendency to use it in ordinary cases of chronic insanity where employment, diversion and watching would obviate the necessity for it. In this respect we have made great progress during the past year. On the first of November last, with a population of two hundred and twenty-five (225) male patients, only two were subjected to any form of mechanical restraint ; one had his hands in a leather muff to prevent the removal of bandages from his leg ; the other wore a camisole waist a part of the time to keep him from destroying his clothing. During the past three months these two men have been without restraint, and we have actually conducted the Hospital on the male side on the non-restraint plan. I am under obligations to the officers and attendants who have taken so much pains to further efforts in this direction. Much of its success depends upon the character of the attendants having immediate charge of the wards. Kindness, regularity and watchful attention are efficient qualities in this direction. The great want in every Hospital is occupation ; patients who are in suitable condition to do so go out with a sense of relief to farm work, to the kitchen, laundry or sewing room, and regard the change as diversion. The object in setting a patient to work is not that he may repay cost of treatment, but it is to aid him in casting aside fancies and in returning to healthy feelings and thoughts.

It is not my purpose to discuss the labor question as it relates to the insane and their Hospitals. There are many arguments in favor of the more general occupation of insane persons. I would simply report that from the opening of the Hospital to the present time we

have endeavored to employ all who were in condition, whenever suitable work could be provided. Four years ago I found by actual tables that we were regularly employing 24 per cent of the Hospital population. Referring to the table of classification on page 13 you observe that one hundred and thirty-six patients are employed systematically. There are in addition forty persons among the other classes who do their own mending and making of clothes, embroidery and fancy needle work ; hence out of a population of four hundred and fifty-four (454) persons in March, when the tables were prepared, one hundred and seventy-seven (177) or 39 per cent of the whole number were at various kinds of work for several hours daily. When insanity becomes to be regarded, as it should be, a physical disease, like other nervous diseases, it will lose half of the dread which has surrounded it ; it will not then be hidden as a crime, and the patient himself will not feel the misery of avoidance and mistrust which annoy so deeply the convalescent patient.

It is difficult to get rid of old notions on the subject of "lunatics." The popular idea is that they are raving, desperate maniacs, dangerous to approach. Visitors enter the wards of an Asylum with the expectation of meeting *madmen*, and are therefore often surprised to see groups of patients sitting in the halls or parlors, perfectly quiet, and only "curious about the curiosity of the stranger." This favorable condition results simply from the regularity and the system of classification in modern Hospital life. Insanity does not wholly alter a man's nature ; old habits, instincts and feelings may be twisted or exaggerated, but still form a part of his nature as ordinarily shown. Hence when removed from their surroundings and those influences which were acting as a disturbing element, and he finds the shelter of a comfortable Hospital home, his prospects for a return of healthy mental action are measurably improved. In order that you may easily comprehend our condition, I have carefully prepared the following table, in which the whole Hospital population is divided into eight classes, according to their mental and physical condition :

	Epileptic, Idiotic and Demented.	Infirm, Aged and Crippled.	Periodic.	Maniacal, Noisy, Destructive, Quarrelsome and Filthy.	Ward Workers.	Workers on the Farm, Kitchen, Laundry, &c.	Convalescent.	Could be taken care of at home or at Almshouse.
First Hall, South,	2	2	—	9	4	15	—	1
Second Hall, South,	3	—	1	4	7	11	1	2
Third Hall, South,	4	—	2	7	3	5	1	3
Fourth Hall, South,	3	1	—	10	1	2	—	4
Fifth Hall, South,	1	—	2	15	5	7	—	1
Sixth Hall, South,	2	1	—	15	4	3	1	2
Seventh Hall, South	1	—	—	10	3	1	4	1
Eighth Hall, South	1	3	—	10	5	1	—	5
North Cottage, -	—	1	—	—	3	7	—	3
First Hall, North,	2	1	3	19	3	5	—	1
Second Hall, North,	5	1	1	8	3	8	—	5
Third Hall, North,	1	—	2	7	5	2	3	3
Fourth Hall, North,	1	5	—	10	—	—	—	3
Fifth Hall, North,	3	3	1	18	5	1	—	2
Sixth Hall, North,	—	3	1	14	2	8	—	3
Seventh Hall, North, -	2	3	4	6	4	—	2	2
Eighth Hall, North,	1	5	—	6	2	—	—	5
South Cottage,	1	1	—	5	1	—	—	7
Total,	33	30	17	173	60	76	12	53

An analysis of this table shows thirty-three (33) patients who are epileptic and idiotic; thirty (30) who are infirm, aged and crippled; seventeen (17) who suffer from periodical mania, having regular paroxysms of excitement followed by lucid intervals, these are always incurable and among our most troublesome patients; one hundred and seventy-three (173) are maniacal, noisy, quarrelsome, destructive and filthy; sixty (60) assist in ward work and mending; seventy-six (76) go out regularly to the kitchen, laundry, sewing-room, or farm, twelve (12) are convalescent and will soon return to their homes; fifty-three are quiet, chronic patients, who could be taken care of at home (if possessed of such a place) or at the Almshouse. The first four classes include two hundred and fifty-three (253) persons who require constant attention and Hospital care. Among the class of ward workers are thirty turbulent chronic cases, who need supervision and restraint; there are also thirty who are improving and may recover, some of whom could be provided for elsewhere. Of those who labor more or less continuously out of the wards, thirty (30) are turbulent, noisy or destructive, and require constant attendance, among

whom are many of the criminal insane; forty of this class are quiet, chronic patients, or convalescents, who are better provided for at the Hospital but could be taken care of at home. The division of convalescents includes all who have recovered but remain a few days or weeks to regain full mental vigor.

This careful analysis shows that there are at this date one hundred and twenty-three persons in the Hospital, who, while under its regular influences manifest no particular demonstrations that would absolutely require Hospital restraint. Their insanity is of a mild character. It is from this class that we are continually sending patients away to make room for more urgent cases. Within the past few years one hundred and fifty (150) have in this way been returned to the Almshouses or to their friends. I do not believe the policy economic or humane in the end; sooner or later these cases return to us in a worse condition, and while at home often prove a burden to their poor families who can ill afford to give up regular employment to watch and protect these unfortunates.

When I have urged Selectmen of Towns to remove certain mild cases they have invariably answered, "it is better for us to support the cases at the Hospital than to have their families on our hands as they generally are when the irresponsible person returns home." As in all other questions, there are two sides to this one, and it is often peculiarly difficult to determine the best policy.

Thus, it will be seen that your Hospital is over crowded by the indigent insane, a majority of whom may require its protecting care so long as life continues; and yet there are sixty-five applications for admission more than we can accommodate. Another Hospital is needed as much to-day as this one was ten years ago.

For details respecting farm products, I would refer you to Mr. Weatherbee's report. Under his management the farm is being steadily improved and brought up to a high state of cultivation. Here I may properly allude to the large amount of work done last season in grading and finishing the grounds, laying walks, roads and underdrains, preparatory to planting of trees and shrubbery. This work is of so much importance in view of its influence upon the insane that I ask you to press it forward to completion.

In a large building filled with persons of destructive habits, there is a continual process of wear and waste, which must be met and corrected. It has been my policy as you know, to not only keep up the repairs but also to make improvements where experience indicated the necessity. At the quarterly meeting in July, a committee

was appointed to reconstruct and add to the Laundry building. This work has been completed in a most substantial manner. Nine sleeping rooms are added for the accommodation of employes; also a reading-room, supplied with books and papers regularly. The wooden floor which had rotted in the laundry has been replaced by a smooth slate tile floor laid in cement over brick arches. We have introduced one of Weston's centrifugal wringers; have enlarged the ironing room in connection with a fire-proof room for the sad-iron heater, and in other respects have greatly increased the facilities for washing and ironing. All of the new shafting in the laundry is supplied with "Mettaline boxes" which have thus far worked admirably. Late in the Autumn you decided to enlarge the Boiler-House and replace the worn out "Root Boilers" with a large drop-flue boiler, similar to those already in use. A contract was made with H. B. Beach & Son of Hartford, who have completed their work to the satisfaction of your committee. To increase the draft, the main chimney was carried up thirty feet to a height of one hundred and fourteen feet. While engaged in this perilous undertaking one of the mason tenders was fatally injured by the accidental fall of a brick which struck him on the head, causing a fracture of the skull and concussion of the brain.

Up to the present time the mechanical power for fan, and laundry purposes has been obtained by the use of a small, upright "Root" Engine. Early in November your committee made a contract with the Hartford Foundry and Machine Co., for a twenty-five horse power horizontal engine of the "Woodruff and Beach" pattern. This engine was placed in position in February and has been in use about four weeks. For simplicity, economy, and smoothness of motion it promises to maintain the high reputation which these engines have everywhere acquired. The exhaust steam from it is used in heating water for the laundry. The new engine room is finished in a plain but neat manner, with ash and walnut woods oiled and varnished; the floor being tiled with red and green slate.

To you who are familiar with the daily life at this Institution I hardly need refer to our system of amusements and entertainments. Any recreation which promotes innocent enjoyment, which is physically healthy and morally pure, is a social influence which should be cultivated. The aim has been to make our amusements attractive and instructive and of such wise frequency as to be looked forward to with pleasure. Thus we have devoted one evening each week to music and dancing; two evenings to stereopticon exhibitions, and

generally one evening to lecture, concert or reading. Last Autumn some of the officers, attendants and patients, formed a minstrel troupe whose performances were very amusing and acceptable.

In November the Shepard Jubilee Singers gave us an afternoon concert, which was thoroughly enjoyed by all. We are under obligations to the South Congregational Church Choir for an evening devoted to choice music; and to Mr. Stack, daughter and friends for an instrumental concert.

Religious services, conducted by clergymen of different denominations, are held regularly on Sabbath afternoons at two o'clock. The Rev. Father O'Brien has frequently performed service in accordance with the rites of the Roman Catholic Church.

It is again my pleasant duty to acknowledge with sincere gratitude, the reception of various donations, indicative of an interest in the Hospital and its field of usefulness. During the past three years our patients have received one hundred bouquets weekly from the "Flower Mission" connected with the South Congregational Church Sabbath School. Who can estimate the sum total of pleasure thus delicately and fragrantly communicated.

We have received from George H. Hulbert, Esq., the "Independent" and the "Advance;" Rev. R. T. Thorn, copies weekly of the "Parish Visitor;" Hon. T. S. Gold, several volumes of "Agricultural Reports;" Mrs. Benjamin Douglas a cabinet organ and books for Seventh Ward; Mrs. Fellowes, package of London Illustrated News;" A. Van Name, Librarian Yale College, large package of "Punch" and English illustrated papers; A. M. Smith, Esq., a box of thirty books; A. B. Gillette, a set of Thackeray's novels finely bound; Miss Dix, game of Buffet; Messrs. Peck and Skilton, two rustic settees for front Porch; Mrs. Samuel Colt, thirty dollars for books.

We are under obligations to the publishers of the following named newspapers who have continued to furnish copies regularly and gratuitously:

Hartford Daily Courant,	Hartford, Conn.
do. Evening Post,	do. do.
do. Weekly Times,	do. do.
Religious Herald,	do. do.
New Haven Evening Register,	New Haven, Conn.
do. do. Morning Journal and Courier,	do. do. do.
do. do. Weekly Palladium,	- do. do. do.
Connecticut Herald and Weekly Journal,	do. do. do.
The Commonwealth,	- do. do. do.

The Constitution, Weekly and Daily,	Middletown, Conn.
The Sentinel and Witness, Weekly,	do. do.
The Republican and Standard,	Bridgeport, Conn.
The Toland County Journal,	Rockville, Conn.
Connecticut Western News,	Salisbury, Conn.
Watson's Art Journal,	New York City.

During the past twelve months, no changes have occurred in the staff of officers, and but few among attendants or employés.

If experience and judgment acquired by length of service are desirable in ordinary pursuits, how much more valuable do they become when considered in relation to services rendered to the Insane.

In consequence of the employment of many laborers and mechanics in carrying forward the improvements already described, considerable extra work devolved upon your clerk Mr. F. B. Weeks. As in former years, so now, he proved equal to the responsibility in correctness, promptness, and efficiency. I am under especial obligations to my medical assistants for their continued aid and watchful care in the work to which we are assigned. During the absence of Dr. and Mrs. Hallock, last Autumn, their duties were performed respectively by Dr. T. B. Bloomfield and Mrs. Dutton to my entire satisfaction.

By request I have prepared, and herewith submit, a history of this Institution during its first ten years, to this date, with a description of the building.

In conclusion, permit me to express my grateful sense of obligation to the members of the Board for hearty and intelligent co-operation and personal kindness. Relying upon their ready assistance in the future, and with unfaltering trust in an over-ruling Providence, we enter upon the duties of another year.

Respectfully Submitted,

ABRAM MARVIN SHEW,

Superintendent.

Middletown, Conn., April 1st, 1876.

HISTORY AND DESCRIPTION OF THE CONNECTICUT HOSPITAL FOR THE INSANE,

BY

ABRAM MARVIN SHEW, M. D., *Superintendent.*

PREVIOUS to the year 1840, the *Insane Poor* were kept confined in the Almshouses of the towns; a certain number were generally well cared for in the "Retreat at Hartford." In the year 1840 an effort was made to provide a Hospital especially for them.

A memorial, addressed to the General Assembly, stated that the number of pauper insane was eight hundred, and that there was pressing need of special provision for their care.

It is a coincidence that in 1840 a site for a Hospital was selected at Middletown, about one quarter of a mile from the land which was presented to the State for the same purpose twenty-six years later. But a period of twenty years was allowed to pass before the Legislature was ready to recognize the importance of providing a suitable State Institution.

Mainly through the earnest and judicious efforts of Miss Dix during the Session of the General Assembly at New Haven in 1866, an "Act to create a Hospital for the Insane in the State of Connecticut" was adopted as follows:

WHEREAS:—The Report of the Commission appointed by this Assembly in the year 1865, shows that there are seven hundred and six insane persons in the State of Connecticut, of whom *two hundred and two*

are in the "Retreat" at Hartford; *two hundred and four* are in the Almshouses; and *three hundred* outside of both; and whereas, it is impossible to secure suitable care and medical attention for this large and deeply afflicted class, either in the "Retreat" or in the Almshouses, or in private houses; and whereas, considerations of humanity and of true economy, as well as of public welfare, and of our holy religion, all alike demand that these persons should be liberally provided for by the State; therefore,

Be it enacted by the Senate and House of Representatives in General Assembly convened.

SEC. I. There shall be established and maintained, at some place in this State, to be selected by a Board of Trustees as hereinafter provided, an Institution to be named, "The General Hospital for the Insane of the State of Connecticut."

SEC. II. The government thereof shall be vested in a Board of *twelve* Trustees, consisting of the Governor, and *one* from each county, to be appointed by the Senate, and of three to be appointed by the other Trustees, which three shall be selected from the town or vicinity in which the institution shall be located, two of whom shall be so appointed and commissioned annually; and the places of the two senior members, as they stand in the order of their appointment, shall be annually vacated; and no Trustee shall receive any compensation for his services, but he shall be allowed the amount of expenses incurred in the discharge of the duties of his office, which amount shall be examined and allowed by the Comptroller of public accounts and paid from the Treasury of the State.

SEC. III. The Trustees shall take charge of the general interests of the Institution, ordain and execute its laws, appoint and remove its officers, select a suitable location and a plan for its buildings; shall exercise a strict supervision over all its expenditures, and discharge all other functions usually devolving upon such Trustees; they shall have power to receive by gift or purchase a suitable farm, and receive a deed thereof, and the State Treasurer shall pay therefor, in case of purchase on the warrant of the Comptroller.

SEC. IV. The Superintendent shall be appointed by the Trustees at their first or some subsequent meeting. He shall be a competent physician, and reside in, or near the Institution. As soon as possible he shall procure the plan of a suitable building or buildings, which shall be approved and contracted for by the Trustees; he shall personally superintend its erection and arrangements, and whenever one section or building shall be completed, he shall open the Institution for patients upon such terms and conditions as said Trustees shall prescribe, always giving the preference to the most urgent cases, and to the people of this State. He shall be the Treasurer of the Institution, keep full and accurate accounts of his receipts and expenditures, and of the property

entrusted to him. All accounts, with suitable vouchers, shall be submitted to the Trustees, as they shall require. He shall, before entering upon his duties, give a bond to the Treasurer of the State, with acceptable sureties, in the sum of *five thousand dollars*, conditional that he shall faithfully account for all moneys and property received by him as Superintendent; but no Trustee shall be Superintendent of the Institution.

SEC. V. The State Treasurer shall pay to the Trustees, on the warrant of the Comptroller, such sums of money as they shall require for the location and the building of the Hospital, not to exceed *five thousand dollars* at any one time, and the expenditure of which shall be accounted for to the Comptroller, with the vouchers, before any other sum is advanced.

SEC. VI. The Trustees shall hold their first meeting on the call of any three of their number, due notice being given to all.

SEC. VII. *Thirty-five Thousand Dollars* are hereby appropriated to carry into execution the provisions of this act.

SEC. VIII. This Act is to take effect immediately.

Approved June 29, 1866.

In accordance with the provisions of Sec. II of the above act, the following named persons were appointed Trustees, and at once, with unanimity and zeal, entered upon the important duties confided to them.

H. SIDNEY HAYDEN,	Hartford County.
LEVERETTE E. PEASE,	Tolland County.
BENJAMIN W. TOMPKINS,	New London County.
REV. SAMUEL G. WILLARD,	Windham County.
WILLIAM B. CASEY, M. D.,	Middlesex County.
RICHARD S. FELLOWES,	New Haven County.
REV. CURTIS T. WOODRUFF,	Fairfield County.
ROBBINS BATTELL,	Litchfield County.
BENJAMIN DOUGLAS,	Middletown.
JULIUS HOTCHKISS,	Middletown.
REV. JOSEPH CUMMINGS, D. D., LL. D,	Middletown.

The first meeting of this Board was held at Hartford, July 20th, 1866. His Excellency, Governor Joseph R. Hawley, presiding. To prevent needless delay in the accomplishment of the great object to which they were appointed, committees were named to visit other Hospitals, to select a Superintendent, to procure a suitable site and plans for building, etc.

After several meetings and hearing the claims and liberal propositions of other towns, the Board formally and unanimously accepted about two hundred acres, which the town of Middletown offered gratuitously to the State for the purposes of the Hospital.

It was subsequently made evident that the Institution would require a larger possession and adjoining lots, in all about one hundred acres were purchased by the Trustees.

The sight of the present Hospital is about one mile and a half south easterly of the City of Middletown, bordering on the Connecticut river, is dry and healthy, easy of access by land and water, commanding on all sides, extended views of a beautiful region—and what is of special mark, includes the absolute control of a living stream called “Butler’s Creek,” which furnishes an abundant supply of pure soft water, adequate to all the requirements within the walls, and sufficient for the mechanical and ornamental uses of engines and fountains.

The judicious vote at their first meeting, alluded to above, led the Trustees to inform themselves individually, of the needs in detail, of institutions for the relief of insane, and they visited several hospitals, and so brought together facts, and the experience of well known superintendents, in other States, of direct value to their object.

On the 15th of October, 1866, Dr. Abram Marvin Shew, then connected with the New Jersey Lunatic Asylum, was appointed Superintendent, and immediately entered upon the duties of the office.

Upon a plateau of the farm nearest the town, excavations for foundations were begun, and a permanent road to the highway constructed, to facilitate the progress of the building early in the following spring.

During the winter, the Superintendent was engaged in elaborating the details of plans which he had submitted, and which were adopted unanimously, with approval by the Board of Trustees. Mr. Addison Hutton, Architect, of Philadelphia, was employed to make working drawings and occasionally to inspect the construction of the building. On the 20th of June, 1867, the corner-stone was laid with impressive and appropriate ceremonies, by Governor James E. English, in the presence of the State Officers, Members of the Legislature and a large concourse of interested spectators. Addresses were made by Governor English, Ex-Governor Hawley, Dr. Pliny Earle, of Northampton, Mass., Rev. Dr. Cummings, of Wesleyan University, and Prof. Thacher, of Yale College. During the year the work was vigorously pushed on. The carpenter shop, laundry, bake-house, kitchen, boiler house, center building, first south wing and one return wing were enclosed before cold weather, and completed during the winter. At a meeting of the Board, Feb. 25th, held at the residence of H.

Sidney Hayden, of Windsor, (at that time disabled by a painful accident) on the recommendation of the Superintendent, Dr. Winthrop B. Hallock was appointed Assistant Physician, and his wife, Mrs. Mary Hallock, Matron, and Charles W. Galpin, of Middletown, Steward.

One male patient was admitted on the 29th day of April, 1868, although the Hospital was not *formally* opened until the next day, when twelve men were received.

The daily average number of patients during the first eight official years, is shown in the subjoined table :

OFFICIAL YEAR.	Men.	Women.	Total.
1868-1869,	79.35	6.12	85.47
1869-1870,	110.63	114.54	225.17
1870-1871,	119.	118.	237.
1871-1872,	124.15	118.43	242.58
1872-1873,	132.10	132.43	264.53
1873-1874,	146.32	193.19	339.51
1874-1875,	198.63	227.17	425.80
1875-1876,	225.60	227.04	452.64

There have been admitted to this date (April 1st, 1876) twelve hundred and seventy-two (1272) patients; seven hundred and fourteen (714) males, and five hundred and fifty-eight (558) females. Of this whole number, two hundred and thirty-nine (239) were discharged recovered, one hundred and ninety-one (191) were discharged much improved, one hundred and eighty-five (185) were discharged not improved, one hundred and ninety-seven (197) died, leaving the number in Hospital to-day four hundred and sixty (460), of whom two hundred and twenty-seven (227) are males, and two hundred and thirty-three (233) are females.

The first appropriation for this Hospital was passed by the General Assembly of 1866. Additional appropriations were made from year to year, and the work was steadily carried forward until January, 1874, when the last wing was completed and formally opened for the reception of male patients.

The subjoined table shows the total amount received from the State for the purchase of land, constructing of dam, reservoir, and water-works, and for the erection and furnishing of the Hospital buildings. In accordance with the terms of the appropriation made in 1871, 1872, a commission consisting of Hon. H. Sidney Hayden,

Rev. Dr. Cummings, and Cornelius Brainard, Esq., was appointed by Governor Jewell to supervise the completion of the last two wings. Their labors were performed in a manner that reflects the highest credit upon them and honor upon the State which selected them.

OFFICIAL YEARS.				Amount.
1866,	-	-	-	\$35,000 00
1867,	-	-	-	150,000 00
1868,	-	-	-	200,000 00
1869,	-	-	-	35,543 00
1870,	-	-	-	39,500 00
1871,	-	-	-	90,000 00
1872,	-	-	-	90,000 00
Total,				\$640,043 00

Thus, it will be seen that the total sum appropriated by the State for this benevolent work is six hundred and forty thousand and forty-three (\$640,043) dollars. Ample accommodations for 450 patients and necessary attendants are thus provided at the average rate of about fourteen hundred (\$1,400) dollars per capita. When it is remembered that the entire work was done in the most substantial manner during years immediately following the Rebellion, when prices of labor and all building materials were greatly enhanced in value, Connecticut people may justly feel proud of this favorable exhibit.

In the following description I shall endeavor to avoid confusing details, using figures only when necessary to convey an idea of size or space. The entire structure, including carpenter shop, boiler house and laundry, is of Portland Free Stone, laid in broken range work, two feet in thickness, with tool dressed quoins, window sills and caps, water-table, belting course and cornice, surmounted by a "French Roof" of slate and tin.

Inside the stone wall there is a four inch brick lining, leaving an air space of two inches between it and the stone, to insure dryness. The style of architecture is rigidly plain. The elevation was designed by Addison Hutton, of Philadelphia.

The dimensions of the center or administrative building, are sixty feet in width, one hundred and twenty feet in depth, and four stories in height.

The floor of the lower story is four feet above the level of the ground, and a basement, seven feet six inches deep extends under the

whole building. The central portion of the cellar corresponding to the corridors above, is used as a closed air-duct, in which are placed the pipes and radiators by which the rooms above are warmed and ventilated. On each side ample space is afforded for store-rooms, bowling alleys and a tram-way to carry food from the kitchen to the dumb-waiters, and the conveyance of clothing to and from the laundry. The first story of the main building contains, on one side an officers dining room, nineteen by nineteen feet, a special diet kitchen, nineteen by twenty-two feet, and a large store-room, nineteen by forty-two feet. On the other side a room for the housekeeper, three rooms for female employees, a small store-room, a bath-room, and a store-room for the special diet kitchen, and a water-closet. The large store-room, mentioned above, has a slate tile floor, is fitted up with a sixteen foot Bramhall & Deane, French range and steak broiler, jacketed soup and vegetable kettles, with necessary steam pipes, hot and cold water, sinks, &c., required for a duplicate kitchen whenever repairs or changes are needed in the main kitchen. As a matter of fact it has, until recently, been devoted to this purpose. The second, or principal story, is reached through a portico with a flight of six steps on either side to a lower landing, ten by seventeen feet, and a direct flight of ten steps to the main landing, which is sixteen by twenty-five feet. Four stone columns, two feet in diameter and seventeen feet in height, support the heavy stone cornice which is covered by a tin roof. Ornamented iron railings on the sides and in front, with two gas lanterns sixteen feet in height, add to the effect of the noble entrance. The entrance hall is fourteen feet wide, one hundred and sixteen feet long, and sixteen feet high. The first room on the right is the general business office of the medical staff; the second is the clerk's office, containing a lavatory, a store-room for records and small articles, permanent desks, and a fire-proof safe; the third room is devoted to dry goods and matron's stores; the fourth is a reception room for male patients, with a door opening into an alcove of one of the wards; the remaining room on this southern side is occupied by the assistant matron.

On the left of the entrance is the trustee's room; a large reception room for female patients, a dispensary and medical store-room, and rooms for the First Assistant Physician and Matron. Midway, the hall is intersected by a transverse hall, with broad stairways leading to upper floors and to the wards. The second stories above, in front, contain rooms for the Superintendent and family, and other officers; the rear of the third and part of the fourth stories form the chapel, a

commodious room, forty-four feet wide, fifty-six feet long, and twenty-two feet high, with oval recess ceiling, finished in a plain and neat manner, and furnished with stationary seats of ash and black walnut, a platform and lecturn of the same woods. The plaster finish of this hall was contributed by Richard S. Fellowes, of New Haven, and the wood-work by H. Sidney Hayden, of Windsor. The large and beautiful Organ, which stands in the rear center of the Chapel, was purchased from the South Congregational church for the sum of one thousand dollars, which amount was contributed by a few of the Superintendent's friends. The instrument was manufactured by Mr. Johnson, of Westfield, Mass.

On either side of the administrative building, and at right angles with it, are situated the wings, containing the accommodations for patients and their attendants. The first wing is forty feet in width, one hundred and twenty-four feet in length and three stories in height, with an "L" or return wing, which also is forty feet in width, one hundred and eight feet in depth, and four stories in height. The walls are one foot eight inches in thickness, and have brick linings, similar to that described in the center building. The corridor and partition walls, fourteen inches in thickness are of brick, with an air space of six inches in the center, into which are carried all the hot air and ventilating flues. Corridors twelve feet in width, and height extend the entire length of the wing, with alcoves ten feet in width on each side adjoining the center building, for light and air, and large triple windows, from floor to ceiling at the ends. The "L" halls are ten feet in width, and at right angles with the corridors. Each ward contains a dining room, twenty by twenty-one feet, furnished with china closet, wash closet with hot and cold water and dumb waiter; a day or reading room, two associate dormitories for four and six patients, eleven single rooms, two rooms for patients, seriously ill, shut off by a passage way from the main corridor; one clothes room, one front and one rear hall and stairways leading to outer doors, affording a ready escape in case of fire, and a large room for attendants. In each hall there is a water-closet and wash-room adjoining the bath-room. The water-closet bowls are enameled cast iron, funnel shape, and flushed with water whenever the door is opened, by a spring attachment. The waste-pipe from the closet and "slop-hopper" leads to the main soil-pipe and this has a connection with the tall chimney of the boiler house, as hereafter described. The bath-rooms are furnished with cast iron tubs, of the approved pattern of Messrs. Morris, Tasker & Co., of Philadelphia. The supply of

hot and cold water and the waste, pass through one opening in the bottom. In a vertical duct from the basement to upper stories, opening by a door in each bath-room, is a "pipe-closet," connecting the supply of hot and cold water with each bath-tub, accessible only to the attendant. In each pipe-closet is a fire-plug with one hundred and fifty feet of hose permanently attached; and adjoining this a steam drying room, containing coils of iron pipe placed under a rack upon which damp clothing, bedding or wash rags can be dried.

The above description applies to the three stories of first wing. By continuing the brick corridor and partition walls up within the mansard roof which covers the "L" or return wing, a fourth story ward ten feet six inches in height was obtained. The arrangement of rooms corresponds to the story underneath, and is particularly adapted to small classes of patients who only require dormitory accommodations.

The second section or wing, extends in the same direction, but is set back fifty-eight feet from the front line of the return wing. Like that it contains in each of the three stories, a central corridor, twelve feet wide, one hundred and twenty-four feet long and twelve feet high, lighted at the end nearest the first wing by alcoves on either side, and a large triple window at the termination. The arrangement of dining-room, bath-room, water closet, clothes room, and attendants room, is similar to that already described. There is also a large parlor, rear and front stairways, fifteen single rooms, and four double rooms. In addition to the regular wooden doors, there is also a corrugated iron door on each story, which slides into a pocket in the wall, which when closed, forms a complete fire-proof shut off between the wings. A fourth story ward is arranged with similar accommodations to that of the first section.

The interior part of the building is plain and substantial; the wood work is of Georgia Yellow Pine, oiled and varnished. The floors throughout are laid with three and four inch matched stuff, with coarse counter floors beneath, deafened by mortar one inch and a half in depth. The lower stories are used as wards for excited patients. The rooms on each side of the corridor are fitted with inside window shutters hinged and locked, with a separate hot air flue for each. Nearly all of the hot air flues in rooms and corridors open seven feet above the floor and are guarded by locked registers, plain registers or register faces. Every room has a ventilating flue that begins near the floor, is carried up in the brick walls independently of all other flues and without an opening until it terminates in a chimney

four feet above the roof. Several years experience has demonstrated the decided advantage of this arrangement over the plan commonly adopted, in which the flues terminate in the attic near a ridge ventilator, or in a large common duct passing horizontally through the attic, the air of which escapes through windows or by means of a cupalo. The advantages are, independent perpendicular flues with a more uniform draft from each room ; and entire safety from dangers by fire. Each ventilator is in reality a fire place or a space in which a fire could be safely lighted. As a precautionary measure all of the stairways are closed at the sides, and, in the recently finished wings are of wrought iron firmly anchored to the walls. The rear hallways open from the lower story wards directly into four large airing courts, in which shade trees have been planted and summer houses erected. The single rooms for patients throughout the Hospital are nine feet wide, ten feet six inches long, and twelve feet high. There are thirty-two rooms eleven feet wide, twelve feet long, and twelve feet high, which may be occupied by two patients or by a patient and a special attendant. The associate dormitories vary in size from ten feet six inches by eighteen feet, to twenty by twenty-one feet, and twelve feet high, except in the small fourth story wards previously described. The main structure, exclusive of rear buildings, is lighted by four hundred and seventy-four windows, three feet wide and six feet high, eighty windows three feet wide and nine feet high, twenty-four triple windows, nine feet wide and nine feet high. About thirteen thousand square feet of glass were required to glaze these windows, or a space to cover one hundred and thirteen feet square.

The rear central building, which is sixty feet wide, one hundred and fifty long and two stories high, contains all the mechanical departments, and is situated in the rear of the Hospital and is connected with it *under ground* by a double passage way in which the cars convey food from the kitchen and bakery, and clothing to and from the laundry.

Owing to the favorable slope in the rear, the first story is on a level with the cellar of the main buildings, and includes a bakery, a large kitchen and skullery, a laundry and ironing room, a *fire-proof room* for sad iron heater, a fan wheel for forced ventilation, engine room, engineer's fitting-shop and lavatory and sinks. The second story embraces the sewing department, large dining-room, and twelve rooms for female employées. There are six rooms for male employees over the engineer's shop, and a large sitting room furnished with books and daily papers for the use of the outdoor help. The

boiler house joins this building, and has a chimney one hundred and fourteen feet high and five feet wide at the top. It contains three large drop flue boilers six feet wide and twenty-four feet long. Two of these are sufficient to generate all the steam required for mechanical purposes, cooking, ventilating, and heating during the coldest weather.

A twenty-five horse power engine, manufactured by the Woodruff & Beach Foundry and Machine Co., of Hartford, furnishes power for the fan wheel, washing machines and centrifugal wringer. The engine room has a slate tile floor, and is ceiled in walnut and ash woods, oiled. The fan wheel blower is five feet wide and eleven feet six inches in diameter and has eight blades bent at an angle of ten degrees; air is admitted from a tower through an opening on each side; moving at the rate of forty revolutions per minute, this blower forces a constant current of pure air through the duct under the corridors, which becomes heated by the radiators and passes directly to every room and hall in the entire building.

The Hospital is heated by steam conducted from the boilers through a five inch wrought iron pipe covered with asbestos, to radiators (Gold's patent) placed in the cellar air duct under the flues. By the use of these radiators put up in stacks of from ten to twelve in each box, the apartments are severally heated in the stories, one above another.

Experience shows that a more equal distribution of heat would be obtained by having the flues from each stack of radiators lead to one story; as in the present arrangement, when the fan wheel is not moving, the unequal length of the flues creates an unequal draft by which the upper stories are unduly supplied.

In an Institution of this character a very important advantage of illuminating by gas over other modes is, economy and cleanliness, and security against fire. During the month of November, 1867, the Board of Trustees made an arrangement with the Middletown Gas Light Company for the laying of a main six inch pipe, from their works to the Hospital.

In one respect, the Connecticut Hospital for the Insane is more favorably located than most of the older Institutions. At a distance of one and a half miles from the building, is a range of hills known as the "White Rocks." These hills are nearly destitute of soil and vegetation, but thousands of springs bubble forth from crevices in the rocks, unite and form streams of considerable size, which pass into the Connecticut River through a number of ravines. On one of

these streams, known as "Trout Brook," or "Butler's Creek," a reservoir covering about two acres, was formed by making a substantial dam across the ravine. This dam or embankment is one hundred and fifty feet in length, fifteen feet in width across the top, with a slant each way of eighteen inches to every twelve inches perpendicular. The inner slope is covered with broken stone; the top is four feet above high water mark. A large waste canal, cut in the rocks on one side of the dam, carries off surplus water. The bottom of the reservoir was thoroughly grubbed of vegetable matter and soil before being used. The average depth of water is about six feet; elevation above the ground floor of the Hospital seventy-four feet. From this reservoir a six inch iron pipe conveys the water to the building. At suitable low points "blow-offs" were put in the main pipe, by which sediment can be removed. The quality of the water is unexceptionable, and in *ordinary* seasons, of sufficient quantity to supply several institutions of this size. During the greater portion of the year the amount of water passing off through the waste canal would be considered sufficient for a good mill privilege. On the banks of this reservoir a substantial ice-house to store about one hundred tons, has been erected. This abundant supply of water "by gravity" enables us to dispense with costly and annoying tanks in the attic, and to use at all times an unlimited quantity in the closets and hoppers. All of the waste water, the sewage and the flowage from the roofs are conducted in cement drains under ground, to the rear, where they unite in the main sewer, which is eighteen inches in diameter, has a rapid fall, and terminates two thousand feet East of the Hospital; from thence the sewage is distributed over the farm, by means of open ditches, so arranged that the flowage may be turned from one field to another in rotation. Evidences of the value of the plan are apparent in the increased fertilization. The annual value of farm products averages about nine thousand dollars; a comparison of quantities from year to year shows the pleasing fact of a steady increase, attributable both to additional labor of our patients and to the improved condition of the land. It is our aim to gradually bring under tillage all parts of the farm, and by a system of drainage and use of the house sewage, to enrich and improve land which has been heretofore of little value.

For the protection of stock and the preservation of farm products, a substantial barn was erected in 1869. It is situated on a slope, two thousand feet in the rear of the Hospital, and has a sub-cellar for swine and manure, a commodious, sheltered and ventilated cellar,

(three sides above ground), to accommodate forty cows, and a super-structure of wood fifty-six feet in width, ninety feet in length and twenty-three feet in height, for the storage of hay, grain and farming implements; two cow sheds sixty feet in length, with stalls for twenty-eight head of cattle were added to the barn. A commodious slaughter house, with all necessary appliances for heating water, hoisting carcasses, &c., adjoins the barn-yard; connected with this building is a piggery, sixteen feet wide and one hundred and fifty feet long, with pens for eighty pigs.

During the past two years the grounds immediately surrounding the Hospital have been enclosed and improved by grading and drainage. The carriage-drives and walks are carefully constructed after the "Telford" plan by Thomas McClunie, of Hartford, who has efficiently directed this part of the work. When completed these pleasure grounds, embracing forty acres of beautifully undulating land, will become valuable adjuncts in the proper management of the institution, and nearly all, no matter what may be their mental condition, will derive positive benefit from their regular and daily use.

At the principal entrance to the grounds, stands a cottage "Lodge," or gate house of brown-stone with slate roof and ornamental iron cresting. It is arranged to accommodate the family of the gate keeper who will have charge of the walks and driveways. Our Institution as yet, is able to offer but few of the recreative amusements or employments possessed by older Hospitals. A few games of harmless nature are provided, and the billiard rooms invite those who are sufficiently restored to understand and enjoy the play. One evening each week is devoted to music and social enjoyments, which are participated in by patients and attendants under the direction of the officers. Two evenings are occupied by concerts, lectures, readings or stereopticon exhibitions. The Chapel has been regularly used on the sabbath, to the advantage and comfort of our patients. Acknowledgments are gratefully and sincerely due to the reverend gentlemen of Middletown and vicinity who have cheerfully and regularly conducted the church or chapel services since the opening of the Hospital.

During the past four years, a partial trial of the "cottage system" has been made; two dwelling houses, situated a few rods south of the main building were re-fitted and furnished in a plain manner for the occupation of fourteen male and sixteen female patients, selected from the class of quiet chronic cases. The buildings are simple wooden structures, heated by coal stoves, and lighted by oil lamps. Our experience is, that under favorable circumstances, a system of

cottages may become an important part of a regularly organized Hospital. Cottages substantially constructed of brick or stone, situated sufficiently near the main buildings to be properly heated by steam and lighted by gas from the common center, would be a very desirable addition to the present methods of caring for the insane. The Superintendent could, from day to day, transfer to cottages such patients as he found to require less and less restraint upon personal liberty.

During the winter of 1866, a commodious wharf was constructed on the banks of the Connecticut River, one third of a mile from the Hospital, on land deeded to the Trustees for this purpose. Nearly all the stone, brick and lumber used in the building were landed on this wharf; also the annual supply of coal. A substantial coal-shed capable of storing five hundred tons was erected near the landing. By this arrangement a cargo can be unloaded rapidly at any season of the year and kept under cover until such time as the Hospital teams can be advantageously used in hauling it to the building.

The government of this Hospital is vested in twelve Trustees. The following named gentlemen have been officially connected with the Institution in this capacity. Those in italics are still acting.

Ex. Gov. Joseph R. Hawley,	Hartford.
Ex. Gov. James E. English,	New Haven.
Ex. Gov. Marshal Jewell,	Hartford.
<i>Governor Charles R. Ingersoll,</i>	- New Haven.
<i>H. Sidney Hayden,</i>	- Windsor.
Leverett E. Pease,	- Somers.
<i>Samuel G. Willard,</i>	Colchester.
Benjamin W. Tompkins,	Norwich.
Wm. B. Casey, M. D., (deceased),	Middletown.
<i>Richard S. Fellowes,</i>	New Haven.
Rev. Curtiss T. Woodruff, (removed to N. Y. City)	Norwalk.
<i>Robbins Battell,</i>	- Norfolk.
<i>Benjamin Douglas,</i>	- Middletown.
<i>Julius Hotchkiss,</i>	- Middletown.
<i>Rev. Joseph Cummings, D. D., LL.D.,</i>	- Middletown.
<i>Lucius S. Fuller,</i>	Tolland.
<i>Henry Woodward,</i>	Middletown.
<i>Joseph D. Bates,</i>	Danielsonville.
<i>Samuel Lynes, M. D.,</i>	Norwalk.

The Associate Officers are appointed by the Board of Trustees on the recommendation of the Superintendent.

These various positions have been filled as follows :

First Assistant Physician,	<i>Dr. Winthrop B. Hallock.</i>
Second Assistant Physician,	<i>Dr. Calvin S. May.</i>
Steward,	Chas. W. Galpin.
*Steward,	J. Delos Atherton.
Clerk,	<i>Frank B. Weeks.</i>
Farmer,	<i>Clinton W. Weatherbee.</i>
Matron,	<i>Mrs. Mary Hallock.</i>
Assistant Matron,	- <i>Mrs. Margaret Dutton.</i>

Melvin B. Copeland Cashier of the Middletown National Bank, was appointed Treasurer in 1867, and has performed the duties of that office to this date.

Recognizing the importance of thorough scientific autopsies in doubtful cases, the Board of Trustees, in 1870, appointed Dr. Edward C. Seguin of New York, Special Pathologist. Some of the results of Dr. Seguin's investigations have been published with the annual reports.

The whole number of persons employed in the Hospital is seventy.

The building, including the cottages already mentioned, affords accommodations for four hundred and fifty patients and their attendants.

* The office of Steward was abolished in 1873, and the office of Clerk substituted.

FARMER'S REPORT.

To the Superintendent :

SIR:—I herewith present the following Report of the Farming operations for the year ending March 31st, 1876.

Quantity and Value of Products.

Hay,	121	tons.	-	-	\$2,420 00
Corn Fodder,	7	do.	-		70 00
Straw,	17	do.			272 00
Oats,	151	bushels,	-		75 50
Rye,	88	do.			88 00
Broom Seed,	45	do.	-		13 50
Potatoes,	2,910	do.	-		1,455 00
Carrots,	172	do.			77 40
Beets,	433	do.			216 50
Onions,	260	do.			195 00
Turnips,	224	do.			112 00
Beans, (string,)	62	do.			65 00
Beans, (pole,)	60	do.			72 75
Lima, shelled, (sold)	10 $\frac{1}{4}$	do.			41 00
Peas, (in shell,)	72 $\frac{1}{2}$	do.			137 00
Parsnips,	50	do.			25 00
Sweet Corn,	192	do.			192 00
Cucumbers,	241	do.			241 00
Tomatoes,	154	do.			115 50
Summer Squash,	125 $\frac{1}{2}$	do.			170 00
Winter Squash,	6 $\frac{1}{2}$	tons,			130 00
Lettuce,	32	bushels,			32 00
Spinach,	6	do.			4 50
Pic Plant,	650	pounds,			13 00
Melons,	10,070	do.			100 70
Cabbages,	7,000	heads,			455 00
Celery,	1,500	do.	-	-	75 00

Asparagus,	3 bushels,	15 00
Strawberries,	450 quarts,	93 46
Raspberries,	62 do.	13 40
Currants,	5 bushels,	12 50
Pears,	20½ do.	41 00
Apples,	16 barrels,	48 00
Cider,	135 gallons,	13 50
Milk, (grass fed)	25,200 quarts	1,512 00
Beef,	600 pounds,	54 00
Veal,	1,681 do.	151 29
Pork,	7,880 do.	788 00
Pigs, (sold,)		186 00
Calves, (sold,)	-	5 00
Turkeys,	274 pounds,	60 28
Chickens,	203½ do.	49 91
Eggs,	510 dozen,	127 50
Broom Brush,	800 pounds,	64 00
Total Value,		<hr/> \$10,099 19

Weight of each Hog,—345, 353, 303, 401, 322, 346, 448, 304, 545, 452, 607, 563, 442, 451, 464, 370, 367, 435, 362.

Total,—7,880 pounds. Average,—414 $\frac{14}{9}$.

Respectfully submitted,

C. W. WEATHERBEE,

Farmer.

APPENDIX.

ADMISSION OF PATIENTS.

1. Whenever a patient is sent to the Hospital by the order of the Probate Court, the order or warrant, or a copy thereof, by which the person is sent, shall be lodged with the Superintendent.

2. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

3. Each male patient shall be provided with at least two shirts, one woolen coat, one woolen vest, one pair of woolen pantaloons, two pair new socks, one pair new shoes or boots, and one comfortable outside garment.

Each female patient shall, in addition to a quantity of under-clothing, shoes and stockings corresponding to that required for the male patient, have one flannel peticoat, two good dresses, one cloak or other good outside garment. Extra and better apparel is very desirable for Chapel worship and out of-door's exercise and riding.

4. In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him to the Hospital, from whom minute, but often essential, particulars may be learned.

6. The price of board, including washing, mending, and attendance, for all who are supported at the public charge, is five dollars per week.

7. Pauper patients, or those supported partly by the towns in which they reside, and partly by the State, are admitted agreeably to Sections Four and Six of Amended Act, 1867, and By-Laws.

8. Indigent persons, or those possessing little property, and partly supported by friends and partly by the State, are admitted under Section Four of Amended Act, 1867, and By-Laws.

9. Private patients, or those supported by themselves or their friends, are admitted to the Hospital under Section Five of Amendment to Act approved July 23, 1867, and By-Laws.

10. Visitors are admitted to the Institution between the hours of ten, A. M., and twelve, M., and between two and four, P. M., on Mondays, Wednesdays, and Fridays only, but no visitors shall be admitted to the Wards occupied by patients without express permission from the Superintendent, and especial care is to be taken that no amount of visiting is permitted that might prove injuries to the patients.
